The Cheapest Thing in the World

Is the Metropolitan American Newspaper

Did you ever stop to think of it?

Whether considered from the point of view of what it costs to produce it, or its value to the buyer, there is nothing else sold that is so well worth its price as a good American newspaper. No other article, sold at a nominal price, represents so many, so varied and so important a combination of elements of value—gathered fresh from all quarters of the world every twenty-four hours—as the daily newspaper.

And there isn't a better money's worth in the world than The Chicago Daily News—the largest week-day American newspaper. The Chicago newspapers are proverbially the best newspapers published in America. The Daily News stands at the head of the Chicago newspapers. It has a very much larger circulation in the city of Chicago than any other newspaper. The Postoffice Review says: "Nearly everybody in, around or about Chicago who reads the English language reads The Daily News." The strong features which have given The Daily News such a preponderating circulation in Chicago commend it to popular favor wherever it can be placed on sale throughout the northwest within the following twenty-four hours.

No American newspaper surpasses The Chicago Daily News as a *news*-paper. It is a member of The Associated Press. It prints all the news—American and foreign. At home it has well equipped news bureaus at Washington and New York. Abroad it has its own offices at London, Paris, Berlin and Peking, manned by its own staff representatives, who transmit an unequalled special cable service for exclusive publication in The Daily News. No other American newspaper maintains foreign offices of this character. Special correspondents represent the paper at all other important news centers in Europe and the far east.

The Daily News' exceptional foreign news service—established and maintained during the past twenty years—gave the paper unequalled advantages in reporting the great European war, and this service will be still further augmented to cover the tremendously important period following the war.

The Daily News is consistently independent in politics. Bound by no political allegiance it judges men and measures upon their merits, and presents all aspects of an important issue, so that the informed reader arrives at his own conclusions based on impartial presentation of all the facts in the case.

The market reports and the financial department of The Daily News rank with the best.

The well rounded sporting features of The Daily News cannot fail to interest everybody who feels the attraction of athletics, or who believes in getting wholesome recreation either in doors or out.

The reports of all sorts of sports are written by capable and discriminating experts, who know how to present the news entertainingly and to comment upon sporting events with knowledge and sound judgment.

The Daily News is a clean newspaper. Therefore it is a favorite in the home. Its magazine features are of high quality and of wide range in character.

The Daily News is an entertaining newspaper. Its bright stories and sketches, its high class fiction, its poems, cartoons, comic pictures and its many joyous features peculiarly commend it to young and old alike.

The Daily News reflects throughout the hopeful optimism of the American character. It believes the world is growing better every day, and it is written from that point of view. It believes in giving voice and space to the happy things in life, in their due proportion, as well as to the more serious. It reflects the American sense of humor. There are a good many smiles and laughs in The Daily News.

N. B.—It should be noted that The Daily News is an *evening* paper, and that evening papers have a great advantage over morning papers in presenting European news because of the difference in time. The day begins six hours earlier in England and France, and seven hours in Germany, than in Chicago, enabling The Daily News to print the news of foreign events on the day they occur—many hours ahead of the morning papers.

PREFACE.

BEGINNING with the issue for 1915 The Daily News Almanac and Year-Book has devoted a large amount of space annually to the progress of the world war. The events of each year in the conflict have been chronicled as fully and accurately as the facts available made possible. This is also true of the present issue, which, for the purpose of giving a comprehensive account of the historic occurrences of 1918, has been enlarged to 1,024 pages. The story of the war here presented goes back to 1914 and is not confined to the year which saw the conclusion of an armistice between the belligerents, though the dramatic developments in the last period of the conflict are treated more at length than are those relating to the earlier stages.

It has been the aim in this as in former issues to give in full the more important official documents, public utterances of statesmen, legislative acts and diplomatic proceedings relating to the war, as these will form the basis of future histories of the great upheaval which has already changed the territorial and political geography of the world. Among them, to mention only one, will be found President Wilson's speech setting forth the "fourteen points" which were accepted by most of the belligerents as the basis upon which to build a lasting peace. Attention may also be called to the fact that official reports by Secretary Baker, Gen. Pershing, Gen. March and Secretary Daniels describing the decisive part the American forces took in the war are reproduced in the pages of this volume.

Statistical and other information relating to local, state, national and international affairs is given with the same care and completeness as in previous issues.

ALMANAC AND YEAR-BOOK FOR 1919

Astronomical calculations prepared by B. Hart Wright, DeLand, Fla.

All the calculations in this Almanac and Year-Book are based upon mean or clock time unless otherwise stated. The sun's rising and setting are for the upper limb, corrected for "parallax and refraction." The figures given are for the moon's center on a true horizon as the ocean affords.

The calculations in each of the geographical

divisions of each calendar page will apply with sufficient accuracy to all places in contiguous zones indicated by the heading of the divisions.

Daylight Saving—In all cases where the standard time of an event is given or obtained, advance such one hour in April, May, June, July, August, September and October to convert into the "daylight saving summer time."

THE GREAT SUN, SIRIUS, OR THE DOG STAR.

Sirius, the greatest of the starry hosts, seven times brighter than the brightest star of the northern heavens, was credited by the ancients with peculiar powers over nature. This belief is supposed to owe its origin to the fact that when he is the "bright and morning star," rising at early morning, the great Nile river of Africa mysteriously rises about twenty-five feet, overflowing the vast desert regions adjacent and thereby making them fertile with the rich material brought from the luxuriant tropical regions 2,000 miles above. Now Sirius is twenty times greater than our sun, and when he seemingly united his forces with those of the sun, rising about the same time, came also the hottest days of the year and the time of greatest sickness in the northern hemisphere. Hence the "dog days," or the forty days from about July 3 to Aug. 11, inclusive. South of the equator, of course, the seasons being reversed, these days fall six months later or earlier. Here we can see a reason for their belief that mad dogs and all other hot weather

conditions were attributable to the malign influence of this king of suns, which we know to be one million times more distant than our sun and whose influence upon us or our planet may well be compared to that of a pebble when dropped into the ocean. Sirius may be seen in the daylight by knowing just where to look, though so distant that a ray of his light is eight years in reaching us, traveling at the inconceivable speed of 186,000 miles in one second of time. The vastness of this distance has been well illustrated by the rate of motion of nerve sensation of the human body, as follows: When the tip of a finger is injured the news of such hurt must travel to the brain and the order of withdrawal be sent back to the finger point via the nerve route. As brief as that interval is, had one an arm long enough at infancy to reach out and touch the burning gases that surround that and all other suns and get the fingers burned, said infant would be several centuries old before the injured member could be withdrawn.

YUKON-TANANA GOLD REGION.

The first gold deposits found in inland Alaska were in the Yukon-Tanana region, which lies between Yukon and Tanana rivers west of the international boundary. The earliest of the pioneer prospectors crossed the Chilkoot pass about 1880 and began mining in the

interior of Alaska six years later after finding gold in the Yukon-Tanana region. Since then this region has produced

NOTE—To ascertain any day of the week first look in the table for the year required and under the months are figures which refer to the corresponding figures at the head of the columns of days below. For example: To know on what day of the week July 4 was in the year 1895, in the table of years look for 1895, and in a parallel

line, under July, is figure 1, which directs to column 1, in which it will be seen that July 4 falls on Thursday.

*1752 same as 1772 from Jan. 1 to Sept. 2. From Sept. 14 to Dec. 31 same as 1780 (Sept. 3-13 were omitted).—This Calendar is from Whitaker's London Almanack, with some revisions.

CHART OF THE HEAVENS.

Explanation: The chart of the heavens shows all the bright stars and groups visible in the United States, Canada, Cuba and Hawaii. Stars of the third magnitude are sometimes shown in order to complete a figure.

If a bright, uncharted body be seen near the "ecliptic circle" it must be a planet. To locate the planets or moon refer to the monthly calendar pages in this almanac, find the proper signs on the chart in the "ecliptic circle" and an inspection of that part of the heavens comparing with the chart will serve to identify the planet and all surrounding objects.

Because of the earth's motion from west to east (opposite to the direction of the arrow in the chart), the stars rise 4 m. earlier each day or 30 m. per week or 2 hrs. a month. The chart shows the position at 9 p. m. Then

if the position for any other hour be desired, as for 7 p. m., count ahead one month, or back one month for 11 p. m., and so on for any hour of the night, holding the month desired in front as the face looks either to the north or south with name down.

NOTES: The circle described from the zenith on the "zenith circle" for the desired latitude with a radius of 90 degrees (see graduated meridian) will show what stars are above the horizon. Thus Capella is near the overhead (zenith) point on latitude 40 degrees north Jan. 15, 9 p. m., as will be "big dipper" at 3 a. m. Then from Capella or two stars all the surrounding visible groups can be identified. The "pointers," being 5 degrees apart and always in sight, may be used as a convenient unit of measure; also when visible, the "belt of Orion," 3 degrees, or the sides of the "square of Pegasus."

NOTE.—To use the preceding table in connection with the chart of the heavens, proceed as follows: To locate Venus April 11-21. By the planetary table above we note that the right ascension (corresponding to longitude on the earth) is III $\frac{1}{2}$ hours to IV $\frac{1}{2}$ hours at that time. By referring to the chart of the heavens and locating these hours on the margin of the map or chart, and connecting them with the

north pole star by a straight edge, as an envelope margin, it will be seen that they intercept the ecliptic circle, the circle of dashes, from the Pleiades to the Hyades on the west and near the "milkmaid's dipper" on the east, and therefore that portion of the heavens will be setting from 9:21 to 9:46 p. m. at the date named.

LIGHT AND DARK OF THE MOON IN 1919.

Explanation: The small divisions represent three hours each, and the light portions show the relative amount and place of moonlight in the 12 hours from 6 p. m. to 6 a. m. Of course, allowance must be made for the increase of daylight in summer and the decrease

in winter. Thus, in January the moon will shine until 9 p. m. on the 5th, to midnight on the 9th, to 3 a. m. on the 12th and all night on the 16th; also after 9 p. m. on the 20th, after midnight on the 23d, from 3 a. m. on the 27th and not at all on the 31st.

Explanation: By the absolute scale of magnitudes stars brighter than Aldebaran and Altair are indicated by fractional or negative quantities: thus Vega 0.2 and Sirius -1.4. As the magnitudes increase the brilliancy decreases, each increase of a unit being equal to a decrease of about two and one-half in brightness.

To ascertain when any star or constellation will be on the upper meridian add the number opposite in the column "For Meridian Passage" to the figures in the table on the previous page, "Sidereal Noon," taking note whether such figures be "Morn." or "Eve." If "Morn." and the sum is more than 12h. the result will be Eve. of same day; if "Eve." and the sum is more than

12h. the result will be Morn. of the next day. Having found the time of meridian passage, for the rising subtract and for the setting add the numbers opposite the star in the column headed "For Rising and Setting" (†) and observe the directions as to Morn. and Eve. given for the meridian passage. Those marked (.....) in the last columns are circumpolar. Stars having an asterisk (*) in the last columns are to be seen only in the far south and then when near the meridian, as the vapors of the horizon will prevent seeing them when they rise or set. To tell how high up from the nearest point of the horizon a star will be at its meridian passage subtract the star's declination from 90° and if the

result is less than the latitude of the place of the observer that star will neither rise nor set, but is circumpolar, and the difference between that result and the latitude shows the star's altitude above the north point of the horizon or below the southern horizon. Or (90°-dec.)-lat.=alt. or elevation of the star above the nearest point of the horizon at meridian passage for stars of a southern declination. Examples: Sidereal noon, Oct. 30, 9:27 p. m.

Fomalhaut, dec. 30° S. 90° - 30° = 60°, - 40° = 20°, altitude of Fomalhaut in latitude 40° at its meridian passage. To measure celestial distances with the eye keep in mind that one-third of the distance from the zenith to the horizon is 30°. For smaller measurements use the belt of Orion, 3° long, or the sides of the square of Pegasus; the "pointers" in the "big dipper," which are nearly 5° apart—a convenient celestial yardstick because always to be seen. In the case of a star whose dec. is such as to bring it nearer to the zenith than to a horizon at meridian passage, it will be more convenient to use its zenith distance as a means of locating it. The difference between the latitude and dec. is this zenith distance. If the dec. is greater than the latitude then such distance is to be counted northward, otherwise southward from the zenith.

STORY OF OUR WORLD FAMILY FOR A. D. 1919.

MERCURY, because of his closeness to the sun and consequent rapid motion, is visible only a few times in our year, as mentioned under "Planets, Brightest." Possibly we see in this dodging about the reason for the adoption of Mercury as the god of thieves, with wings on his feet, messenger of the gods, his true motion being known long before the present era. He shows to us, with optical aid, the phases of Venus, being slightly crescent when at his brightest, and hence we know he shines by reflected light, even as we do to those who may see the earth from another planet. The inclination of his orbit to that of our own is such that he passes between us and the sun (transits) at intervals of 13, 7, 10 and 3 years, the 10 year periods affording May transits and the others November. The last one was in November, 1914, and the next will be in May, 1924. He will be about one degree north of Mars March 11, as they set together about one hour after sunset. The Great Square of Pegasus will be seen directly north of them, and Alpheratz and Algol—the two eastern stars of the square—pointing directly to them about 10° south of the latter (see chart of the heavens). Mercury will appear brighter and larger than Mars and of a darker hue.

VENUS, the most glorious member, is the next in order and will be visible the entire year, with the exception of a few days near the middle of September, affording much pleasure as she waxes and wanes in brilliancy, first in the evening hours and then in the fall and winter months as a morning star (see the table of the planets and the chart "Visibility of the Principal Planets" elsewhere). The accompanying cut shows all her various phases and change in apparent size, which features are easily seen with slight optical aid, especially when viewed in the daylight.

One argument against the habitability of Venus is that the inclination of her axis (55°) cuts out the temperate zone and throws frigid and torrid zones together, so that in 58 of their days they would pass from the rigors of winter to the heat of summer, though this effect may be ameliorated by the dense cloud masses with which she is apparently enveloped.

Her itinerary among the stars is as follows: Jan. 1, in Sagittarius, just east of the Milk-maid's Dipper, but being at her greatest distance from the sun and earth, she will be very dim for her: 4° south of the moon Jan. 3 and less than 1° south of Uranus Jan. 31; only 35° south of Mars in Pisces Feb. 13, when they will set almost at the same time. Mars disappearing about 5 minutes ahead of her; enters Aries the latter part of March, when about 2 hours east of the sun, and about 10° south of the group of bright stars in the head of the Ram, having passed about 6° south of the moon on Feb. 2 and March 4 and less than 2° south of her on April 3; in

perihelion April 29 and 3° north of the moon May 2, having passed just south of the Pleiades and north of the Hyades the middle of April; close to Jupiter, 2° north, May 25, in Gemini, with Castor and Pollux northeast of her and Saturn about 2 hours farther east or higher; June 1 directly south of Pollux and 6° north of the moon; in Cancer, just east of Praesepe and 2° north of Neptune June 14, but the moonlight will make it difficult to find Neptune at this time; nearly 7° north of the moon July 1 and only 10° south of Saturn July 2, when almost at her greatest distance

east of the sun, 45° (see chart "Visibility of the Planets") and the brilliant Regulus, at the end of the handle of the Sickle in Leo, only about 2° southeast of them. This makes a magnificent trio of celestial objects, all within the field of small glasses, making it possible to compare them; note the great triangle they form with Arcturus and Spica, right angled at the latter. The closest approach of the planets will be about 9 p. m.—an hour before setting—and the telescope will show Venus as at F in the preceding illustration, as well as

the rings of Saturn and the companion to Regulus. Venus' increase in brightness will be very marked from this on to her maximum Aug. 8, appearing then as at G and being about 25° nearer the sun than when most distant the first part of July. Her eastward motion will diminish rapidly until she becomes nearly stationary and at aphelion Aug. 19, after which she will retrograde as long as she is visible (appearing as in H) in the evening twilight. She passes directly between the earth and sun Sept. 13, being invisible for a few days before and after that date, and when next visible she will be a morning star, west of the sun. She has been photographed within one day of inferior conjunction, when only a fine threadlike crescent is shown, but, of course, the direct sun rays were shut out. After her conjunction she will continue her retrograde motion, but more slowly, until again stationary Oct. 2, after which she will advance eastward the remainder of the year, reaching her point of greatest brilliancy Oct. 20, when in the middle of Leo and close to the moon (2° north). A telescopic view of Venus at this time will cause the novice to think the crescent moon is in the field, so alike will they appear. Their nearest approach will be when both are below the horizon; again on Nov. 18 the moon will pass her 5° to the south, and she will attain her greatest distance west of the sun (46° 44') Nov. 23, and on the last of November only 4½° north of the brilliant Spica Virginis; 4° north of the moon Dec. 18, with the Square of Libra just west of them, and ends the year still in Libra.

MARS will not be at his average best within the year and not until the fall and winter months will he be even attractive, being invisible in May, in conjunction with the sun, and dim for weeks before and after that time. When first visible, after his conjunction with the sun May 9, as a morning star, he will be in the middle of Taurus, with the Hyades just west of him. He passes from Taurus into Gemini July 8, and by Aug. 10 reaches a position directly between Procyon, in Canis Minor and Pollux and within about 10° of the latter, being 5° north of the moon Aug. 23 and in close conjunction with Jupiter Sept. 2, being 41' north of him, and close to the Praesepe in the body of the Crab. Praesepe is a large cluster of dim stars appearing as a nebula to the naked eye, and which has often been mistaken for a comet. This very near approach of these planets in the morning sky will be a pretty sight, as they will rise almost at the same time, Mars appearing first at about 2:40 a. m. It will repay early risings. About 1° north of Neptune Sept. 7, but the moonlight will make the seeing poor, and it will not be worth one's time to try to see Neptune at this time. He will be about 6° north of the moon Sept. 21, Oct. 19, Nov. 17 and Dec. 15. On Oct. 7 he will pass less than 1° north of Regulus or Cor Leonis, the Heart of the Lion, keeping near that noble star and asterism for many days, affording a very pleasing sight from about 3 a. m. till lost in the morning twilight. He will almost eclipse Saturn Oct. 24, passing only 5' north of the ringed planet, so that they will appear almost as a great double star, both rising at 2 a. m. in the north, and about 10 minutes later in the south; passes from Leo to Virgo the last of November, and at the end of the year will be about 5° north of Spica Virginis, and almost at his brightest.

JUPITER will be at his very best, outshining Mars when at his best, the first of the year, rising at sunset and shining all night in Gemini, where he makes the apex of a fine isosceles triangle with Castor and Pollux, just to the northeast of him. Castor, the most northern of the two, is the greatest double star of the heavens—a binary—and the greater companion being separable from the primary

with the aid of small glasses, or, as some claim, by the naked eye at its best, when looking out from a dark room with no moonlight or artificial light to hinder. His close conjunction with Venus May 25 and Mars Sept. 2 was mentioned under those heads. While Jupiter is the giant of our family, his day is the shortest, about 10 hours, and his year about 12 of ours—so he will only traverse about one sign in a year, and at the end of this year he will be about 10° west of the Sickle, in Leo. The moon will pass him Jan. 15, Feb. 11, March 10, April 6 and May 4, all about 2° to the south. He will be dim in June, invisible in July and dim again in August, having been in conjunction with the sun July 21. As a morning star he will be first well visible in September, and will be in conjunction with the moon Sept. 20, Oct. 18, Nov. 14 and Dec. 11, in all of which he will be about 6° north of the moon.

The possessor of a small telescope always finds it pleasurable to watch the phenomena of his major moons as they pass into or out of his shadow, behind him (occultation) or across his face (transit). It was these phenomena that first gave mankind a knowledge of the velocity of light—the supposed error in predicted times of events varied some 16 minutes 38 seconds, according to whether the observation was made at or near conjunction with the sun or at or near opposition, or at points separated by the diameter of the earth's orbit, hence one-half of that difference must represent the time a ray of light requires to traverse 93,000,000 miles—roughly 93,000,000—500 or 186,000. Now we reverse the process, finding the velocity of light experimentally and then compute the sun's distance as 92,979,000 miles, taking 186,330 miles as the velocity of light per second.

SATURN will be bright in January and March and an all night star, and brightest in February, rising at and near sunset. He will decrease in brilliancy and in angular distance from the sun until lost in the evening twilight the latter part of July; reaches conjunction with the sun Aug. 25, when he becomes a morning star, being dim in October and 90° west of the sun Dec. 4, when he qualifies as an evening star again.

By comparing the positions of Saturn and Jupiter for the past few years, as given in this story, the reader will perceive that these two leviathans of the heavens are steadily approaching and they will, in fact, come into conjunction in 1921, when some believe great happenings will take place in consequence.

He will be in Eastern Cancer and Western Leo throughout the year and close to that striking group known as the Sickle, being only 1° north of the lucida of that asterism—Regulus—the latter part of July, setting about 9 p. m. with Venus a few degrees farther east or higher up, making a very pretty combination (see under Venus for July 2, when these planets will be so close as almost to blend into one). His conjunction with the moon will not be close, being about 7° north of her, as follows: Jan. 15, Feb. 15, March 14, April 10, May 7, June 4 and July 5 as evening star, and Sept. 21, Oct. 19, Nov. 16 and Dec. 13 (see under Mars Oct. 24, when he will almost suffer an eclipse by Mars).

His rings are fast working into an edgewise position with respect to our line of vision, which, when accomplished, will render them invisible except in the most powerful telescopes, which will be the case in three years more.

URANUS AND NEPTUNE—By such of our readers as possess telescopes of moderate power these most distant members may be seen, but to make sure the close proximity of some other planet or a star is very desirable or absolutely necessary, and such an opportunity is not well afforded this year at or near the time when they will be at their brightest.

ECLIPSES IN 1919.

There will be three eclipses this year, as follows:

I. Total of the sun May 29, invisible in North America; visible in South America, in southern Atlantic and Africa.

II. Partial of the moon Nov. 7, very small, only about one-sixth of her southern limb being obscured at 6:44 p. m., eastern standard time, or 5:44 p. m., central time.

III. Annular of the sun Nov. 22. More or less of the partial phase will be visible in the United States of America east of a line from

near Santa Barbara, Cal., to near Helena, Mont., and everywhere between this line and one from near Apalachicola, Fla., to Detroit, Mich., the sun will rise more or less eclipsed, mainly upon the southern limb. The annular or ring phase will be visible through central Texas, over a belt about 200 miles in width, extending from Galveston, Houston, Austin and San Antonio to near the southeast corner of New Mexico, as shown on the annexed map.

ANNULAR ECLIPSE OF THE SUN NOV. 22, 1919.

Explanation: The time of beginning and end is given in central standard time. Add 1 hour for eastern time. The size is expressed in tenths, 10 being the annular or greatest. Thus, at Chicago, the end will be at 9:06 a. m. and the greatest size 5.5, or a trifle more than one-half, and upon the southern limb of the sun. At New York city the eclipse will begin at 6:42 a. m., end at 9:25 a. m., and the size will be 4.5, or a trifle less than one-half, when greatest, midway between the beginning and end, or at 8:04 a. m. Between the line A-O, where the eclipse ends at sunrise, and B-C, where the middle or greatest eclipse occurs at sunrise, the eclipse will be decreasing at sunrise, while east of B-C to D-E it will be increasing at sunrise. The reader will understand that the beginning times given, east of F-E, are to be increased by 1 hour where eastern time is desired, north of Charleston. Thus, anyone knowing his approximate geographical location in any state may know, almost at a glance, all the details of the eclipse, near enough for all practical purposes. South of the annular belt the partial phase will be upon the sun's northern limb and north of it upon the southern.

FACTS ABOUT THE SUN AND PLANETS.

The sun's surface is 12,000 and its volume 1,300,000 times that of the earth, but the mass is only 332,000 times as great and its density about one-quarter that of the earth. The force of gravity at the surface of the sun is twenty-seven times greater than that at the surface of the earth. The sun rotates on its axis once in 25.3 days at the equator, but the time is longer in the higher latitudes, from which fact it is pre-

sumed that the sun is not solid, at least as to its surface.

THE EARTH AND THE MOON.

Earth—The equatorial diameter of the earth is 7,926.5 miles and the polar diameter 7,899.5 miles; equatorial circumference, 25,000. The linear velocity of the rotation of the earth on its axis at the equator is 24,840 miles a day, or 1,440 feet a second; its velocity in its orbit around the sun is approximately nineteen miles a second, the length of the orbit being about 560,000,000 miles. The superficial area of the earth, according to Kncke, the astronomer, is 197,108,580 square miles, of which two-thirds is water and one-third land. The planetary mass is about 256,000,000 cubic miles.

Moon—The moon has a diameter of 2,162 miles, a circumference of about 6,800 miles and a surface area of 14,685,000 square miles. Her mean distance from the earth is 238,840 miles. The volume of the moon is about 1-49th that of the earth and the density about 3% that of water. The time from new moon to new moon is 29 days 12 hours 44.05 minutes. The moon has no atmosphere and no water and is a dead world.

Light travels at the rate of 186,300 miles per second. It requires 8 minutes and 8 seconds for light to come from the sun to the earth.

Name.	Diameter, miles.	Distance from sun, miles.	Period of rev., days.
Sun	866,400		
Mercury	8,030	36,000,000	88

VISIBILITY OF THE PRINCIPAL PLANETS, 1919.

Explanation: The light spaces represent one hour of time or 15 degrees of arc and show the approximate time and extent of visibility, and, with the superior planets, the degree of brilliancy also. Thus, Venus will be about three hours or 45° east of the sun early in July, setting correspondingly after the sun. Jupiter will be 180° or twelve hours

from the sun at the beginning of the year, and he must at this time, therefore, rise at sunset, making him an "all-night star." Saturn passes from the east to the west of the sun, becoming a morning star, in August, and ceases to be such early in December when 90° west of the sun.

SIGNS AND CONSTELLATIONS OF THE ZODIAC.

Until recently it was taken for granted that the present relationship between signs and constellations of the zodiac was generally understood, as all astronomical textbooks mention their disagreement and explain the cause. The numerous letters of inquiry concerning differences between the data in this almanac and certain others show the necessity for this note of explanation. (Both sign and constellation now given.)

Thousands of years ago when the zodiac, that belt of the heavens about 16° in width within which move the moon and planets, was formed and divided into twelve parts or seasons called signs, each containing certain star groups called constellations, each was given the name of an object or animal which never did bear any relationship to the configuration of the stars in that group or division, but which did or is supposed to have reference to certain astronomical or other facts. Thus Libra =, the scales or balance, comes at the autumnal equinox when there is an equilibrium or balance between the length of day and night the world over. Aquarius =, the water-bearer, whose sign is the Egyptian sign for running water, comes at the season of greatest rains in Egypt, and so on.

Since the time when these divisions were made and named, owing to the precession of the equinoxes, resulting from the differing polar and equatorial diameters of the earth, the signs have moved back west nearly a whole division or constellation and where ♉ was the first, ♈ now is. Hence, though the sun now enters the sign ♉ March 20, it is a month later when he enters the constellation ♈. It must be apparent, therefore, that any supposed influence or relationship which early astrologers attributed to the position of the sun, moon or planets when in certain of these divisions can no longer exist, as the sign now only represents that space or division of the zodiac where the controlling constellation was 2,000 or more years ago, but is not now. Nevertheless, some almanacs still give the signs for the moon's place, which is very misleading to those who attempt to follow her in her course among the stars. Hence, this almanac gives both and discards the ancient picture of the disemboweled man as a relic of the age of superstition. The sign is retained for sun's place in connection with the seasons and sun's path through the zodiac each month because of its relationship to the equinoxes and solstices.

HUNTER'S AND HARVEST MOON.

The full moon nearest to Sept. 21 is popularly known as the "harvest moon." This is because the moon then rises for several consecutive evenings at nearly the same hour, giving an unusual number of moonlight evenings. This is the

most noticeable in the higher latitudes and quite disappears at the equator.

The "hunter's moon" is the first full moon following the harvest moon.

THE WONDERFUL NEW EAGLE STAR.

On or about the time of the total eclipse of the sun June 8 there appeared a very bright star in the Eagle, where none had been visible before. It was first seen and reported by Prof. Charles P. Oliver of the Leander McCormick observatory, University of Virginia, who is at the head of the American Meteoric society, and who was, no doubt, out gunning for shooting stars when this big game came his way.

Those who profess to read the destinies of men and peoples by the stars may find in the synchronizing of these two events a finger pointing to the ascendancy of this country of ours, whose emblem is the Eagle, together with its allies, of course, and the eclipse of the powers that have sought to dim or extinguish the "Light of the World."

This star, Nova Aquilæ of the astronomers, speedily became an active competitor of the great Dog Star, Sirius, for the honor of the premiership of the northern heavens. Prior to this outburst of luminosity it was of the very dimmest, and only to be seen by the most powerful optical aid, as it appears on the telescopic negatives of the Harvard observatory. In a few days it grew in brilliancy some 10,000 times. It may be easily picked up by the amateur and identified by the fact that a prolongation to the right of the long arm or upright of the Great Cross, that lies in the Milky Way, will hit it very nearly. It also forms a very conspicuous "L" with the brilliant Vega Lyrae at the top and Altair of the Eagle at the angle.

That portion of the heavens where this star

is situated reaches the meridian about midway between the zenith and horizon about midnight July 1, rising six hours earlier and setting the same time later, as it is near the equator of the heavens. For each month later subtract two hours and add the same for each previous month, or one hour every fifteen days or thirty minutes a week.

Many similar stars have appeared at long, irregular intervals. They all last a few years and gradually return to their original dimness. The last preceding one was in 1901, in Perseus, which was the most important one for several hundred years, but which was inferior to this one. Only one or possibly two in all history have exceeded this one in brilliancy. One in 1604 was plainly visible to the naked eye in broad daylight.

Seeking an explanation of this remarkable phenomenon we have but to look at our sun during a total eclipse, when the great jets of burning hydrogen gas are projected vast distances into space, forming an irregular corona or crown. This fierce conflagration is caused by the force of the impact of countless meteoric bodies, transformed into heat—a form of motion. If the new star is the center of a system of planets, as is our sun, all life was destroyed when this outburst took place. Perhaps this is the method of the "sudden death" in I. Thess. 5:1-3.

Thus do we now receive the knowledge of an occurrence that took place away back in the earliest dawning of history by a messenger (light waves) traveling at the inconceivable speed of 186,000 miles in a second of time!

THE METRIC SYSTEM.

The metric system is in general use in all the principal nations of Europe and America with the exception of Great Britain, Russia and the United States, where it is authorized but not compulsory. Its use for scientific purposes is common throughout the world.

Weights.

Milligram (.001 gram)	= .0154 grain.
Centigram (.01 gram)	= .1543 grain.
Decigram (.1 gram)	= 1.5432 grains.
Gram	= 15.432 grains.
Decagram (10 grams)	= 352.7 ounces.
Hectogram (100 grams)	= 3,527.4 ounces.
Kilogram (1,000 grams)	= 2,204.6 pounds.
Myriagram (10,000 grams)	= 22.046 pounds.
Quintal (100,000 grams)	= 220.46 pounds.
Millier or tonneau-ton (1,000,000 grams)	= 2,204.6 pounds.

Dry.

Milliliter (.001 liter)	= .061 cubic inch.
Centiliter (.01 liter)	= .6102 cubic inch.
Deciliter (.1 liter)	= 6.1022 cubic inches.
Liter	= .908 quart.
Decaliter (10 liters)	= 9.08 quarts.
Hectoliter (100 liters)	= 2.838 bushels.
Kiloliter (1,000 liters)	= 1.308 cubic yards.

Liquid.

Milliliter (.001 liter)	= .0388 fluid ounce.
Centiliter (.01 liter)	= .388 fluid ounce.
Deciliter (.1 liter)	= .845 gill.
Liter	= 1.0567 quarts.
Decaliter (10 liters)	= 2.6418 gallons.
Hectoliter (100 liters)	= 26.418 gallons.

ELECTRICAL UNITS DEFINED.

Ohm—Unit of resistance; represents resistance offered to an unvarying electric current by a column of mercury at the temperature of ice, 14.5421 grams in mass, of a cross-sectional area of 1.00003 square millimeters and of the length of 106.3 centimeters.

Ampere—Unit of current; decomposes .0009324 of a gram of water in one second or deposits silver at the rate of .00118 of a gram per second, when passed through a solution of nitrate of silver in water.

Volt—Unit of electromotive force; one volt equals one ampere of current passing through a substance having one ohm of resistance.

Coulomb—Unit of quantity; amount of electricity transferred by a current of one ampere in one second.

Farad—Unit of capacity; capacity of a condenser charged to a potential of one volt by one coulomb. A microfarad is one-millionth of a farad.

Joule—Unit of work; equivalent to energy expended in one second by one ampere current in one ohm resistance.

Watt—Unit of power; equivalent to work done at the rate of one joule per second. A kilowatt is 1,000 watts.

WEATHER FORECASTS AND SIGNALS.

The operations of the weather bureau of the department of agriculture are based on observations of the weather taken at about 200 observatories throughout the United States at the same moment of time and telegraphed daily to Washington, D. C., and to other important cities. These observations, comprising barometric pressure, temperature, precipitation, winds and clouds, are entered upon outline charts of the United States by means of symbols, forming the "daily weather map," from which the forecasts are made. These forecasts are issued every day for every state in the union, and whenever necessary special warnings are sent out of storms,

frosts, cold waves, heavy snows and floods. In addition to the main office in Washington, there are subordinate forecast centers in Chicago, New Orleans, Denver, San Francisco and Portland, Ore. Weather forecasts for a week in advance are now sent out from Washington.

The forecasts are first telegraphed to about 2,300 principal distributing points, whence they are further disseminated by telegraph, telephone and through the mail by means of forecast cards, rural free delivery slips and newspapers.

It is estimated that the total number of persons in the United States to whom the weather forecasts are available is more than 4,000,000.

WEATHER FLAGS.

When No. 4 is placed above No. 1, 2 or 3 it indicates warmer; when below, colder; when not displayed, the temperature is expected to remain

about stationary. During the late spring and early fall the cold-wave flag is used to indicate anticipated frosts.

Small craft. Northwest winds. Southwest winds. Northeast winds. Southeast winds. "Hurricane" signal.
STORM-WARNING FLAGS.

Small craft warning—A red pennant indicates that moderately strong winds are expected.

Storm warnings—A red flag with a black center indicates that a storm of marked violence is expected. The pennants displayed with the flags indicate the direction of the wind: Red, easterly; white, westerly (from southwest to north). The pennant above the flag indicates that the wind is expected to blow from the northerly quadrants; below, from southerly quadrants.

By night a red light indicates easterly winds and a white light above a red light westerly winds.

Two red flags, with black centers, displayed one above the other, indicate the expected approach of tropical hurricanes, and also of those extremely severe and dangerous storms which occasionally move across the lakes and northern Atlantic coast. Hurricane warnings are not displayed at night.

AMERICAN AND WORLD CROPS COMPARED.

[From U. S. monthly crop report.]

The United States produces on an average about three-fourths of the world's corn crop, one-fifth of the wheat crop, one-fourth of the oats crop, one-eighth of the barley crop, one-thirtieth of the rye crop, one-sixteenth of the potato crop, three-fifths of the cotton crop, one-fourth of the flaxseed crop, one-third of the

tobacco crop, one-fourth of the hops crop and one-tenth of the sugar crop. In rank of production the United States is first for corn, wheat, oats, cotton, tobacco and hops; second for barley and flaxseed; fourth for sugar, and fifth for rye and potatoes.

THERMOMETERS COMPARED.

There are three kinds of thermometers, with varying scales, in general use throughout the world—the Fahrenheit, Reaumur and centigrade. The freezing and boiling points on their scales compare as follows:

Thermometer.	Freezing pt.	Boiling pt.
Fahrenheit	32 degrees	212 degrees
Reaumur	zero	80 degrees
Centigrade	zero	100 degrees

The degrees on one scale are reduced to their equivalents on another by these formulas:

Fahrenheit to Reaumur—Subtract 32, multiply by four-ninths.

Fahrenheit to Centigrade—Subtract 32, multiply by five-ninths.

Reaumur to Fahrenheit—Multiply by nine-fourths, add 32.

Reaumur to Centigrade—Multiply by five-fourths.

Centigrade to Fahrenheit—Multiply by nine-fifths, add 32.

Centigrade to Reaumur—Multiply by four-fifths.

WEIGHTS OF DIAMONDS AND FINENESS OF GOLD.

The weight of diamonds and other precious stones is expressed in metric carats. The unit is the international carat of 200 milligrams, which has been officially adopted by the United States and most of the countries in Europe. Until July 1, 1913, there were three different standards in use in the United States, although the one generally accepted was 205.3 milligrams. This was usually subdivided on the binary system, the smallest subdivision being 1-64 of the carat. The new carat is subdivided on the decimal system.

The fineness of gold is also expressed in carats. Pure gold is said to be twenty-four carats fine. If it contains eight parts of a baser metal or alloy it is only sixteen carats fine. The carats therefore indicate the proportion of pure gold to alloy. Most of the gold used by jewelers is about fourteen carats fine, having ten parts of alloy.

SPECIAL PROVISIONS.

Trade Agreements.

For the purpose of readjusting the present duties on importations into the United States and at the same time to encourage the export trade of this country, the president of the United States is authorized and empowered to negotiate trade agreements with foreign nations wherein mutual concessions are made looking toward freer trade relations and further reciprocal expansion of trade and commerce: Provided, however, That said trade agreements before becoming operative shall be submitted to the congress of the United States for ratification or rejection.

Marking and Branding.

All articles of foreign manufacture or production which are capable of being marked, stamped, branded or labeled, without injury, shall be marked, stamped, branded or labeled in

legible English words, in a conspicuous place that shall not be covered or obscured by any subsequent attachments or arrangements, so as to indicate the country of origin. All packages containing imported articles shall be marked, stamped, branded or labeled so as to indicate legibly and plainly in English words the country of origin and the quantity of their contents.

Discriminating Duties.

A discriminating duty of 10 per centum *ad valorem*, in addition to the duties imposed by law, shall be levied, collected and paid on all goods, wares or merchandise which shall be imported in vessels not of the United States, or which, being the production or manufacture of any foreign country not contiguous to the United States, shall come into the United States from such contiguous country; but this discriminating duty shall not apply to goods, wares or merchandise which shall be imported in vessels not of the United States entitled at the time of such importation by treaty or convention or act of congress to be entered in the ports of the United States on payment of the same duties as shall then be payable on goods, wares and merchandise imported in vessels of the United States, nor to such foreign products or manufactures as shall be imported from such contiguous countries in the usual course of strictly retail trade.

No goods, wares or merchandise, unless in cases provided for by treaty, shall be imported into the United States from any foreign port or place, except in vessels of the United States, or in such foreign vessels as truly and wholly belong to the citizens or subjects of the country of which the goods are the growth, production or manufacture, or from which such goods, wares or merchandise can only be, or most usually are, first shipped for transportation. All goods, wares or merchandise imported contrary to this section, and the vessel wherein the same shall be imported, shall be forfeited to the United States.

The preceding subsection shall not apply to vessels or goods, wares or merchandise imported in vessels of a foreign nation which does not maintain a similar regulation against vessels of the United States.

Discount for American Ships.

A discount of 5 per centum on all duties imposed by this act shall be allowed on such goods, wares and merchandise as shall be imported in vessels admitted to registration under the laws of the United States: Provided, That nothing in this subsection shall be so construed as to abrogate or in any manner impair or affect the provisions of any treaty concluded between the United States and any foreign nation.

SYNOPSIS OF TARIFF LEGISLATION SINCE 1884.

Morrison Bills—First bill presented to 48th congress during Chester A. Arthur's administration; proposed a horizontal reduction of 20 per cent with free iron ore, coal and lumber; defeated in house April 16, 1884, by vote of 153 to 155; house heavily democratic and senate republican. Second bill presented to 49th congress during Grover Cleveland's first administration; similar to first bill, proposing free wool, salt and lumber; defeated in house June 17, 1886, by a vote of 157 to 140; house democratic, senate republican.

Mills Bill—Presented to 50th congress during Cleveland's first administration; provided for free lumber and wool, reduction on pig iron and abolition of specific duties on cotton; passed by house July 21, 1888, by vote of 162 to 149, but failed in senate; house democratic, senate republican.

McKinley Bill—Passed by 51st congress, during Benjamin Harrison's administration; became law Oct. 6, 1890; high protective measure, though remitting duties on sugar and providing for reciprocity treaties; both houses of congress republican.

Wilson Bill—Passed by 53d congress during Cleveland's second administration; became law Aug. 17, 1894, without the president's signature; both houses democratic; measure reduced duties in some cases and made additions to free list, notably wool.

Dingley Bill—Passed by 54th congress during McKinley's administration; approved July 24, 1897; passed by house 205 yeas to 122 nays, 27 members not voting; passed by senate 38 yeas to 28 nays, 23 not voting; house contained 206 republicans and 134 democrats and senate 46 republicans and 34 democrats; measure raised rates to produce more revenue, but was similar in many respects to the McKinley act.

Payne-Aldrich Bill—Passed at extra session of 51st congress in first year of President William H. Taft's administration; approved Aug. 5, 1909; passed the house by a vote of 217 to 161 and the senate by a vote of 45 to 34. The conference vote in the house was 195 yeas to 183 nays, twenty republicans voting in the negative and two democrats in the affirmative. In the senate the vote on the final conference report was 47 to 31, seven republicans voting against it. In general the revision of the Dingley act was in the direction of lower duties, but there were some increases.

Underwood-Simmons Bill—Passed by 63d congress at extra session called immediately after President Wilson's inauguration in 1913; house and senate democratic. The bill made many reductions in the tariff duties as fixed by the Payne-Aldrich law and placed numerous articles on the free list. It also contained a section establishing a tax on incomes.

STORAGE SPACE REQUIRED FOR DIFFERENT MATERIALS.

Example—A steamer has a capacity of 180,000 cubic feet for carrying coal. How many tons will she carry?

From the table, average American coal stows 43 cubic feet per ton of 2,240 pounds, so 180,000÷43,186 tons—the number she would carry.

Note—The following table is based on a ton of 2,240 pounds. If the cubic feet per ton of 2,000 pounds is required, multiply the figures given by .892.

DEFINITIONS.

Displacement is the amount of water displaced by a vessel. If a vessel is floating in equilibrium in still water, the weight of the water she displaces equals the weight of the vessel herself with everything on board.

The displacement in cubic feet when floating in salt water divided by 35 (36 if in fresh water) gives the total weight of a ship and her cargo in tons, as 35 cubic feet of salt water weighs one ton (2,240 pounds) and 36 of fresh water the same amount.

The displacement of a steel vessel is calculated to the molded lines (that is, to the outside of the frames) and no allowance is made as a rule for the thickness of the shell plating. For wooden vessels (motor boats, tugs, lighters, etc.) the displacement is calculated to the outside of the planking.

Dead weight is the carrying capacity of a vessel and includes the tons of cargo and coal.

Register ton measurement is the measurement based on a ton of 2,240 pounds occupying 100 cubic feet.

Gross tonnage is the measurement in register tons of the interior capacity of the entire ship.

Net tonnage is the measurement in register tons upon which payment is made, and is the volume of the space available for cargo and passengers.

Block coefficient is the ratio of the volume of the displacement to the volume of a block having the same length, breadth and draft as the vessel. Cargo vessels have block coefficients ranging from .75 to .85, while fast passenger steamers have block coefficients of about .65.

If the length, width and draft of a vessel are multiplied by the block coefficient and this product divided by the weight of water per ton (36 cubic feet for fresh and 35 for salt water per ton of 2,240 pounds) the displacement of the vessel will be obtained.

SHIPPING TERMS.

f. o. b. steamer (free on board steamer); goods to be delivered on board steamer by seller at no extra charge to purchaser.

f. a. s. steamer (free at side steamer); goods to be delivered at side of steamer by seller.

f. f. steamer (free from alongside steamer); the seller pays lighterage charges in the port of destination from the steamer.

c. i. f. (cost, insurance and freight); the goods are delivered to the purchaser with the insurance and freight paid by the seller.

c. f. (cost and freight); the goods are delivered to the purchaser with the freight paid by the seller, but no insurance.

f. o. (free over side); the goods are delivered over the side of a vessel; that is, to a lighter or on to a pier, without any extra charge to the purchaser.

Bill of lading (b. l.) is a receipt for goods delivered to a carrier for transportation. The bills of lading of some steamship companies contain the following clause: "Freight is to be considered earned at time of receipt of shipment and is to be paid whether vessel or goods are lost or not." In foreign trade bills of lading are generally made out in triplicate, one for the shipper, one for the consignee and one for the captain of the vessel.

"With exchange" on a draft means that the party on whom the draft is drawn is to pay the cost of collection.

Demurrage—A charge for delay in loading or unloading a vessel.

Lay days are the days agreed upon by the shipper and captain or agent of a vessel for loading and discharging a cargo, beyond which a demurrage will be paid to the owners of the vessel. Sundays and legal holidays do not count unless the term "running days" is inserted, in which case all days are included.

Manifest—A document signed by the captain of a vessel containing a list of the goods and merchandise on board with their destination, for the use of the custom house officials. By United States Revised Statutes 2807 it is required to contain the names of the ports of loading and destination, a description of the vessel and her port, names of owners and master, names of consignees and of passengers and lists of the passengers' baggage and of the sea stores.

Clearance papers—When ready for sea the customs officials must be provided with a detail manifest of the ship's cargo. If the port charges have been paid and her cargo is properly accounted for, then the collector of the port will furnish the captain with clearance papers, without which the vessel must not leave port.

Drawback—A refund of duties paid on imported material that is used in the manufacture of goods that are exported. The United States government allows the exporter the import duty paid, less 1 per cent.

Salvage—The reward granted by law for saving life and property at sea.

Jettison—The throwing overboard of a part of the cargo or any article on board of a ship for the purpose of lightening the ship in case of necessity.

Bill of health—A certificate stating that the vessel comes from a port where no contagious disease prevails, and that none of the passengers (if carried) nor the crew at the time of departure was infected with any disease.

MARINE INSURANCE.

A contract of marine insurance is a contract of indemnity whereby the insurer undertakes to indemnify the insured in the manner and to the extent agreed against marine losses; i. e., the losses incident to marine adventure.

Unless specially mentioned in the policy, goods are not insured until they are on board of the vessel which is to carry them. Below are brief

outlines of clauses and terms occurring in policies.

General average—Suppose a vessel springs a leak and to save her from sinking the captain throws overboard a portion of her cargo. The last shipment loaded on board is generally the first to come out.

If the shipment is fully insured the underwriters will pay the amount assessed against the goods, but whether the goods are insured or not the general average will make good to the owner the value of the goods which were jettisoned less the assessment which the owner is called upon to pay. It is safe to figure that all policies of insurance on goods cover and protect the merchant against assessments in general average.

Thus a merchant can suffer considerable loss by reason of assessment levied against his goods in general average, although the goods arrive at their destination in a perfectly sound condition—but such losses can be fully covered by insurance.

Free of particular average (f. p. a.)—Under American conditions it is understood that no claim for partial loss or damage will be allowed by the underwriters unless the loss or damage is caused by the vessel's having been burned, stranded, sunk or in collision.

With average (w. a.)—This means that no claim will be made on the underwriters for partial loss caused by sea perils unless the damage amounts to 5 per cent or more of the value of the shipment.

Free of all average (f. a. a.)—This, as the clause signifies, means free of all average.

Collision or ruling or running down clause (r. d. c.)—This is a clause in which the underwriters take a burden of a proportion, usually three-quarters, of the damage inflicted on other vessels by collision for which the insured vessel is held to blame. Sometimes this clause is extended to cover the whole of the assured's liabilities arising out of the damage done to property by the collision of the insured vessel with another and the clause is then known as the "four-fourths running down clause."

Inchalance clause—This clause covers loss of or damage to hull and machinery through the negligence of master, mariners, engineers and pilots, or through explosions, bursting of boilers, breakage of shafts or through any latent defect in the machinery or hull, provided such loss or damage has not resulted from want of due diligence by the owners of the ship or by the manager.

BROMINE PRODUCTION IN 1917.

Some of the asphyxiating gases used so extensively in the European war contain bromine, a heavy brown liquid which gives off a vapor that attacks the nose and throat and has a very harmful effect on the eyes. This same liquid is made into salts that are widely used in peaceful pursuits, as bromide of silver, used in photography, and bromide of potassium, used in medicine for treating nervous diseases. Bromine was extracted from bittern at eleven plants in Michigan, Ohio and West Virginia in 1917. According to R. W. Stone of the United States geological survey, about 903,860 pounds of bromine was produced and sold at these plants in 1917, an increase of 215,600 pounds from the production in 1916.

PRODUCTION OF PORTLAND CEMENT.

The year 1917 holds the record for production of Portland cement, a total of approximately 93,554,000 barrels having been manufactured, an excess over the preceding record production, that of 1913, of nearly 1,500,000 barrels, and over the production of 1916 of more than 2,000,000 barrels, or 2.2 per cent. The shipments in 1917, which were about 90,630,000 barrels, fell below those of the record year for shipments, 1916, by nearly 4,000,000 barrels, or about 4 per cent. Stocks at mills increased more than 2,800,000 barrels, or 34.7 per cent, as compared with 1916.

COPYRIGHT LAWS OF THE UNITED STATES.

The act to amend and consolidate the acts respecting copyright, in force July 1, 1909, as amended by the act approved Aug. 24, 1912, provides that any person entitled thereto, upon complying with the provisions of the law, shall have the exclusive right (a) to print, reprint, publish, copy and vend the copyrighted work; (b) to translate the copyrighted work or make any other version of it if it be a literary work; to dramatize it if it be a nondramatic work; to convert it into a novel or other nondramatic work if it be a drama; to arrange or adapt it if it be a musical work; to finish it if it be a model or design for a work of art; (c) to deliver or authorize the delivery of the copyrighted work if it be a lecture, sermon, address or similar production; (d) to perform the copyrighted work publicly if it be a drama or, if it be a dramatic work and not reproduced in copies for sale, to vend the manuscript or any record thereof; to make or to procure the making of any transcription or record thereof by which it may in any manner be exhibited, performed or produced, and to exhibit, perform or produce it in any manner whatsoever; (e) to perform the copyrighted work publicly for profit if it be a musical composition and for the purpose of public performance for profit and to make any arrangement or setting of it in any system of notation or any form of record in which the thought of an author may be read or reproduced.

So far as it secures copyright controlling the parts of instruments serving to reproduce mechanically the musical work the law includes only compositions published after the act went into effect; it does not include the works of a foreign author or composer unless the country of which he is a citizen or subject grants similar rights to American citizens. Whenever the owner of a musical copyright has used or permitted the use of the copyrighted work upon the part of instruments serving to reproduce mechanically the musical work, any other person may make a similar use of the work upon the payment to the owner of a royalty of 2 cents on each such part manufactured. The reproduction or rendition of a musical composition by or upon coin-operated machines shall not be deemed a public performance for profit unless a fee is charged for admission to the place where the reproduction occurs.

The works for which copyright may be secured include all the writings of an author.

The application for registration shall specify to which of the following classes the work in which copyright is claimed belongs:

- (a) Books, including composite and cyclopedic works, directories, gazetteers and other compilations.
 - (b) Periodicals, including newspapers.
 - (c) Lectures, sermons, addresses, prepared for oral delivery.
 - (d) Dramatic or dramatic-musical compositions.
 - (e) Musical compositions.
 - (f) Maps.
 - (g) Works of art; models or designs for works of art.
 - (h) Reproductions of a work of art.
 - (i) Drawings or plastic works of a scientific or technical character.
 - (k) Photographs.
 - (l) Prints and pictorial illustrations.
 - (m) Motion picture photo plays.
 - (n) Motion pictures other than photo plays.
- These specifications do not, however, limit the subject matter of copyright as defined in the law nor does any error in classification invalidate the copyright protection secured.

Copyright extends to the work of a foreign author or proprietor only in case he is domiciled in the United States at the time of the first publication of his work or if the country of which he is a citizen grants similar copyright protection to citizens of the United States.

Any person entitled thereto by the law may secure copyright for his work by publication thereof with the notice of copyright required by the act, and such notice shall be affixed to each copy published or offered for sale in the United

States. Such person may obtain registration of his claim to copyright by complying with the provisions of the act, including the deposit of copies, whereupon the register of copyrights shall issue to him a certificate as provided for in the law.

Copyright may also be had of the works of an author of which copies are not reproduced for sale by the deposit with claim of copyright of one complete copy, if it be a lecture or similar production, or a dramatic or musical composition; of a title and description, with one print taken from each scene or act, if the work be a motion picture photo play; of a photographic print if it be a photograph; of a title and description, with not less than two prints taken from different sections of a complete motion picture, if the work be a motion picture other than a photo play, or of a photograph or other identifying reproduction thereof if it be a work of art or a plastic work or drawing.

After copyright has been secured there must be deposited in the copyright office in Washington, D. C., two complete copies of the best edition thereof, which copies, if the work be a book or periodical, shall have been produced in accordance with the manufacturing provisions of the act, or if such work be a contribution to a periodical for which contribution special registration is requested one copy of the issue or issues containing such contribution. Failure to deposit the copies within a given time after notice from the register of copyrights makes the proprietor of the copyright liable to a fine of \$100 and twice the retail price of the work, and the copyright becomes void.

The text of all books and periodicals specified in paragraphs (a) and (b) above, except the original text of a book of foreign origin in a language other than English, must in order to secure protection be printed from type set within the limits of the United States, either by hand, machinery, or other process, and the printing of the text and the binding of the books must also be done within the United States. An affidavit of such manufacture is required.

The notice of copyright required consists either of the word "copyright" or the abbreviation "copr.," accompanied by the name of the copyright proprietor, and if the work be a printed literary, musical or dramatic work, the notice must also include the year in which the copyright was secured by publication. In the case, however, of copies of works specified in paragraphs (f) to (k) inclusive (given above) the notice may consist of the letter C inclosed within a circle, accompanied by the initials, monogram, mark or symbol of the copyright proprietor, provided his name appears elsewhere on the copies. In the case of a book or other printed publication the notice shall be applied on the title page or on the page immediately following, or if a periodical either upon the title page or upon the first page of text of each separate number or under the title heading; or if a musical work upon its title page or the first page of music.

Where the copyright proprietor has sought to comply with the law with respect to notice, the omission of such notice by mistake from a particular copy or copies shall not invalidate the copyright or prevent recovery for infringement against any person who, after actual notice of the copyright, begins an undertaking to infringe it, but shall prevent the recovery of damages against an innocent infringer who has been misled by the omission of the notice.

In the case of a book in English published abroad before publication in this country, the deposit in the copyright office within thirty days of one copy of the foreign edition, with a request for the reservation of the copyright, secures for the author or owner an ad interim copyright for thirty days after such deposit is made.

The copyright secured by the act endures for twenty-eight years from the date of the first publication. In the case of any posthumous work, periodical, encyclopedic or other composite work upon which the copyright was originally secured by the proprietor thereof, or of any work

copyrighted by a corporate body, or by an employer for whom such work is made for hire, the proprietor of such copyright shall be entitled to a renewal of the copyright in such work for the further term of twenty-eight years when application for such renewal shall have been made within one year prior to the expiration of the original term. In the case of any other copyrighted work, including a contribution by an individual author to a periodical or to a cyclopedic or other composite work when such contribution has been separately copyrighted, the author of such work, if living, or the heirs, executors or next of kin, if the author be dead, shall be entitled to a renewal of the copyright for a further term of twenty-eight years. In default of such application for renewal the copyright in any work shall end at the expiration of twenty-eight years.

If any person shall infringe the copyright in any work protected under the copyright laws of the United States, such person shall be liable:

(a) To an injunction restraining such infringement.

(b) To pay to the copyright proprietor such damages as the copyright proprietor may have suffered due to the infringement, as well as all the profits which the infringer shall have made from such infringement, and in proving profits the plaintiff shall be required to prove sales only and the defendant shall be required to prove every element of cost which he claims, or in lieu of actual damages or profits such damages as to the court shall appear to be just, and in assessing such damages the court may, in its discretion, allow the amounts as hereafter stated (in numbered paragraphs) but in the case of a newspaper reproduction of a copyrighted photograph such damages shall not exceed the sum of \$200 nor be less than \$50, and such damages shall in no other case exceed the sum of \$250 and shall not be regarded as a penalty. In the case of the infringement of an undramatized or nondramatic work by means of motion pictures, where the infringer shows that he was not aware that he was infringing, the damages shall not exceed \$100; in the case of the infringement under like circumstances of a copyrighted dramatic or dramatico-musical work the entire sum recoverable shall not exceed \$5,000 nor be less than \$250.

1. In the case of a painting, statue or sculpture, \$10 for every infringing copy made or sold by or found in the possession of the infringer or his agents or employees.

2. In the case of any work enumerated in the list (given above) of works for which copyright may be asked, except a painting, statue or sculpture, \$1 for every infringing copy.

3. In the case of a lecture, sermon or address, \$50 for every infringing delivery.

4. In the case of dramatic or dramatico-musical or a choral or orchestral composition, \$100 for the first and \$50 for every subsequent infringing performance; in the case of other musical compositions, \$10 for every infringing performance.

(c) To deliver up on oath all articles alleged to infringe a copyright.

(d) To deliver up on oath for destruction all the infringing copies or devices, as well as all plates, molds, matrices or other means for making such infringing copies, as the court may order.

(e) Whenever the owner of a musical copyright has used or permitted the use of the copyrighted work upon the parts of musical instruments serving to reproduce mechanically the musical work, then in case of infringement by the unauthorized manufacture, use or sale of interchangeable parts, such as disks, rolls, bands or cylinders for use in mechanical music-producing machines, no criminal action shall be brought, but in a civil action an injunction may be granted upon such terms as the court may impose and the plaintiff shall be entitled to recover in lieu of profits and damages a royalty as provided in the act.

Any person who shall willfully and for profit infringe any copyright, or willfully aid or abet such infringement, shall be deemed guilty of a misdemeanor, and upon conviction thereof shall

be punished by imprisonment for not exceeding one year or by a fine of not less than \$100 nor more than \$1,000, or both, in the discretion of the court. It is provided, however, that nothing in the act shall prevent the performance of religious or secular works, such as oratorios, cantatas, masses or octavo choruses by public schools, church choirs or vocal societies, provided the performance is for charitable or educational purposes and not for profit.

Any person who shall fraudulently place a copyright notice upon any uncopyrighted article, or shall fraudulently remove or alter the notice upon any copyrighted article, shall be deemed guilty of a misdemeanor and shall be subject to a fine of not less than \$100 nor more than \$1,000.

Any person who shall knowingly sell or issue any article bearing a notice of United States copyright which has not been copyrighted in this country, or who shall knowingly import any article bearing such notice, shall be liable to a fine of \$100.

During the existence of the American copyright in any book the importation of any piratical copies thereof or of any copies not produced in accordance with the manufacturing provisions of the copyright law, or of any plates of the same not made from type set in this country, or any copies produced by lithographic or photo-engraving process not performed within the United States, is prohibited. Except as to piratical copies this does not apply:

(a) To works in raised characters for the blind;

(b) To a foreign newspaper or magazine, although containing matter copyrighted in the United States printed or reprinted by authority of the copyright owner, unless such newspaper or magazine contains also copyright matter printed without such authorization;

(c) To the authorized edition of a book in a foreign language of which only a translation into English has been copyrighted in this country;

(d) To any book published abroad with the authorization of the author or copyright proprietor under the following circumstances:

1. When imported, not more than one copy at a time, for individual use and not for sale, but such privilege of importation shall not extend to a foreign reprint of a book by an American author copyrighted in the United States;

2. When imported by or for the use of the United States;

3. When imported for use and not for sale, not more than one copy of any such book in any one invoice, in good faith, by or for any society or institution incorporated for educational, literary, philosophical, scientific or religious purposes, or for the encouragement of the fine arts, or for any college, academy, school or seminary of learning, or for any state school, college, university or free public library in the United States;

4. When such books form parts of libraries or collections purchased en bloc for the use of societies, institutions or libraries, or form parts of the library or personal baggage belonging to persons arriving from foreign countries and are not intended for sale.

No criminal actions shall be maintained under the copyright law unless the same be begun within three years after the cause of action arose.

Copyright may be assigned, mortgaged or bequeathed by will.

There shall be appointed by the librarian of congress a register of copyrights at a salary of \$4,000 a year and an assistant register at \$3,000 a year.

These with their subordinate assistants shall perform all the duties relating to the registration of copyrights. The register of copyrights shall keep such record books in the copyright office as are required to carry out the provisions of the law, and whenever deposit has been made in the copyright office of a copy of any work under the provisions of the act he shall make entry thereof.

In the case of each entry the person recorded as the claimant of the copyright shall be entitled to a certificate of registration under seal of the copyright office.

The register of copyrights shall receive and the persons to whom the services designated are rendered shall pay the following fees: For the registration of any work subject to copyright, \$1, which sum is to include a certificate of registration under seal: Provided, That in the case of photographs the fee shall be 50 cents where a certificate is not demanded. For every additional certificate of registration made, 50 cents. For recording and certifying any instrument of writing for the assignment of copyright or license, or for any copy of such certificate or license, duly certified, if not over 300 words in length, \$1; if more than 300 and less than 1,000, \$2; if more than 1,000 words in length, \$1 additional for each 1,000 words or fraction thereof over 300 words. For recording the notice of user or acquiescence specified in the act, 25 cents for each notice of not over fifty words and an additional

25 cents for each additional 100 words. For comparing any copy of an assignment with the record of such document in the copyright office and certifying the same under seal, \$1. For recording the extension or renewal of copyright, 50 cents. For recording the transfer of the proprietorship of copyrighted articles, 10 cents for each title of a book or other article in addition to the fee for recording the instrument of assignment. For any requested search of copyright office records, indexes or deposits, 50 cents for each full hour consumed in making such search. Only one registration at one fee shall be required in the case of several volumes of the same book deposited at the same time.

For copyright blanks and additional information as to copyright regulations address the register of copyrights, library of congress, Washington, D. C.

APPLICATIONS FOR PATENTS.

[Condensed from rules of practice]

Business with the patent office should be transacted in writing. All office letters must be sent in the name of the "commissioner of patents." On the propriety of making an application for a patent the inventor must judge for himself. The office is open to him and its records and models may be inspected either by himself or by any attorney or expert he may call to his aid. Pending applications are preserved in secrecy, but after a patent has issued the model, specification, drawings and all documents relating to the case are subject to general inspection, and copies, except of the model, are furnished at rates specified hereinafter.

An applicant may prosecute his own case, but he is advised, unless familiar with such matters, to employ a competent patent attorney, as the value of patents depends largely upon the skillful preparation of the specification and claims.

A patent may be obtained by any person who has invented or discovered any new and useful art, machine, manufacture or composition of matter, or any new and useful improvement thereof, not known or used by others in this country before his invention or discovery thereof, and not patented or described in any printed publication in this or any foreign country before his invention or discovery thereof, or more than two years prior to his application, and not patented in a country foreign to the United States, on an application filed by him or his legal representatives or assigns more than twelve months before his application, and not in public use or on sale in the United States for more than two years prior to his application, unless the same is proved to have been abandoned, upon payment of the fees required by law and other due proceedings had.

In the case of the death of the inventor, the application will be made by and the patent issue to his executor or administrator.

Applications for patents must be made to the commissioner of patents and must be signed by the inventor or in case of his death by his executor or administrator. A complete application comprises the first fee of \$15, a petition, specification and oath, all of which must be in the English language, and drawings when required. Papers for permanent record must be legibly written or printed in permanent ink. The application must be completed and prepared for examination within one year. The petition must be addressed to the commissioner of patents and must state the name, residence and postoffice address of the petitioner, designate by title the invention sought to be patented, contain a reference to the specification for a full disclosure of such invention and must be signed by the inventor.

The specification is a written description of the invention or discovery and of the manner and process of making, constructing, compounding and using the same, and is required to be in such full, clear, concise and exact terms as to enable any person skilled in the art or science to which the invention or discovery appertains,

in the United States patent office.]

or with which it is most nearly connected, to make, construct, compound and use the same. In case of a mere improvement the specification must particularly point out the parts to which the improvement relates, distinguishing clearly between what is old and what is claimed as new. The following order of arrangement should be observed in framing the specification: (a) Preamble stating the name and residence of the applicant and the title of the invention. (b) General statement of the object and nature of the invention. (c) Brief description of the several views of the drawing (if the invention admit of such illustration). (d) Detailed description. (e) Claim or claims. (f) Signature of applicant.

Two or more independent inventions cannot be claimed in one application; but where several distinct inventions are dependent upon each other and mutually contribute to produce a single result they may be claimed in one application. The applicant, if the inventor, must make oath or affirmation that he does verily believe himself to be the original and first inventor or discoverer of the art, machine, manufacture, composition or improvement for which he solicits a patent; that he does not know and does not believe that the same was ever known or used before his invention or discovery thereof, and shall state of what country he is a citizen and where he resides and whether he is a sole or joint inventor of the invention claimed in his application. In every original application the applicant must distinctly state under oath that to the best of his knowledge and belief the invention has not been in public use or on sale in the United States for more than two years prior to his application or patented or described in any printed publication in any country before his invention or more than two years prior to his application, or patented in any foreign country on an application filed by himself or his legal representatives or assigns more than twelve months prior to his application in this country. If any application for patent has been filed in any foreign country by the applicant in this country, or by his legal representatives or assigns, prior to his application in this country, he shall state the country or countries in which such application has been filed, giving the date of such application, and shall also state that no application has been filed in any other country or countries than those mentioned, and if no application for patent has been filed in any foreign country he shall so state. This oath must be subscribed to by the affiant.

The oath or affirmation may be made before any person within the United States authorized by law to administer oaths, or, when the applicant resides in a foreign country, before any minister, charge d'affaires, consul or commercial agent of the United States, or by any official authorized to administer oaths in the country in which the applicant may be.

Drawings must be made upon pure white paper of a thickness corresponding to a two-sheet or three-sheet Bristol board. The surface of

the paper must be calendered and smooth. India ink alone must be used to secure perfectly black and solid lines. The size of the sheet on which a drawing is made must be exactly ten by fifteen inches. One inch from its edges a single marginal line is to be drawn, leaving the "sight" precisely eight by thirteen inches. Within this margin all work and signatures must be included.

A model will be required or admitted as a part of the application only when on examination of the case in its regular order the primary examiner shall find it to be necessary or useful.

A design patent may be obtained by any person who has invented any new, original and ornamental design for an article of manufacture, not known or used by others in this country before his invention thereof, and not patented or described in any printed publication in this or any foreign country before his invention thereof, or more than two years prior to his application, and not caused to be patented by him in a foreign country on an application filed more than four months before his application in this country and not in public use or on sale in this country for more than two years prior to his application, unless the same is proved to have been abandoned, upon payment of the fees required by law and other due proceedings had, the same as in cases of inventions or discoveries.

Patents for designs are granted for three and one-half years, seven years or fourteen years as the applicant may elect. The proceedings in applications for patents for designs are substantially the same as in applications for other patents. The design must be represented by a drawing made to conform to the rules laid down for drawings of mechanical inventions.

A reissue is granted when the original patent is inoperative or invalid by reason of a defective or insufficient specification, or by reason of the patentee claiming as his invention or discovery more than he had a right to claim as new, provided the error has arisen through accident or mistake.

[For rules as to interferences, reconsideration of cases, appeals, hearings, motions, testimony, briefs and other technical or legal data, inventors are referred to the "rules of practice," which may be obtained free from the United States patent office.]

Every patent shall issue within a period of three months from the date of the payment of the final fee. A patent will not be antedated. Every patent will contain a short title of the invention or discovery indicating its nature and object, and a grant to the patentee, his heirs and assigns, for the term of seventeen years, of the exclusive right to vend the invention or discovery throughout the United States and its territories.

Under the law passed by congress Feb. 20, 1905, and effective April 1, 1905, citizens of the United States, or foreigners living in countries affording similar privileges to citizens of the United States, may obtain registration of trade-marks used in commerce with foreign nations, or among the several states, or with Indian tribes, by complying with the following requirements: First, by filing in the patent office an application therefor in writing, addressed to the commissioner of patents, signed by the applicant, specifying his name, domicile, location and citizenship; the class of merchandise and the particular description of goods comprised in such class to which the trade-mark is appropriated; a statement of the mode in which the same is applied and affixed to goods, and the length of time during which the trade-mark has been used. With this statement shall be filed a drawing of the trade-mark, signed by the applicant or his attorney, and such number of specimens of the trade-mark as may be required by the commissioner of patents. Second, by paying into the treasury of the United States the sum of \$10 and otherwise complying with the require-

REGISTRATION OF TRADE-MARKS.

ments of the law and such regulations as may be prescribed by the commissioner of patents.

The application must be accompanied by a written declaration to the effect that the applicant believes himself to be the owner of the trade-mark sought to be registered and that no other person or corporation has the right to use it; that such trade-mark is in use and that the description and drawing presented are correct. Trade-marks consisting of or comprising immoral or scandalous matter, the coat of arms, flag or other insignia of the United States or of any state or foreign nation cannot be registered. Fees for renewal of trade-marks and for filing opposition to registrations are \$10 each; for appeals from examiners to the commissioner of patents, \$15 each.

Further information may be had by applying to the commissioner of patents, Washington, D. C.

NATIONAL WEALTH OF THE UNITED STATES.

The national wealth of the United States is estimated by the United States census bureau at \$187,739,000,000, or \$1,965 for each man, woman and child in the country. The total includes the value of all kinds of real, personal and other property, taxable and exempt, in the United States exclusive of Alaska, Hawaii, Porto Rico and the Philippines. Omitting the value of property exempt from taxation for the reason that it was not included in the figures for 1850, 1860 and 1870, the wealth for the several census years is as follows:

	Total.	Per cap.
1912.....	\$175,426,000,000	\$1,836
1900.....	100,273,000,000	1,234
1890.....	82,305,000,000	1,083

Year.	Total.	Per cap.
1890.....	\$61,204,000,000	\$975
1880.....	41,642,000,000	830
1870.....	24,055,000,000	624
1860.....	16,160,000,000	514
1850.....	7,136,000,000	308

Including exempt and all other classes of property the estimated national wealth in each of the census years, 1880 to 1912, was:

Year.	Total.	Per cap.
1912.....	\$187,739,000,000	\$1,965
1900.....	107,104,000,000	1,318
1890.....	88,517,000,000	1,165
1880.....	65,037,000,000	1,036
1870.....	43,642,000,000	870

POSTAL INFORMATION.

DOMESTIC RATES.

First-Class Matter.

Rates of postage—Letters and other first-class matter, 3 cents for each ounce or fraction thereof. Postcards and postal cards, 2 cents each.

"Drop letters," addressed for delivery at the office where mailed, 2 cents for each ounce or fraction thereof when deposited at postoffices where letter carrier service is not established. There is no drop rate on mail other than letters. The limit of weight of first-class matter is four pounds.

First-class matter includes written matter, namely, letters, postal cards, postcards (private mailing cards) and all matter wholly or partly in writing, whether sealed or unsealed (except manuscript copy accompanying proof sheets or corrected proof sheets of the same and the writing authorized by law on matter of other classes). Also matter sealed or otherwise closed against inspection.

Letters written and mailed by soldiers, sailors and marines assigned to foreign duty engaged in the present war may be mailed free of postage.

Second-Class Matter.

Rate of postage—Newspapers and periodical publications of the second class, when sent unsealed by others than the publisher or a news agent, 1 cent for each four ounces or fraction thereof on each separately addressed copy or package of unaddressed copies. To be entitled to this rate the copies must be complete. Incomplete copies are third-class matter.

Second-class matter includes newspapers and periodicals bearing notice of entry as second-class matter. No limit of weight is prescribed.

On and after July 1, 1918, the rates of postage on publications entered as second-class matter, when sent by the publisher or a news agent to subscribers or to other agents for the purpose of sale, on the portion of a publication devoted to other matter than advertisements, shall be 1½ cents per pound or fraction thereof until July 1, 1919; after that 1½ cents per pound or fraction thereof; on the portion of a publication devoted to advertisements the rates per pound or fraction thereof for delivery within the several zones devoted to fourth-class matter shall be: From July 1, 1918, to July 1, 1919, for the 1st and 2d zones, 1½ cents; 3d zone, 1½ cents; 4th zone, 2 cents; 5th zone, 2½ cents; 6th zone, 2½ cents; 7th zone, 3 cents; 8th zone, 3½ cents; between July 1, 1919, and July 1, 1920, for 1st and 2d zones, 1½ cents; 3d zone, 2 cents; 4th zone, 3 cents; 5th zone, 3½ cents; 6th zone, 4 cents; 7th zone, 5 cents; 8th zone, 5½ cents; from July 1, 1920, to July 1, 1921, for 1st and 2d zones, 1½ cents; 3d zone, 2½ cents; 4th zone, 4 cents; 5th zone, 4½ cents; 6th zone, 5½ cents; 7th zone, 7 cents; 8th zone, 7½ cents; after July 1, 1921, for the 1st and 2d zones, 2 cents; 3d zone, 3 cents;

4th zone, 5 cents; 5th zone, 6 cents; 7th zone, 9 cents; 8th zone, 10 cents.

In the case of newspapers entitled to be entered as second-class matter and published in the interest of religious, educational, scientific, philanthropic, agricultural, labor or fraternal organizations, not organized for profit, the rates, irrespective of the zone in which delivered (except where the same are deposited in a letter carrier office for delivery by its carrier, in which case the old rate prevails), shall be 1½ cents a pound or fraction thereof between July 1, 1918, and July 1, 1919, and after that 1½ cents.

Third-Class Matter.

Rate of postage—On unsealed third-class matter the rate is 1 cent for each two ounces or fraction thereof on each individually addressed piece or package.

Third-class matter embraces circulars, newspapers and periodicals not admitted to the second class, nor embraced in the term "book," miscellaneous printed matter on paper not having the nature of an actual personal correspondence, proof sheets, corrected proof sheets and manuscript copy accompanying the same, and matter in point print or raised characters used by the blind. (Books are included in fourth-class or parcel post mail.)

The limit of weight of third-class matter is four pounds.

Fourth-Class Matter (Domestic Parcel Post).

Fourth-class matter embraces that known as domestic parcel post mail, and includes farm and factory products (and books), not now embraced by law in either the first or second class or (with the exception of books) in the third class, not exceeding seventy pounds in weight (when mailed for delivery within the first or second zones, nor exceeding fifty pounds in weight when mailed for delivery within any of the other zones), nor greater in size than 84 inches in length and girth combined, nor in form or kind likely to injure the person of any postal employee or damage the mail equipment or other mail matter and not of a character perishable within a period reasonably required for transportation and delivery.

Rates of postage—To be fully prepaid—unsealed—as are as follows:

(a) Parcels weighing 4 ounces or less, except books, seeds, plants, etc., 1 cent for each ounce or fraction thereof, any distance.

(b) Parcels weighing 8 ounces or less containing books, seeds, cuttings, bulbs, roots, scions, and plants, 1 cent for each 2 ounces or fraction thereof, regardless of distance.

(c) Parcels weighing more than 8 ounces, containing books, seeds, plants, etc., parcels of miscellaneous printed matter weighing more than 4 pounds, and all other parcels of fourth-class matter weighing more than 4 ounces are charge-

able, according to distance or zone, at the pound rates shown in the following table, a fraction of a pound being considered a full pound.

Zones—Parcel Post Guide and Maps.

For parcel post purposes the United States is divided into units of area thirty minutes square. Such units form the basis of the eight postal zones. To ascertain in which zone a postoffice is located from the office of mailing, a parcel post guide, costing 55 cents, and map, costing 20 cents, are jointly used. The guide applies to all offices, but a separate map is required for each unit. A zone

key is furnished with the guide for use in the units of area in which some of the largest post-offices are located, and makes the map for those units unnecessary. The guide and maps may be purchased by sending a money order to the third assistant postmaster general, Washington, D. C. Stamps are not accepted.

Insurance of Fourth-Class Mail.

Fees and conditions—Fourth-class or domestic parcel post mail (but no other) may not be registered, but may be insured against loss in an amount equivalent to its actual value, but not to exceed \$5 in any one case, on payment of a fee of 3 cents; not to exceed \$25 on payment of a fee of 5 cents; not to exceed \$50 on payment of a fee of 10 cents, or not to exceed \$100 on payment of a fee of 25 cents, in addition to the postage, both to be prepaid by stamps affixed.

Collect-on-Delivery Service.

Conditions and fee—Parcels of fourth-class or parcel post matter (but no other) may be sent C. O. D. from one domestic money order post-office to another, including those in the Canal Zone, on payment of a fee of 10 cents in addition to the postage, both to be prepaid with stamps affixed. The amount to be collected and remitted to the sender must not exceed \$100. The remittance is made by postoffice money order, the fee therefor being included in the amount collected from the addressee. A C. O. D. tag furnished by the postmaster must be filled in by the sender and attached to the parcel. The C. O. D. fee also covers insurance against loss up to \$50.

Postal Cards.

Postal cards are furnished at the postage value represented by the stamp impressed thereon; single postal cards for domestic and foreign correspondence at 2 cents and 3 cents each, respectively, and reply (double) postal cards at 3 cents and 5 cents each, respectively.

Special Delivery Service.

Special delivery service is the prompt delivery of mail by messenger during prescribed hours to persons who reside within the carrier limits of city delivery offices, to patrons of rural service who reside more than one mile from post-offices but within one-half mile of rural routes, and to residents within one mile of any post-office.

This service is obtained by placing on any letter or article of mail a special delivery stamp or 10 cents' worth of ordinary stamps in addition to the lawful postage. When ordinary stamps are used the words "Special Delivery" must be placed on the envelope or wrapper, directly under, but never on the stamps; otherwise the letter or article will not be accorded special delivery service.

Registry System.

Any matter, properly addressed and bearing the name and address of the sender, admissible to the domestic mails (except fourth-class mail, which may be insured), or to the postal union mails (except foreign "parcel post" packages for Barbados, Curacao, Dutch Guiana, France, Great Britain, Guadeloupe, Martinique, the Netherlands and Uruguay), may be registered. Foreign "parcel post" mail must be taken to the postoffice to be registered, but other mail may be registered at any postoffice or postoffice station by rural carriers, and, when sealed and not cumbersome, by city carriers in residential districts.

The registry fee for each separate article, foreign or domestic, is 10 cents in addition to the postage, both to be fully prepaid.

Indemnity for lost registered mail will be paid as follows:

Domestic mail, first class (sealed), up to \$50, actual value; third class (unsealed), up to \$25, actual value.

Foreign mail, amount claimed within limit of 50 francs (\$9.65), for total loss (not partial loss or rifling) of a registered article exchanged between the United States and a postal union country, except foreign parcel post matter, and losses beyond control ("force majeure").

Application for a money order must be made on a form furnished for that purpose and be presented at the money order window of the postoffice or one of its stations. Money orders are issued for any desired amount from 1 cent

to \$100, and when a larger sum than \$100 is to be sent any number of additional orders may be obtained. Applications may be made through rural carriers, who will furnish the necessary forms and give receipts for the amounts.

International money orders, payable in almost any part of the world, may be obtained at all of the larger postoffices and at many of the smaller ones.

Fees for money orders payable in the United States (which includes Hawaii, Porto Rico and the Virgin islands) and its possessions, comprising the Canal Zone, Guam, the Philippines and Tutuila, Samoa; also for orders payable in Bermuda, British Guiana, British Honduras, Canada, Cuba, Mexico, Newfoundland, at the United States postal agency at Shanghai (China), in the Bahama islands and in certain other islands in the West Indies:

For orders from \$0.01 to \$2.50.....	3 cents
For orders from 2.51 to 5.00.....	5 cents
For orders from 5.01 to 10.00.....	8 cents
For orders from 10.01 to 20.00.....	10 cents
For orders from 20.01 to 30.00.....	12 cents
For orders from 30.01 to 40.00.....	15 cents
For orders from 40.01 to 50.00.....	18 cents
For orders from 50.01 to 60.00.....	20 cents
For orders from 60.01 to 75.00.....	25 cents
For orders from 75.01 to 100.00.....	30 cents

The fees for foreign money orders payable in any country on which a money order may be drawn, other than those named above, may be ascertained upon inquiry at the postoffice.

FOREIGN MAIL MATTER.

NOTES ON NATIONAL MONUMENTS.

Bandelier—Prehistoric aboriginal ruins in Sandoe and Santa Fe counties, New Mexico, with cliff dwellings, ceremonial caves and other relics of a vanished people.

Big Hole battle field—Scene of fight at Big Hole pass on Big Hole or Wisdom river, Aug. 9, 1877, between Nez Perce Indians under Chief Joseph and a small force of soldiers commanded by Col. John Gibbon; in Silver Bow county, Montana; reached from Melrose.

Cabrillo statue—At Point Loma, Cal.; land first sighted by Juan Rodriguez Cabrillo, discoverer of California, when he approached San Diego bay, Sept. 23, 1542; site of about 1½ acres set aside for heroic statue of Cabrillo.

Capulin mountain—Striking example of recent extinct volcanoes in Union county, New Mexico, near town of Des Moines.

Chaco canyon—Located in San Juan and McKinley counties, New Mexico; contains extensive prehistoric communal or pueblo ruins.

Cinder cone—An elevation in Lassen county in northern California; is of importance as illustrating volcanic activity in the vicinity 200 years ago.

Colorado—Extraordinary examples of erosion in Mesa county, western Colorado; reached from Grand Junction.

Devil postpile—Natural formations, including Rainbow waterfalls, within the Sierra national forest in California; area set aside is on middle fork of San Joaquin river.

Devil's tower—A lofty and isolated rock in Crook county, Wyoming; is an extraordinary example of the effect of erosion in the higher mountains.

Dinosaur—Section in eastern Utah containing an extraordinary deposit of dinosaurian and other gigantic reptilian remains of the Jurassic period, which are of great scientific interest and value.

El Morro—An elevation near Wingate station on the Santa Fe railroad in New Mexico; contains prehistoric ruins and interesting rock inscriptions.

Gila cliff dwellings—In the Mogollon mountains, New Mexico; known also as the Gila Hot Springs cliff houses; are among the best preserved remains of the cliff dwellers of the southwest.

Gran Quivira—Ruined town not far from Manzano in the central part of New Mexico; remains of large cathedral and chapel and of many houses thought to date from prehistoric times.

Grand canyon—In northwestern Arizona; greatly eroded canyon within the United States.

Jewel cave—A natural formation of scientific interest within the Black Hills national forest in Custer county, South Dakota.

Lassen peak—In natural forest of same name in Shasta county, northern California; marks the southern terminus of the long line of extinct volcanoes in the Cascade range, from which one of the greatest volcanic fields in the world extends.

Lewis and Clark cavern—An extraordinary limestone cavern near Limespur, Jefferson county, Montana.

Montezuma castle—Large prehistoric ruin or cliff dwelling on Beaver creek, Arizona.

Mount Olympus—Mountain in the state of Washington; has extensive glaciers and on its slopes are the breeding grounds of the Olympic elk.

Muir woods—In Marin county, California; an extensive growth of redwood trees of great age and size; land presented to the government by William Kent, formerly of Chicago.

Mukuntuweap—Canyon in southwestern Utah through which flows the north fork of the Rio Virgin or Zion river; an extraordinary example of canyon erosion.

Natural bridges—Rock formations in southeastern Utah extending over streams or chasms; have loftier heights and greater spans than any other similar formations known; reserved as extraordinary examples of stream erosion.

Navajo—Within the Navajo Indian reservation in Arizona; includes a number of prehistoric cliff dwellings and pueblo ruins new to science.

Oregon caves—Within the Siskiyou national forest in Oregon; caves are of natural formation and of unusual scientific interest and importance.

Petrified forest—Deposits of fossilized or mineralized wood in Gila and Apache counties, Arizona.

Pinnacles—A series of natural formations of rock with a number of caves underlying them; located within Pinnacles national forest in California.

Rainbow bridge—An extraordinary natural bridge in southeastern Utah, having an arch which in form and appearance is much like a rainbow; is 300 feet high and 278 feet span; of scientific interest as an example of eccentric stream erosion.

Shoshone cavern—A cave in Big Horn county, Wyoming, of unknown extent, but of many windings and ramifications and containing vaulted chambers of large size, magnificently decorated with sparkling crystals and beautiful stalactites, and containing pits of unknown depth.

Sleu de Monts—Lands on Mount Desert island, Maine, which island was discovered by Samuel de Champlain and upon which he first landed when, acting under the authority of Sleu de Monts, he explored and described the present New England coast; the geology, fauna and flora on the island are of great scientific interest.

Sitka—Tract of about fifty-seven acres within public park near Sitka, Alaska; battle ground of Russian conquest of Alaska in 1804; site of former village of Kiki-Siti tribe, the most warlike of Alaska Indians; contains numerous totem poles constructed by the Indians, recording the genealogical history of their several clans.

Tonto—Comprises two prehistoric ruins of ancient cliff dwellings in Gila county, Arizona.

Tumacacori—Ruins of an ancient Spanish mission of brick, cement and mortar in Santa Cruz county, Arizona.

Verendrye—A high and imposing butte, locally known as Crowhigh mountain, on the Missouri river, near Spanish, N. D.; used as observation point by Verendrye, an explorer, between 1738 and 1742; place of historic interest.

Walnut canyon—Canyon eight miles southeast of Flagstaff; contains ruins of cliff dwellings of great ethnographic, scientific and educational interest.

Wheeler—Volcanic formations illustrating erratic erosion; in Rio Grande and Cochitopa national forests in southwestern Colorado.

The national holidays, such as July 4, New Year's, etc., are such by general custom and observance and not because of congressional legislation. Congress has passed no laws establishing holidays for the whole country. It has made Labor day a holiday in the District of Columbia, but the law is of no effect elsewhere. It has also designated the second Sunday in May as Mothers' day. President Wilson issued a proclamation May 30, 1916, requesting that June 14, the anniversary of the day on which the national emblem was adopted by congress, be observed as Flag day throughout the nation.

THE SHERMAN ANTITRUST LAW.

Passed by the 51st congress and approved July 2, 1890.

Section 1. Every contract, combination in the form of trust or otherwise or conspiracy in restraint of trade or commerce among the several states or with foreign nations is hereby declared to be illegal. Every person who shall make any such contract or engage in any such combination or conspiracy shall be deemed guilty of a misdemeanor, and on conviction thereof shall be punished by fine not exceeding \$5,000 or by imprisonment not exceeding one year, or by both said punishments, in the discretion of the court.

Sec. 2. Every person who shall monopolize or attempt to monopolize or combine or conspire with any person or persons to monopolize any part of the trade or commerce among the several states or with foreign nations shall be deemed guilty of a misdemeanor, and on conviction thereof shall be punished by fine not exceeding \$5,000 or by imprisonment not exceeding one year, or by both said punishments, in the discretion of the court.

Sec. 3. Every contract, combination in form of trust or otherwise or conspiracy in restraint of trade or commerce in any territory of the United States or of the District of Columbia, or in restraint of trade or commerce between any such territory and another, or between any such territory or territories and any state or states or the District of Columbia or with foreign nations, or between the District of Columbia and any state or states or foreign nations, is hereby declared illegal. Every person who shall make any such contract or engage in any such combination or conspiracy shall be deemed guilty of a misdemeanor, and on conviction thereof shall be punished by fine not exceeding \$5,000 or by imprisonment not exceeding one year, or by both said punishments, in the discretion of the court.

Sec. 4. The several Circuit courts of the United States are hereby invested with jurisdiction to prevent or restrain violations of this act; and it shall be the duty of the several district attorneys of the United States, in their respective districts, under the direction of the attorney-general, to institute proceedings in equity to prevent and restrain such violations. Such proceedings may be by way of petition

setting forth the case and praying that such violation shall be enjoined or otherwise prohibited. When the parties complained of shall have been duly notified of such petition the court shall proceed as soon as may be to the hearing and determination of the case; and pending such petition and before final decree the court may at any time make such temporary restraining order or prohibition as shall be deemed just in the premises.

Sec. 5. Whenever it shall appear to the court before which any proceeding under section 4 of this act may be pending that the ends of justice require that other parties should be brought before the court, the court may cause them to be summoned, whether they reside in the district in which the court is held or not; and subpoenas to that end may be served in any district by the marshal thereof.

Sec. 6. Any property owned under any contract or by any combination or pursuant to any conspiracy (and being the subject thereof) mentioned in section 1 of this act and being in the course of transportation from one state to another or to a foreign country shall be forfeited to the United States and may be seized and condemned by like proceedings as those provided by law for the forfeiture, seizure and condemnation of property imported into the United States contrary to law.

Sec. 7. Any person who shall be injured in his business or property by any other person or corporation by reason of anything forbidden or declared unlawful by this act may sue therefor in any Circuit court of the United States in the district in which the defendant resides or is found, without respect to the amount in controversy, and shall recover threefold the damages by him sustained and the cost of suit, including a reasonable attorney's fee.

Sec. 8. That the word "person" or "persons" wherever used in this act be deemed to include corporations and associations existing under or authorized by the laws of either the United States, the laws of any of the territories, the laws of any state or the laws of any foreign country.

THE MONROE AND DRAGO DOCTRINES.

The "Monroe doctrine" was enunciated by President Monroe in his message to congress Dec. 2, 1823. Referring to steps taken to arrange the respective rights of Russia, Great Britain and the United States on the northwest coast of this continent, the president went on to say:

"In the discussions to which this interest has given rise, and in the arrangements by which they may terminate, the occasion has been deemed proper for asserting, as a principle in which the rights and interests of the United States are involved, that the American continents, by the free and independent condition which they have assumed and maintain, are henceforth not to be considered as subjects for future colonization by any European power."

"* * * We owe it, therefore, to candor and to the amicable relations existing between the United States and those powers to declare that we should consider any attempt on their part to extend their system to any portion of this hemisphere as dangerous to our peace and safety. With the existing colonies or dependencies of any European power we have not interfered and shall not interfere. But with the governments who have declared their independence and maintain it, and whose independence we have, on great consideration and on just principles, acknowledged, we could not view any interposition for the purpose of oppressing them or controlling in any other manner their destiny by any European power in any other light than as the manifestation of an unfriendly disposition toward the United States."

DRAGO DOCTRINE.

When in the winter of 1902-03 Germany, Britain and Italy blockaded the ports of Venezuela in attempt to make the latter country settle up its debts Dr. L. F. Drago, a noted jurist of Argentina, maintained that force cannot be used by one power to collect money owing to its citizens by another power. Prominence was given to the contention by the fact that it was officially upheld by Argentina and favored by other South American republics. The principle embodied has become generally known as the "Drago doctrine."

LODGE RESOLUTION.

In connection with the reported attempt of Japan to obtain land for the establishment of a naval base in Magdalena Bay, on the western coast of Mexico, the senate of the United States adopted the following resolution Aug. 2, 1912:

"Resolved, That when any harbor or other place in the American continents is so situated that the occupation thereof for naval or military purposes might threaten the communications or the safety of the United States, the government of the United States could not see without grave concern the possession of such harbor or other place by any corporation or association which has such relation to another government, not American, as to give that government practical power of control for national purposes."

PRODUCTION OF SALT.

Estimates of the production of salt in 1917 by states, in short tons, are as follows:

California.....	178,000
Kansas.....	726,000
Michigan.....	2,294,000
New York.....	2,175,000
Ohio.....	954,000
Texas.....	86,700
Utah.....	65,000
West Virginia.....	20,000
Hawaii, Idaho, Louisiana, Nevada, New Mexico, Oklahoma, Porto Rico and Virginia.....	447,300
Total.....	6,946,000

In this table rock salt is represented by 1,610,000 tons, an increase of 17 per cent over 1916; evaporated salt by 2,452,000 tons, practically the same as in the previous year; and salt in brine by 2,884,000 tons, an increase of 13 per cent. The large increase in the production of rock salt and brine was due mostly to an increase in the demand for salt required in the manufacture of chemicals.

*Marriages may be annulled for causes making them void from the beginning.

†No divorce allowed, but marriages may be annulled.

NOTE—The above table presents only the principal causes for divorce in the various states. The words "Yes" and "No" are not always to be taken without qualification, but as being applicable under certain conditions. The word "Void" may indicate that a marriage may be

absolutely void for the cause named, that it may be voidable or that it may be annulled by court proceedings. Bigamy, it may be added, is a cause for divorce or annulment of marriage in practically all of the states.

UNITED STATES PASSPORT REGULATIONS.

Passports are issued to citizens of the United States upon application to the state department in Washington. The application must be accompanied by an affidavit, attested by a notary public or other officer empowered to administer oaths, stating that the applicant is a citizen and giving the place of birth and age, and it must be accompanied by the certificate of one other citizen to whom he is personally known that the declaration made by the applicant is true. The application must also be accompanied by a description of the person, particularly as to age, height, complexion, forehead, eyes, nose, mouth, chin, hair and face. Blank forms are furnished by the state department upon application. The fee for each passport is \$1. Citizens traveling abroad may also in some cases obtain passports by applying to United States ambassadors and

ministers. Where any person has made a declaration of intention to become a citizen of the United States and has resided in the United States for three years a passport valid for six months may be issued to him.

Owing to the war the state department was obliged in June, 1917, and September, 1918, to make stricter regulations governing the issue of passports. Applicants for passports were required to send in their applications so long in advance as to permit them to be held in the department one week, if deemed necessary, for examination. It was announced that during the continuation of the war passports would not be issued to citizens unless a reasonable necessity for such departure can be shown. No alien shall receive permission to enter the United States except for adequate reasons.

MILITARY USES OF CONCRETE.

Concrete, because of its great resistance to fire and to the shock of explosions, is adaptable to a wide variety of uses, according to the United States geological survey. It is cheap, easily and quickly handled, sanitary and durable and its characteristics render it of great military importance. Among the military uses to which concrete is put are the construction of armories, barracks, roads,

bridges, coast and interior fortifications, gun emplacements, trench linings, bomb-proof shelters, magazines for explosives, tunnels, retaining walls, sea walls, wharves, drydocks, water reservoirs, aqueducts, sewers, sewage treatment works, incinerators, stables, floors, roofs, munition factory buildings, warehouses, fuel-oil tanks, barges, steamships and even in the interior of battle ships.

PRODUCTION OF QUICKSILVER.

The domestic output of quicksilver in 1917, according to the United States geological survey, was 36,351 flasks of 75 pounds each, valued at the average quoted market price at San Francisco (\$106.12 per flask) at about \$3,857,000. The output was therefore the greatest in quantity since 1883 and the greatest in value since 1875. The production in

1916 was 29,932 flasks, so that the increase in 1917 was 6,419 flasks.

The output by states was: California, 24,251 flasks; Nevada, 916; Arizona and Oregon, 422; Texas, 10,759; other sources, 3.

The high prices for quicksilver in 1917 were due chiefly to greatly increased war demands, the metal being used for making fulminate for explosives.

WORLD'S POTATO CROP.

[From department of agriculture report.]

During the five-year period 1909-1913 the world's potato crop averaged about 5,471,000,000 bushels annually, ranging between 4,842,000,000 bushels in 1911 and 5,873,000,000 bushels in 1912. Of the average yearly production during this period, a total of 2,692,000,000 bushels, or 49 per cent, was furnished by the ten countries named below. In 1917, these ten countries produced 2,734,156,000 bushels of potatoes, or 50 per cent of the average annual production during 1909-1913. Detailed figures for these countries for 1917, with comparative figures for 1916, are shown in the following table:

BOMB EXPLOSION IN FEDERAL BUILDING, CHICAGO.

Four persons were killed and thirty or more injured on the afternoon of Sept. 4, 1918, by the explosion of a bomb in the Adams street entrance of the federal building in Chicago. Those killed were Edwin R. Kolkow, an old postoffice employee; William H. Wheeler, a mail carrier; Joseph B. Ladd, a bluejacket acting as messenger for the navy intelligence bureau, and Miss Ella Miehke, who was entering the building to mail a letter. The explosion caused considerable damage to that part of the structure closest to where the bomb had been placed, and all

the window glass in the vicinity was shattered, but the main part of the building remained intact and business continued as usual.

On the theory that the bomb had been placed with the intention of blowing up the federal court in which the Industrial Workers of the World had been convicted and sentenced a short time before, the police and government authorities arrested nine men connected with the organization named, including John W. Wilson, secretary to William D. Haywood.

Total

†Includes motor trucks and commercial vehicles. †Total gross motor vehicle registration and license revenues.

There is very little definite information available as to the number of motor cars in countries other than the United States. According to the best available data and estimate, however, about 85 per cent of all the motor cars at present in existence are in the United States. About 200,000 cars are in Canada. Probably 50,000 cars are found in all the rest of North and South America. The present number of cars in Europe is not known with any degree of accuracy. Estimates based on data available for 1914 would place the total number below 500,000, or about the same as the number of motor cars existing in New York and Connecticut. Thus, according to the best available data, nearly 90 per cent of all existing motor cars are in North and South America and about 10 per cent in all the rest of the world.

In 1917 the total gross motor-vehicle revenue of \$37,501,233 amounted to about 12 per cent of the total rural road and bridge expenditures, and of this nearly 93 per cent was applied directly to the improvement or maintenance of the public roads in forty-seven states. The 7 per cent, or \$2,812,633, not applied to road work was expended very largely for plates and in carrying out other administrative provisions of the motor-vehicle registration laws.

SUEZ CANAL TRAFFIC.

The total receipts of transit tonnage tolls of the Suez canal in 1913 amounted to \$23,443.

643, a decrease of \$1,886,189 as compared with 1912. The decrease was owing to the reduction of the toll rate which went into effect Jan. 1, 1913. The total toll-paying tonnage for 1913 was 10,165,000 tons, or 456,000 tons in excess of that for 1912.

In 1913 the total number of vessels passing through the Suez canal was 5,065 as against 5,373 in 1912. The average time of vessels going through the canal in 1913 was 16 hours 19 minutes. Freight traffic in 1914, 1915 and 1916 was greatly diminished by the war in Europe, but no detailed statistics were published.

CENSUS OF 1910 AND 1900.

The thirteenth census of the United States was taken by the bureau of the census as of April 15, 1910. It included the continental United States, the territories of Alaska and Hawaii and Porto Rico; also persons in the military and naval service who were stationed abroad. The population according to this division, compared with that in 1900, was:

	1910.	1900.
Alaska.....	64,356	63,592
Hawaii.....	191,909	154,001

	1910.	1900.
Porto Rico.....	1,118,012	*953,243
Soldiers and sailors abroad.....	55,608	91,219

Noncontiguous territory.....	1,429,885	1,262,055
Continental United States.....	91,972,266	75,994,575

United States (area of enumeration).....93,402,151 †77,256,630

*Census of 1899. †Includes 953,243 persons enumerated in Porto Rico in 1899.

CENTER OF POPULATION AND MEDIAN LINES.

The center of population, according to the bureau of the census, may be said to represent the center of the gravity of the population. If the surface of the United States be considered as a rigid plane without weight, capable of sustaining the population distributed thereon, individuals being assumed to be of equal weight, and each, therefore, to exert a pressure on any supporting pivotal point directly proportional to his

distance from the point, the pivotal point on which the plane balances would, of course, be its center of gravity, and this is the point referred to by the term "center of population" as used by the census bureau in its reports.

The median point, which may be described as the numerical center of population, is in no sense a center of gravity. In determining the median point distance is not taken into account,

and the location of the units of population is considered only in relation to the intersecting median lines—as being north or south of the median parallel and east and west of the meridian.

The position of the center of population and its movement during each decade since 1790 are shown in the following table:

Census	North latitude.		West longitude.		Approximate location by important towns.	Movement in miles during preceding decade.			
	D.	M.	D.	M.		Direct line.	West-ward.	North-South.	South-ward.

MEDIAN LINES.

In connection with the definition of the median point another method of presenting facts with regard to the geographical distribution of the population has been noted, involving the location of median lines. A parallel of latitude is determined which evenly divides the population so that the population north of that parallel is the same as that south. Similarly, a meridian of longitude is determined which divides the population evenly as between east and west. In calculating these median lines it is necessary, in the case of the square degrees of latitude and longitude which are traversed by the lines themselves, to assume that the population is evenly distributed through these square degrees or to make an estimated adjustment where this is obviously not the case.

The eastern terminus of the median parallel, according to the census of 1910, is on the New Jersey coast near Seagirt. In its course west this line passes through central New Jersey, leaving the state near Burlington and entering Pennsylvania a few miles north of Philadelphia, thence passing through Norristown and continu-

ing through southern Pennsylvania and across the northern extremity of West Virginia, leaving the latter state at a point a few miles north of Wheeling. It nearly bisects Ohio, Indiana and Illinois, crossing about ten miles north of Columbus, O.; twenty-five miles north of Indianapolis, Ind., and about twenty miles north of Springfield, Ill. Through Missouri it runs about thirty miles south of the Iowa and Missouri line, thence passing through Nebraska about ten miles north of its southern boundary, and across the northern part of Colorado, passing about five miles north of Boulder City. Its location in Utah is about forty-five miles south of Salt Lake City. There are no large towns near its course across the northern part of Nevada and California. The western terminus of the median parallel is on the Pacific coast, in Humboldt county, California, about five miles north of Point Delgada and twenty miles south of Cape Mendocino, the point of continental United States extending farthest west.

The median meridian starts at Whitefish point, on the northern peninsula of Michigan, near the eastern end of Lake Superior, thence passing

south about twenty-five miles west of Lansing and through Indiana about ten miles west of the Indiana-Ohio boundary and twenty-five miles west of Cincinnati. South of the Ohio river it bisects Kentucky, crosses eastern Tennessee and leaves that state twenty miles east of Chattanooga. Through Georgia it passes close to the Georgia-Alabama line, about two miles west of Columbus, Ga., leaving the state near the intersection of the Alabama, Georgia and Florida boundary lines. It then crosses the northwestern part of Florida and terminates in the Gulf of Mexico at the city of Apalachicola. The following table shows the movement of the median lines from 1880 to 1910, inclusive:

MEDIAN POINT.

The exact location of the median point is indicated by the median lines already shown; in the following table its approximate location with reference to certain towns is described:

Approximate Location by Important Towns.

1880.....	16 miles nearly due west of Springfield, O.
1890.....	5 miles southwest of Greenville, O.
1900.....	In Spartanburg, Ind.
1910.....	3 miles south of Winchester, Ind.

MOTHER TONGUE OF FOREIGN WHITE STOCK (1910).

In the following tables, prepared by the federal census bureau, the foreign white stock referred to is the aggregate white population of the United States which is foreign either by birth or by parentage. It embraces all foreign born whites and all native whites having one or both parents foreign born. It must be remembered that the foreign stock as here defined only includes the first and second generations—immigrants and native children of immigrants—and does not include the grandchildren or great-grandchildren of immigrants. In other words, the figures do not include the exact relative importance of the several ethnic stocks in the total population.

The eight major mother-tongue stocks in the United States, arranged in the order of their importance, are shown in the following table:

URBAN AND RURAL POPULATION.

The census bureau classifies as urban population that residing in cities and other incorporated places of 2,500 inhabitants or more. The proportion of the total population of continental United States living in urban and rural territory at the censuses of 1910 and 1900 was as follows:

	Population.	P. ct.	Population.	P. ct.
Urban	42,623,383	46.3	30,797,135	40.5
Rural	48,348,883	53.7	45,197,399	59.5

Total 91,972,266 100.0 75,994,575 100.0
In 1890 the per cent of urban population was 36.1 and of the rural 63.9; in 1880 the urban was 29.5 and the rural 70.5.

By geographic divisions the per cent of urban and rural population in 1910 was as follows:

Division.	Total.	Urban.	Rural.

DWELLINGS AND FAMILIES IN THE UNITED STATES (1910).

In census usage a "dwelling" is any building in which one or more persons reside. A mere cabin, or room in a warehouse, occupied by a single person, is a census dwelling, while, on the other hand, an apartment house containing many families constitutes only one dwelling. Only occupied dwellings are included in the following tables. The term "family" as used in census reports means a household or group of persons, whether related by blood or not, who share a common abode, usually also sharing the same table. If one person lives alone he constitutes a family, while, on the other hand, those who dwell in a hotel or institution in which many people live are also treated as forming a single family. There is, however, no considerable difference between the average size of all families under the census usage and the average size of what are commonly termed families or households in popular speech. In 1900 the difference for the United States as a whole was only 0.1 per cent.

At each census from 1850 to 1910 a decrease was shown in the average number of persons per dwelling and the average number per family. The decrease in the average number per dwelling has been due to the decrease in the average per family, the influence of which has been partly offset by the increased construction of tenements and other dwellings containing more than one family.

In 1910 there were 7,254,242 dwellings and 9,499,765 families in urban communities, while there were 10,551,603 dwellings and 10,755,790 families in rural communities. For urban communities the number of persons to a dwelling averaged 5.9 and to a family 4.5; for rural communities the number of persons to a dwelling averaged 4.7 and to a family 4.6.

PETROLEUM PRODUCTION IN 1917.

The quantity of petroleum produced and marketed in the oil fields of the United States in 1917 reached the total of 341,800,000 barrels, a quantity nearly 14 per cent greater than the former record output of 300,767,158 barrels established in 1916. The production was apportioned among the major fields as follows:

Field.	1916 barrels.	1917 barrels.
Appalachian	23,009,455	24,600,000
Lima-Indiana	3,905,003	3,500,000
Illinois	17,714,235	15,900,000
Oklahoma-Kansas	115,809,792	147,000,000
Central & No. Texas	9,303,005	11,000,000
North Louisiana	11,821,642	8,700,000
Gulf coast	21,768,096	24,900,000
Rocky mountain	6,476,289	9,200,000
California	90,951,936	97,000,000
Other fields	7,705	

Total300,767,158 341,800,000

The salient features of the industry in 1917 were the record levels reached and firmly maintained by prices of crude oil at the wells and the enormous demand, which absorbed not only the current output of the wells but necessitated a net draft of about 21,000,000 barrels on oil in storage, principally in California and Illinois. The surface reserve of crude oil in the United States at the end of 1917 was estimated at 153,000,000 barrels.

The principal sources of new production in 1917 were Estill county, Kentucky, Butler county, Kansas, Carter county, Oklahoma, Wichita and Harries counties, Texas, Converse county, Wyoming, and Los Angeles county, California.

ILLITERACY IN THE UNITED STATES (1910).

The following statistics, except where otherwise specified, relate only to persons 10 years of age or over. The bureau of the census classifies as illiterate all persons 10 years of age or over who are unable to write, regardless of their ability to read.

PERCENTAGE OF ILLITERACY.

The following table shows the total population 10 years of age and over and the number and percentage of illiterate by color or race, nativity and parentage:

BANKING POWER OF THE UNITED STATES.

The banking power of the United States in June, 1917, as represented by capital, surplus and other profits, circulation and deposits of national and other reporting banks, together with the estimated amount of funds of this character in nonreporting banks, as well as the paid-in capital, government and reserve deposits, and federal reserve notes in circulation as shown by the statement of the federal reserve banks as of June 22, 1917, was \$34,473,100,000.

The banking power of the United States alone to-day is more than double the banking power of the world as it stood in 1890 when Mulhall's estimate placed the world's banking power at \$15,985,000,000, and the banking power of the United States is now more than six times greater than Mulhall's estimate of our banking power in 1890, which was given by him at \$5,150,000,000.

	*Total (1917).
National banks	\$12,624,300,000
State (etc.) banks	19,459,100,000
Nonreporting banks	530,000,000
Federal reserve banks	1,859,700,000

34,473,100,000

*Capital paid in, surplus and profits, deposits and federal notes in circulation.

ARCTIC AND ANTARCTIC EXPLORATION.

STEFANSSON EXPEDITION.

Vilhjalmr Stefansson, the arctic explorer, passed the winter of 1917-1918 on Herschel island after his boat, the Polar Star, grounded at Barter island in the fall of 1917. He passed through a serious illness, which made a continuance of his work inadvisable, and he returned to Vancouver, B. C., Sept. 16, 1918. No arctic continent was discovered, he said, but a number of islands were found, mapped and explored.

AMUNDSEN EXPEDITION.

Capt. Roald Amundsen started on another arctic exploration trip in June, 1918, his ship, the Maud, leaving Christiania, Norway, on the 28th of that month for Tromsø, where the captain joined it. His vessel carried provisions for five years. From Tromsø the plan was to go to Nova Zembla and drift thence with the ice across the north polar basin.

MINES AND QUARRIES IN THE UNITED STATES.

[From reports of census bureau, 1912 and 1913.]

In 1909 in the United States, exclusive of Alaska, Hawaii, Porto Rico and other outlying noncontiguous territory, 23,682 operators conducted 27,240 mines and quarries and 166,448 petroleum and natural gas wells. Of the operators 3,749 were engaged solely in development work, upon which, in 1909, the sum of \$31,548,736 was expended. In Alaska in 1909 there were 673 operators, who employed 8,025 persons, in the mining industry. The total expenses of these operators amounted to \$13,220,200, while the capital invested was reported as \$47,749,184. The total value of products was \$16,933,427, of which amount \$16,327,752 consisted of gold and silver. In Hawaii and Porto Rico the total value of product for the eighteen operators reported was only \$26,414.

The total number of persons engaged in connection with producing mines, quarries and wells, as reported on Dec. 15, 1909, or nearest representative day, was 1,139,332, of whom wage earners numbered 1,065,283, proprietors and firm members 29,922 and salaried employees 44,127. In mines, quarries and wells for which development work only was carried on there was a total of 27,616 persons, of whom 21,499 were wage earners. Of the total number of persons, 1,166,948, employed in productive and nonproductive mines, 1,158,775 were men 16 years of age and over, and 8,173 were boys under 16 years of age. Distributed by sex, 1,162,840 were male and 4,108 female, the latter being employed in supervisory and clerical capacities.

The total capital invested in all mining enterprises on Dec. 31, 1909, as reported, was \$3,662,527,064, of which \$3,380,525,841 was invested in productive enterprises and \$282,001,223 in those in which development work only was carried on.

FRIENDS FOR A CENTURY.

ARGENTINA AND THE UNITED STATES.

On Feb. 28, 1918, the United States and the Argentine republic exchanged greetings upon the completion of a century of unbroken friendship between the two nations. On the date named F. J. Stimson, American ambassador at Buenos Aires, sent the following note to the Argentine minister for foreign affairs:

"On the 28th of February, 1818, there arrived in the already free city of Buenos Aires the first mission from the United States of America, headed by Caesar Rodney, our first representative in the United Provinces of the River Plate, and consisting of Messrs. Graham and Bland, which mission was received with great honor by his excellency the Supreme Director Don Juan Martin de Pueyrredon, your excellency's illustrious ancestor. As a pleasing remembrance of so auspicious an event, the secretary of state of my country, Mr. Lansing, instructs me to present to your excellency his personal greetings and to express to his excellency the president, in the name of the United States, his congratulations on the completion of an entire century of friendly relations between both countries, without the smallest shadow having darkened their sympathetic relations, which my government desires to maintain at all times."

To this the minister of foreign affairs sent the following reply:

"Mr. Ambassador: The happy inspiration of

COLUMBIA EXCURSION STEAMER DISASTER.

Eighty-seven lives were lost when the excursion steamer Columbia sank in the Illinois river at Wesley City, midway between Peoria and Pekin, Ill., at about midnight July 5-6, 1918. The boat had been engaged by the South Side Social club of Pekin for a trip to Al Fresco park on the outskirts of Peoria. About 450 members of the club and 100 excursionists picked up at Kingston Mines made the trip. On the way back from the park the boat encountered some fog and ran into the river bank near Wesley City. No severe jar was felt but a hole was stove in the hull and when the steamer backed out into the stream it filled and sank in five minutes.

Many of those on board jumped into the water, but others were caught between decks and carried down to death. It was at first thought that between 150 and 200 lives had been lost, but after a careful checking up it was officially announced that the number of victims was eighty-seven.

your illustrious secretary of state, Mr. Lansing, which was duly conveyed to me by your excellency, and which has reminded us of the beginning of diplomatic relations between the two countries, awakens in our hearts the remembrance that when our life as an independent nation was but starting, the supreme congress appointed an envoy to the United States of America, and the then supreme director (mentioned in your telegram) by letter told the president of your great country:

"When interests of one political entity are in accord with principles of justice, nothing is more easy or satisfactory than the maintenance of harmony and good faith with another closely allied power."

"Under these happy conditions we have lived for a century, and, indeed, our two nations are to-day enjoying a frank and open community of interest. We may well predict that the happy relations will continue for all time."

The president, in behalf of the people of Argentina, returns the congratulations which he has received from the United States of America, and I for my part, desire to thank the secretary of state, Mr. Lansing, and you, Mr. Ambassador, for the personal reference with which you have honored me.

"Accept, excellency, the assurances of my distinguished consideration."

"H. PUEYRREDON."

HAGENBECK-WALLACE CIRCUS TRAIN WRECK.

While on its way from Michigan City, Ind., to Hammond, Ind., the second section of a train on the Michigan Central railroad, carrying the equipment and employees of the Hagenbeck-Wallace circus, was forced by a hot box to pull into a sidetrack at Ivanhoe switch tower half way between Gary and Hammond at 4 o'clock in the morning of June 22, 1918. This section consisted in part of four remodeled Pullmans occupied by employees of the circus. It had not entirely left the main track when a

westbound train of empty troop cars crashed into it, smashing the four Pullmans into bits and killing or injuring nearly all the sleeping passengers. Sixty-eight persons lost their lives and 127 were injured. After a careful investigation the bureau of safety in Washington placed the blame for the wreck on Al Sargent, engineer on the locomotive of the troop train, who was charged with being asleep at the throttle when the accident occurred.

PRODUCTION OF FUEL BRIQUETS.

The output of fuel briquets in the United States in 1917 was 406,856 net tons, valued at \$2,233,888, an increase over 1916 of 111,701 tons, or 38 per cent. in quantity, and of \$788,226, or 55 per cent. in value, again breaking the record of the previous year.

According to C. E. Leshner of the United States geological survey, the demand for fuel

in 1917 was so strong throughout the whole year that there was no lack of market to limit the production of the briquet manufacturers. Despite the increased cost of binders and of manufacturing, most of the plants operated to full capacity and reported a prosperous year.

FUNCTIONS AND DUTIES.

Under an act of congress approved Jan. 28, 1915, it was provided that in lieu of the then existing revenue cutter service and life saving service there should be established an organization to be known as the coast guard which was to constitute a part of the military forces of the United States, operating under the secretary of the navy in time of war and under the treasury department in time of peace. Since April 6, 1917, the coast guard has been under the navy department. The revenue cutter service had existed since 1790, while the life saving service had its beginning in 1848, although it was not made into a separate establishment until June 18, 1878. The consolidation of the two services was completed in 1915. The coast guard being a part of the military forces of the government, the military system of the former revenue cutter service was utilized as a basis for the organization of the coast guard. The transfer of the personnel of the former life saving service to the coast guard was accomplished by issuing appointments as commissioned officers, warrant officers and petty officers to the district superintendents, keepers and No. 1 surfmen, respectively, and regularly enlisting the surfmen. The total authorized complement of warrant officers, petty officers and men is 3,886. The pay of the commissioned personnel, except for the grade of district superintendent, corresponds with the pay and allowances of like rank in the army. The pay of warrant officers and enlisted men remains the same as before the consolidation of the services. Warrant officers are appointed by the secretary of the treasury and hold their appointments during good behavior. Petty officers and other men are enlisted for periods of one year. Warrant and petty officers receive 10 per cent increase for every five years of service, not to exceed 40 per cent in all. Enlisted men receive an increase for each three years of continuous service up to and including fifteen years.

The authorized commissioned personnel of the coast guard is 270, divided into the following grades: One captain commandant, 6

senior captains, 31 captains, 37 first lieutenants, 94 second and third lieutenants, 1 engineer in chief, 8 captains of engineers, 28 first lieutenants and 51 second and third lieutenants of engineers, 2 constructors with rank of first lieutenant, 1 district superintendent with relative rank of captain, 3 district superintendents with relative rank of first lieutenant, 4 district superintendents with relative rank of second lieutenant, and 5 district superintendents with relative rank of third lieutenant. A coast guard academy is maintained in New London, Conn. June 30, 1915, there were seven cadets of the line and six cadet engineers at the academy. The school course extends over three years and embraces instruction in professional and academic subjects. Admission is by competitive examination and candidates must be not less than 18 nor more than 24 years of age. Candidates for the engineer corps must be not less than 21 nor more than 26 years of age.

By law the officers of the revenue cutter service rank as follows:

Captain commandant, with colonel in army and captain in navy.

Senior captain and engineer in chief, with Lieutenant-colonel in army and commander in the navy.

Captain and captain of engineers, with major in army and lieutenant-commander in navy.

First lieutenant and first lieutenant of engineers, with captain in army and senior lieutenant in navy.

Second lieutenant and second lieutenant of engineers, with first lieutenant in army and junior lieutenant in navy.

Third lieutenant and third lieutenant of engineers, with second lieutenant in army and ensign in navy.

DUTIES OF COAST GUARD.

In general the duties of the coast guard may be classified as follows:

1. Rendering assistance to vessels in distress and saving life and property.
2. Destruction or removal of wrecks, derelicts and other floating dangers to navigation.
3. Extending medical aid to United States vessels engaged in deep sea fisheries.
4. Protection of the customs revenue.
5. Operating as a part of the navy in time of war or when the president shall direct.
6. Enforcement of law and regulations governing anchorage of vessels in navigable waters.
7. Enforcement of law relative to quarantine and neutrality.
8. Suppression of mutinies on merchant vessels.
9. Enforcement of navigation and other laws governing merchant vessels and motor boats.
10. Enforcement of law to provide for safety of life on navigable waters during regattas and marine parades.
11. Protection of game and the seal and other fisheries in Alaska, etc.
12. Enforcement of sponge fishing law.

In addition to the foregoing the services of the coast guard include many other things, such as warning vessels running into danger, medical and surgical aid to the sick and injured, recovery and burial of bodies cast up by the waters, extinguishing fires, maintenance of public order, acting as pilots in emergencies and furnishing transportation to other branches of the public service.

EQUIPMENT.

The equipment of the coast guard consists of twenty-four cruising cutters, eighteen harbor cutters and 279 coast stations. The stations are distributed as follows: First district (Maine and New Hampshire), 15; second district (Massachusetts), 32; third district (Rhode Island and Fishers island), 10; fourth district (Long island), 30; fifth district (New Jersey),

41: sixth district (coast between Delaware and Chesapeake bays). 19: seventh district (Virginia south of Chesapeake bay). 34: eighth district (South Carolina, Georgia and east coast of Florida). 9: ninth district (coast of United States on Gulf of Mexico). 8: tenth district (Lakes Erie and Ontario and Louisville, Ky.). 12: eleventh district (Lakes Huron and Superior). 19: twelfth district (Lake Michigan). 31: thirteenth district (California, Oregon, Washington and Nome, Alaska). 19.

DEATH OF JOHN E. REDMOND.

John E. Redmond, the Irish nationalist leader, died in London, England, March 6, 1918, from heart failure following an operation for intestinal obstruction. For more than thirty-five years he had championed the cause of home rule for Ireland and since 1891 had been the leader of the Irish party. Prior to 1900 there had been two nationalist factions, and it was due to his efforts that they were amalgamated in the year named. After that his position as nationalist leader was never seriously threatened. Redmond was elected to the house of

commons in 1881 from New Ross, Ireland, and was a member almost continuously up to the time of his death. From 1885 to 1891 he represented North Wexford, after which he was elected from Waterford. His eloquence and grasp of parliamentary procedure made him a power in the house of commons. One of his last important acts was to assent to the calling of an Irish convention. Redmond visited the United States in 1908 and 1910 and Australia in 1883. Though educated for the bar he never practiced law.

UNITED STATES CIVIL SERVICE.

Civil service act approved Jan. 16, 1883.

Officers.—Three commissioners are appointed by the president to assist him in classifying the government offices and positions, formulating rules and enforcing the law. Their office is in Washington, D. C. The chief examiner is appointed by the commissioners to secure accuracy, uniformity and justice in the proceedings of the examining boards. The secretary to the commission is appointed by the president.

General Rules.—The fundamental rules governing appointments to government positions are found in the civil service act itself. Based upon these are many other regulations formulated by the commission and promulgated by the president from time to time as new contingencies arise. The present rules were approved March 20, 1903, and went into effect April 15, 1903. In a general way they require that there must be free, open examinations of applicants for positions in the public service; that appointments shall be made from those graded highest in the examinations; that appointments to the service in Washington shall be apportioned among the states and territories according to population; that there shall be a period (six months) of probation before any absolute appointment is made; that no person in the public service is for that reason obliged to contribute to any political fund or is subject to dismissal for refusing to so contribute; that no person in the public service has any right to use his official authority or influence to coerce the political action of any person. Applicants for positions shall not be questioned as to their political or religious beliefs and no discrimination shall be exercised against or in favor of any applicant or employee on account of his religion or politics. The classified civil service shall include all officers and employees in the executive civil service of the United States except laborers and persons whose appointments are subject to confirmation by the senate.

Examinations.—These are conducted by boards of examiners chosen from among persons in government employ and are held twice a year in all the states and territories at convenient places. In Illinois, for example, they are usually held at Cairo, Chicago and Peoria. The dates are announced through the newspapers or by other means. They can always be learned by applying to the commission or to the nearest postoffice or custom house. Those who desire to take examinations are advised to write to the commission in Washington for the "Manual of Examinations," which is sent free to all applicants. It is revised semiannually to Jan. 1 and July 1. The January edition contains a schedule of the spring examinations and the July edition contains a schedule of the fall examinations. Full information is given as to the methods and rules governing examinations, manner of making applications, qualifications required, regulations for rating examination papers, certification for and chances of appointment, and as far as possible it outlines the scope of the different subjects of general and technical examinations. These are practical in character and are designed to test the relative capacity and fitness to discharge the duties to be performed. It is necessary to obtain an average percentage of 70 to be eligible for appointment, except that applicants entitled to preference because of honorable discharge from the military or naval service for disability resulting from wounds or sickness incurred in the line of duty need obtain but 65 per cent. The period of eligibility is one year.

Qualifications of Applicants.—No person will be examined who is not a citizen of the United States; who is not within the age limitations prescribed; who is physically disqualified for the service which he seeks; who has been guilty of criminal, infamous, dishonest or disgraceful conduct; who has been dismissed from the public service for delinquency and misconduct or has failed to receive absolute appointment after probation; who is addicted to the habitual use of intoxicating liquors to excess, or who has made a false statement in his application. The age limitations in the more important branches of the public service are: Postoffice, 18 to 45 years; rural letter carriers, 17 to 55; internal revenue, 21 years and over; railway mail, 13 to 35; light-house, 18 to 50; life saving, 18 to 45; general departmental, 20 and over. These age limitations are subject to change by the commission. They do not apply to applicants of the preferred class. Applicants for the position of railway mail clerk must be at least 5 feet 6 inches in height, exclusive of boots or shoes, and weigh not less than 135 pounds in ordinary clothing and have no physical defects. Applicants for certain other positions have to come up to similar physical requirements.

Method of Appointment.—Whenever a vacancy exists the appointing officer makes requisition upon the civil service commission for a certification of names to fill the vacancy, specifying the kind of position vacant, the sex desired and the salary. The commission thereupon takes from the proper register of eligibles the names of three persons standing highest of the sex called for and certifies them to the appointing officer, who is required to make the selection. He may choose any one of the three names, returning the other two to the register to await further certification. The time of examination is not considered, as the highest in average percentage on the register must be certified first. If after a probationary period of six months the name of the appointee is continued on the roll of the department in which he serves the appointment is considered absolute.

Removals.—No person can be removed from a competitive position except for such cause as will promote the efficiency of the public service and for reasons given in writing. No examination of witnesses nor any trial shall be required except in the discretion of the officer making the removal.

Salaries.—Entrance to the department service is usually in the lowest grades, the higher grades being generally filled by promotion. The usual entrance grade is about \$900, but the applicant may be appointed at \$840, \$760 or even \$600.

GIFTS FOR NEGRO Y. M. C. A. BUILDINGS.

Made by Julius Rosenwald of Chicago and others.

Julius Rosenwald in January, 1911, offered to contribute \$250,000 toward the cost of a Y. M. C. A. building for colored men and boys in any city of the United States that would raise at least \$75,000 additional to make a minimum fund of \$100,000. As the result of this offer \$250,000 has been paid out by Mr. Rosenwald for buildings in Chicago, Washington, Indianapolis, Philadelphia, Kansas City, Cincinnati, Brooklyn, St. Louis, Baltimore and Atlanta. In addition, \$75,000 is ready to be paid by Mr. Rosenwald for buildings in

Columbus, Pittsburgh and New York, when they have complied with all conditions. By means of Mr. Rosenwald's offer others have contributed to a total actual, and as to Columbus, Pittsburgh and New York prospective, disbursement of \$2,000,000. Nearly \$1,000,000 is the gift of white people. More than a quarter of a million dollars was given by negroes in the various communities benefited.

The following table, prepared by W. J. Parker, business manager of the Chicago Y. M. C. A., analyzes the \$2,000,000 disbursement:

	Total cost.	Rosenwald gifts.	By local whites.	By local negroes.	Other sources.	Year.
Atlanta	\$123,609.00	\$25,000	\$39,348.45	\$30,797.69	\$28,462.86	1919
Baltimore	110,000.00	25,000	50,000.00	20,000.00	15,000.00	1918
Brooklyn	208,545.85	25,000	160,597.85	14,648.00	8,300.00	1918
Chicago	186,767.14	25,000	60,000.00	22,000.00	79,767.14	1913
Columbus	116,450.00	25,000	76,450.00	15,000.00		1918
Cincinnati	112,500.00	25,000	71,500.00	16,000.00		1916
Indianapolis	105,000.00	25,000	55,000.00	10,000.00	15,000.00	1913
Kansas City	104,014.51	25,000	44,526.43	25,183.85	9,304.23	1914
New York	358,000.00	25,000	113,713.43	11,286.57	208,000.00	1919
Philadelphia	110,000.00	25,000	62,000.00	13,000.00	10,000.00	1913
Pittsburgh	160,000.00	25,000	90,000.00	12,000.00	33,000.00	1919
St. Louis	185,000.00	25,000	102,500.00	57,500.00		1918
Washington	114,877.95	25,000	34,877.95	35,000.00	20,000.00	1912
Totals	\$1,994,764.45	\$325,000	\$960,514.11	\$282,416.11	\$426,834.23	

NOTE.—Of the above cities all except Columbus, New York and Pittsburgh have met the conditions of Mr. Rosenwald's gift. These three cities have been granted an extension of time. The above table does not include a promise of \$25,000 to the colored Y. W. C. A.

of New York (made because a joint fund was raised there) on conditions similar to those for the colored Y. M. C. A. An extension of time has been granted to the New York women until Jan. 1, 1919. The building they propose to erect will cost upward of \$100,000.

AMERICAN BIRTH AND DEATH RATES.

The following table prepared by the federal census bureau shows for the birth registration area of the United States the number of births in the calendar year 1915, the birth rate, the death rate, the number of deaths of infants under 1 year of age and the infant mortality rate. The states in the registration area had in 1915 an estimated population of 31,150,000, representing 81 per cent of the total for the United States. In the table stillbirths are excluded, and by infants are meant all children under 1 year of age.

MINERAL PRODUCTION OF ALASKA.

In 1917 Alaska produced minerals valued at \$41,760,000. This, although about \$6,870,000 less than that in 1916, was greater than that in any other year. The most valuable mineral product in 1917 was copper, of which 88,200,000 pounds, valued at \$24,000,000, was produced. This was less than the output of 1916, which was 119,600,000 pounds, valued at \$29,480,000, but was greater than that of any other year. The reduction was due largely to labor troubles. The gold produced in 1917, \$15,450,000, of which \$9,850,000 was derived from placer mines, was also less than that produced in 1916, which was \$17,240,000, and was the smallest since 1904. The reduction was due chiefly to curtailment of opera-

tions because of the scarcity of labor and the high cost of materials, but in part to the disaster at the Treadwell mine and the depletion of some of the richer placers.

During the year Alaska also produced silver valued at \$1,050,000, coal valued at \$300,000, lead valued at \$160,000, tin valued at \$160,000, antimony valued at \$40,000, and tungsten, chromium, petroleum, marble, gypsum, graphite and platinum valued at \$600,000.

In thirty-three years of mining Alaska has produced more than \$391,000,000 in gold, silver, copper and other minerals. Of this amount \$293,000,000 represents the value of the gold and \$88,200,000 that of the copper.

CHRISTIAN SCIENCE CHURCH.

The Christian Science church was founded in 1879 by Mary Baker Eddy, the discoverer of Christian Science and author of its textbook, "Science and Health with Key to the Scriptures." The church was organized to "commemorate the word and works of our Master, which should reinstate primitive Christianity and its lost element of healing" (Church Manual). Its proper name is The First Church of Christ, Scientist, in Boston, Mass. It is also known as The Mother Church. The present officers of The Mother Church are:

President—Dr. Francis J. Fluno.

Clerk—Charles E. Jarvis.

Treasurer—Edward L. Ripley.

Directors—John V. Edtmore, Adam H. Dickey, James A. Neal, Edward A. Merritt, William R. Rathvon.

All Christian Science churches and societies in the United States and in foreign countries are branches of The Mother Church. Lesson-sermons

compiled from the bible and "Science and Health with Key to the Scriptures," by Mrs. Eddy, are read at the services in Christian Science churches.

The Christian Science Journal, Sentinel, Quarterly, Der Herold der Christian Science, Le Heraut der Christian Science and The Christian Science Monitor (an international daily newspaper) are published by The Christian Science Publishing society in Boston.

There is in connection with the Christian Science movement an official board of lectureship designed to furnish the public correct information concerning the fundamental teachings of Christian Science. Lectures given by members of this board are free to the public.

The council meets quadrennially and its executive committee annually. Its work is carried on through the following commissions: The church and social service, peace and arbitration, evangelism, Christian education, foreign missions, home missions, family life, temperance, Sunday observance, church and country life, interchurch federations, and general war time commission of churches.

The national offices are at 105 East 22d street, New York, N. Y.

An office is maintained in the Woodward building, Washington, D. C.

YOUNG MEN'S CHRISTIAN ASSOCIATION.

International Committee of Young Men's Christian Associations of North America—Alfred E. Marling, chairman; William Sloane, William D. Murray, James M. Speers, Abner Klingman, vice-chairmen; B. H. Fancher, treasurer; John R. Mott, general secretary; general offices, 347 Madison avenue, New York, N. Y. The annual report made in 1918 for the regular work of local organizations shows: Associations, 2,193; members, 673,790; value of real property, \$36,087,900; total net property and funds, \$107,707,200; number of employed officers, 4,963; students in educational classes, 81,899; 735 gymnasiums;

241,946 in regular gymnasium classes; 200 athletic fields; 239 railroad associations with 94,126 members; 791 student associations with 51,117 members; boy membership, 152,647.

In addition there are (Nov. 1) over 200,000 stars in the Y. M. C. A. service flag. The association renders large and increasing service in connection with the great war. In America there are now 4,559 secretaries serving soldiers and sailors in many hundreds of camps and naval stations. Overseas 7,000 men from America have been sent for Y. M. C. A. service with special reference to the American expeditionary forces in France, but also at the earnest request of the governments of France, Italy, Russia and other countries for their own armies. This service—to take the sick out of homesick and helpfully strengthen the morale of the United States army and also of the allies and the prisoners of war—now costs the American association over \$7,000,000 a month, and of necessity must increase to meet demands until the war is won.

AMERICAN LIBRARY ASSOCIATION.

Organized 1876.

President—William W. Bishop, University of Michigan Library, Ann Arbor, Mich.
 Secretary—George B. Utley, 78 East Washington street, Chicago, Ill.
 First Vice-President—Charles F. D. Belden, Boston Public Library, Boston, Mass.
 Second Vice-President—Burton E. Stevenson, Chillicothe Public Library, Chillicothe, O. (Since April, 1918, European representative of the library war service, Paris, France.)
 Association Headquarters—78 East Washington street, Chicago, Ill.
 Membership—3,500.
 Object—To promote the welfare of libraries in America.

The principal work engaging the association since the entrance of the United States into the war has been that of providing library facilities for the army, navy and marine corps, a task delegated to the American Library association by the commissions on training camp activities, war and navy departments. The following committee on war service was appointed by the association in June, 1917: J. I. Wyer, Jr., New York State Library, Albany, chairman; E. H. Anderson, New York Public Library; F. P. Hill, Brooklyn Public Library; C. E. D. Belden, Boston Public Library; Gratia A. Countryman, Minneapolis Public Library; W. H. Brett, (since deceased), Cleveland Public Library; Electra C. Doren, Dayton (Ohio) Public Library; Herbert Putnam, librarian of congress, is general director of the library war service.

A fund exceeding \$1,750,000 was raised by popular subscription. The American people further contributed to the work by donating several millions of books. Under the comprehensive plan of service adopted, special library buildings, housing large collections in charge of trained librarians, have been established in the large army, navy and marine corps camps, service having been given as well to smaller camps, posts and stations, to ships, and to the men in service overseas. The following figures are of September, 1918: Forty-one library buildings in operation, forty-three large camp libraries established; 143 hospitals and Red

Cross houses equipped with books; 234 librarians in the service; 315 small military camps and posts equipped with book collections; 138 naval and 26 marine corps stations and 242 vessels supplied with libraries; 1,547 branches and stations placed in Y. M. C. A. and K. of C. huts, barracks and mess halls; 1,030,458 books shipped overseas; 560,271 books purchased, largely technical; 3,011,510 books, donated by the public, in the service.

WRECK OF THE PRINCESS SOPHIA.

The Canadian Pacific Steamship company's passenger steamer Princess Sophia, caught in a snowstorm, ran on the Vanderbilt reef in Lynn canal, south of Skagway, Alaska, Oct. 24, 1918, while on her way to Vancouver. Help was summoned and several boats arrived on the scene, but as there did not seem to be any immediate danger the passengers were not taken off. On the following day a storm sprang up and the steamer, after being pounded against the rocks, was lifted from the reef and dropped to the bottom of the channel. There were 343 persons aboard, most of them outboud Alaskans and residents of the Yukon territory, and all lost their lives. The Princess Sophia was a vessel of 2,320 tons.

WORLD'S GREATEST BUFFALO HERD.

The herd of buffalo in Wainwright park, Alberta, Canada, contained 3,500 animals in 1918 when a roundup was made. This is believed to be the largest buffalo herd in the world. The original herd from which this has grown consisted of 402 head bought in 1909 by the Canadian government from an Indian named Pablo in the Flathead valley, Montana. The United States government has a large and growing herd on a reservation in the Flathead valley. There are other herds of buffalo elsewhere in America and it is evident that there is no longer any danger that the buffalo will become an extinct animal.

Commanderies have been established in twenty-one states. Total membership about 1,200.

The order is a military organization with patriotic objects, having for its scope the period of American history since national independence. It stands for the needed and honorable principle of national defense against foreign aggression. The principal feature of the order is the perpetuating of the names as well as the services of commissioned officers who served in either the war of the revolution, the war with Tripoli, the war of 1812, the Mexican war or the war with Spain or shall serve in future campaigns recognized by the United States government as war with foreign powers. Veteran companionship is conferred upon such officers and hereditary companionship upon their direct lineal descendants in the male line.

AMERICAN DEFENSE SOCIETY, INC.

National Headquarters—44 East 23d street, New York, N. Y.

Slogan—"Serve at the front or serve at home."

Honorary President—Hon. Theodore Roosevelt.

Honorary Vice-Presidents—David Jayne Hill, Robert Bacon, Perry Belmont, Charles J. Bonaparte, John Grier Hibben, Henry B. Joy, Charles S. Fairchild.

Executive Officers.

Chairman Board of Trustees—Charles S. Davison.

Chairman Executive Committee—Henry C. Quinby.

Treasurer—Robert Appleton.

Secretary—H. D. Craig.

Aims.

1. Defense of America—within. To fight disloyal influences in America now and after the war. To urge full punishment of spies and internment of all enemy aliens. To work to abolish German newspapers, German societies, the German language in schools and all German propaganda. To bring about a general boycott of all goods made in Germany.

2. Defense of America—without. To rouse America to its peril and the need of many millions of soldiers to win the war. To expose the atrocities and lust of dominion of the enemy. To advocate universal military training.

3. Recognition of Accountability. To demand such full accountability of all officials as will result in the elimination of inefficiency.

4. Public Information. To insist upon full and frank publicity concerning government activities—within the proper limits of military necessity—that an aroused public may enlist all intellectual and emotional factors in the winning of the war.

5. Preparation for After the War Conditions. To so raise the standard of citizenship that the tyranny of autocracy as well as of bolshevism may be avoided. To rouse public opinion in order that such stern justice shall be meted out as will make it clear that wars of aggression are unprofitable.

LEAGUE FOR NATIONAL UNITY.

Organized Oct. 9, 1917.

Honorary Chairmen—James Cardinal Gibbons and Frank Mason North.

Chairman—Theodore N. Vail.

Vice-Chairmen—Samuel Gompers, Charles A. Barrett, George Pope.

Secretary—D. L. Cease, Railway Trainmen's Journal.

Treasurer—Otto H. Kahn, New York, N. Y.

The aim of the league is to unite all America behind the government for the vigorous prosecution of the war with Germany to a successful conclusion.

LEAGUE TO ENFORCE PEACE.

Organized June 17, 1915; incorporated Oct. 14, 1916.

President—William H. Taft, Washington, D. C.

Secretary—William H. Short, 70 5th avenue, New York, N. Y.

Vice-President—Alton B. Parker, New York, N. Y.

Chairman Executive Committee—A. Lawrence Lowell, Cambridge, Mass.

The object of the league, as its name implies, is to compel nations to keep the peace without recourse to war. It proposes that the United States, after the defeat of the central powers, shall join an international league pledging the signatory powers jointly to use their economic and military forces against any one of their number that goes to war or commits acts of hostility against another of the signatories before any question arising shall have been submitted to a judicial tribunal for hearing and judgment and to a council of conciliation for consideration and recommendation.

AMERICAN ALLIANCE FOR LABOR AND DEMOCRACY.

Organized in Minneapolis, Minn., Sept. 7, 1917.

President—Samuel Gompers, New York, N. Y.

Vice-Presidents—Winifred R. Gaylord, Milwaukee, Wis.; Mrs. Gertrude Fuller, Pittsburgh, Pa.; James Duncan, Chicago, Ill.

Secretary—Frank Morrison, Washington, D. C.

Treasurer—J. G. Phelps Stokes, New York, N. Y.

The organization was formed to promote loyalty to the government, to solidify labor behind it, to suppress pro-German propagandists and to work for heavy taxes on incomes, excess profits and land values, government control of industries in case of labor disputes, insurance for soldiers and sailors, equal suffrage and for giving wage earners a voice in war and peace councils.

FOREST FIRES IN MINNESOTA.

Driven by a wind blowing at the rate of sixty to seventy miles an hour forest fires swept over a considerable part of Carlton, St. Louis and Aitkin counties in northeastern Minnesota Saturday afternoon and night, Oct. 12, 1918, causing the death of 800 or more persons and damage to property estimated at nearly \$30,000,000. Among the towns and villages wholly or partly destroyed were Cloquet, Moose Lake, Brookston, Brevator, Arnold, Hermantown, Grand Lake, Aitkin, Maple Grove, Lawler, Ronald, McGregor, Pike Lake, Pine Hill, Kalavala, Automba and Warba. Hundreds of farmhouses

were destroyed and even in the outskirts of Duluth the damage to buildings and other property was estimated at \$1,000,000. The fire came from the northwest with such speed that persons traveling in automobiles were overtaken by it and burned to death before they could reach safety. Most of the dead were found in earth cellars and wells in which they had sought refuge. The home guards from various cities in the state did good work in saving life and property while Red Cross and other organizations gave aid to the homeless and destitute, numbering some 40,000.

APPORTIONMENT OF REPRESENTATIVES.

[From census bureau report.]

The apportionment of representatives in congress, under the first six censuses—1790 to 1840, inclusive—was made by congress, each by a separate act. The law for taking the census of 1850, which was intended to be permanent, presented a rule of apportionment, fixed the number of members of the house at 233 and directed the secretary of the interior thereafter to make the apportionment. The apportionment of 1860 was also made under this law, but congress, on March 4, 1862, fixed the total number of representatives at 241, and the secretary of the interior apportioned the new quotas to the states. The apportionments from and after the census of 1870 were made by congress, each by a separate act, hence it may be assumed that the power conferred on the secretary of the interior by the act of May 23, 1850, was repealed by implication. The fol-

lowing shows the dates of the apportionment acts and the ratio of population to each representative:

MAIL SERVICE BY AEROPLANE.

The first regular air mail service in the United States was begun May 15, 1918, between Washington, Philadelphia and New York. Three of four machines used delivered safely and on time the mail entrusted to their care. One that left Washington in the presence of President and Mrs. Wilson and other officials was forced to land in Maryland on account of a broken propeller. The distance from New

York to Philadelphia was made in 1 hour 30 minutes, and from Philadelphia to Washington in 1 hour 45 minutes, or 3 hours and 15 minutes from New York to Washington. More than 5,000 letters were carried, on which postage at the rate of 24 cents an ounce or fraction thereof was paid. The postoffice department had a special red, white and blue 24-cent stamp prepared for the service.

CITIZENSHIP IN THE UNITED STATES.

All persons born or naturalized in the United States and subject to the jurisdiction thereof are citizens of the United States and of the state wherein they reside. (Fourteenth amendment to the constitution.)

All persons born in the United States and not subject to any foreign power, excluding Indians not taxed, are declared to be citizens of the United States. (Sec. 1992, U. S. Revised Statutes.)

All children heretofore born or hereafter born out of the limits and jurisdiction of the United States, whose fathers were or may be at the time of their birth citizens thereof, are declared to be citizens of the United States; but the rights of citizenship shall not descend to children whose fathers never resided in the United States. (Sec. 1993, U. S. Revised Statutes.)

Any woman who is now or may hereafter be married to a citizen of the United States and who might herself be lawfully naturalized shall be deemed a citizen. (Sec. 1995, U. S. Revised Statutes.)

Children born in the United States of alien parents are citizens of the United States.

When any alien who has declared his intention to become a citizen of the United States dies before he is actually naturalized the widow and minor children of such alien may, by complying with the other provisions of this act (June 29, 1906), be naturalized without making any declaration of intention. If a widow files an application for citizenship based on her husband's declaration of intention, the children who are under the age of 21 at the time she is naturalized will be citizens through her naturalization, but if the children are past the age of 21 and were born in a foreign country, it will be necessary for them to file petitions for naturalization in their own right, using their deceased

father's declaration of intention, provided they were under the age of 21 at the time of his death.

Children of Chinese parents who are themselves aliens and incapable of becoming naturalized are citizens of the United States.

Children born in the United States of persons engaged in the diplomatic service of foreign governments are not citizens of the United States.

Children born of alien parents on a vessel of a foreign country while within the waters of the United States are not citizens of the United States, but of the country to which the vessel belongs.

Children born of alien parents in the United States have the right to make an election of nationality when they reach their majority.

Minors and children are citizens within the meaning of the term as used in the constitution.

Deserters from the military or naval service of the United States are liable to loss of citizenship.

Any alien being a free white person, an alien of African nativity or of African descent may become an American citizen by complying with the naturalization laws.

"Hereafter no state court or court of the United States shall admit Chinese to citizenship; and all laws in conflict with this act are repealed." (Sec. 14, act of May 6, 1882.)

The courts have held that neither Chinese, Japanese, Hawaiians, Burmese nor Indians can be naturalized.

The naturalization laws apply to women as well as men. An alien woman who marries a citizen, native or naturalized, becomes a naturalized citizen of the United States.

Aliens may become citizens of the United States by treaties with foreign powers, by conquest or by special acts of congress.

In an act approved March 2, 1907, it is provided that any American citizen shall have expatriated himself when he has been naturalized in any foreign state in conformity with its laws, or when he has taken an oath of allegiance to any foreign state.

When any naturalized citizen shall have resided for two years in the foreign state from which he came, or five years in any other foreign state, it shall be presumed that he has ceased to be an American citizen, and the place of his general abode shall be deemed his place

of residence during said years: Provided, however, that such presumption may be overcome on the presentation of satisfactory evidence to a diplomatic or consular officer of the United States, under such rules and regulations as the department of state may prescribe; and provided also, that no American citizen shall be allowed to expatriate himself when this country is at war.

Any American woman who marries a foreigner shall take the nationality of her husband. At the termination of the marital relation she may resume her American citizenship, if abroad, by registering as an American citizen within one year with a consul of the United States, or by returning to reside in the United States, or, if residing in the United States at the termination of the marital relation, by continuing to reside therein.

Any foreign woman who acquires American citizenship by marriage to an American citizen shall be assumed to retain the same after the termination of the marital relation if she continue to reside in the United States, unless she makes formal renunciation thereof before a court having jurisdiction to naturalize aliens, or, if she resides abroad, she may retain her citizenship by registering as such before a United States consul within one year after the termination of such marital relation.

A child born without the United States of alien parents shall be deemed a citizen of the United States by virtue of the naturalization of or resumption of American citizenship of the parent: Provided, that such naturalization or resumption takes place during the minority of such child; and provided further, that the citizenship of such minor child shall begin at the time such minor child begins to reside permanently in the United States.

All children born outside the limits of the United States, who are citizens thereof in accordance with the provisions of section 1993 of the Revised Statutes of the United States (see above), and who continue to reside outside of the United States, shall, in order to receive the protection of the government, be required, upon reaching the age of 18 years, to record at an American consulate their intention to become residents and remain citizens of the United States and shall further be required to take the oath of allegiance to the United States upon attaining their majority.

Any alien of the age of 21 years and upward who may, under existing law, become a citizen of the United States, who has served or may hereafter serve for one enlistment of not less than four years in the United States navy, naval auxiliary, marine corps or revenue cutter (coast guard) service and received an honorable discharge with recommendation for re-enlistment, shall be admitted to become a citizen of the United States upon his petition without previous declaration of intention to become such, and without proof of residence on shore. (Act of June 30, 1914.)

NATURALIZATION LAWS.

Approved June 29, 1906.

Exclusive jurisdiction to naturalize aliens resident in their districts is conferred upon the United States Circuit and District courts and all courts of record having a seal, a clerk and jurisdiction in actions in law or equity or both in which the amount in controversy is unlimited.

An alien may be admitted to citizenship in the following manner and not otherwise:

1. He shall declare on oath before the clerk of the proper court at least two years before his admission, and after he has reached the age of 18 years, that it is bona fide his intention to become a citizen of the United States and to renounce allegiance to any foreign state or sovereignty. Such declaration shall set forth the same facts as are registered at the time of his arrival.

2. Not less than two years nor more than seven after he has made such declaration he shall file a petition, signed by himself and verified, in

which he shall state his name, place of residence, occupation, date and place of birth, place from which he emigrated, name of the vessel on which he arrived, the time when and the place and name of the court where he declared his intention of becoming a citizen; if he is married, he shall state the name of his wife, the country of her nativity and her place of residence at the time the petition is filed, and if he has children, the name, date and place of birth and place of residence of each child living. The petition shall also set forth that he is not a disbeliever in or opposed to organized government or a member of any body of persons opposed to organized government, and that he is not a polygamist or a believer in polygamy; that he intends to become a citizen of and to live permanently in the United States, and every other fact material to his naturalization and required to be proved upon the final hearing of his application. The petition shall be verified by the affidavits of at least two credible witnesses who are citizens. At the time of the filing of the petition there shall be also filed a certificate from the department of commerce and labor stating the date, place and manner of his arrival in the United States and the declaration of intention of such petitioner, which certificate and declaration shall be attached to and be a part of his petition.

3. He shall, before he is admitted to citizenship, declare on oath in open court that he will support the constitution of the United States, and that he absolutely renounces all allegiance to any foreign prince, potentate, state or sovereignty.

4. It shall be made apparent to the satisfaction of the court admitting any alien to citizenship that immediately preceding the date of his application he has resided continuously within the United States five years at least, and within the state or territory where such court is at the time held one year at least, and that during that time he has behaved as a man of good moral character, attached to the principles of the constitution. In addition to the oath of the applicant, the testimony of at least two witnesses, citizens of the United States, as to the facts of residence, moral character and attachment to the principles of the constitution shall be required.

5. He must renounce any hereditary title or order of nobility which he may possess.

6. When any alien who has declared his intention dies before he is actually naturalized the widow and minor children may, by complying with the other provisions of the act, be naturalized without making any declaration of intention.

Immediately after the filing of the petition the clerk of the court shall give notice thereof by posting in a public place the name, nativity and residence of the alien, the date and place of his arrival in the United States and the date for the final hearing of his petition and the names of the witnesses whom the applicant expects to summon in his behalf. Petitions for naturalization may be filed at any time, but final action thereon shall be had only on stated days and in no case until at least ninety days have elapsed after the filing of the petition. No person shall be naturalized within thirty days preceding a general election within the territorial jurisdiction of the court.

No person who disbelieves in or who is opposed to organized government, or who is a member of or affiliated with any organization entertaining and teaching such disbelief in or opposition to organized government, or who advocates or teaches the duty, necessity or propriety of the unlawful assaulting or killing of any officer or officers of the government of the United States, or of any other organized government, because of his or their official character, or who is a polygamist, shall be naturalized.

No alien shall hereafter be naturalized or admitted as a citizen of the United States who cannot speak the English language. This requirement does not apply to those physically unable to comply with it, or to those making homestead entries upon the public lands of the United States.

IMMIGRATION LAW.

Effective since May 1, 1917.

The word "alien" as used in the act includes any person not a native born or naturalized citizen of the United States, but it does not include Indians of the United States not taxed or citizens of the islands under the jurisdiction of the United States. The term "United States" means the United States and any waters, territory or other place subject to the jurisdiction thereof except the Isthmian Canal Zone; but if any alien shall leave the Canal Zone or any insular possession and attempt to enter any other place under the jurisdiction of the United States he is not to be permitted to enter under any other conditions than those applicable to all aliens.

There shall be collected a tax of \$8 for every alien, including alien seamen regularly admitted, entering the United States. Children under 16 accompanying father or mother are not subject to the tax. The tax shall not be levied on aliens who enter after an uninterrupted residence of at least one year preceding such entrance in Canada, Newfoundland, Cuba or Mexico for a temporary stay, nor upon aliens in transit, nor upon aliens who, having been lawfully admitted, shall go from one part of the United States to another, although through contiguous foreign territory.

Excluded Aliens.

The following classes of aliens are excluded from the United States: Idiots, imbeciles, feeble minded, epileptics, insane persons; persons who have had one or more attacks of insanity previously; persons of constitutional psychopathic inferiority; persons with chronic alcoholism; paupers; professional beggars; vagrants; persons afflicted with tuberculosis in any form or with a loathsome or dangerous contagious disease; persons not comprehended within any of the foregoing excluded classes who are found to be and are certified by the examining surgeon as being mentally or physically defective, such physical defect being of a nature which may affect the ability of such alien to earn a living; persons who have been convicted of or admit having committed a felony or other crime or misdemeanor involving moral turpitude; polygamists, or persons who practice polygamy or believe in or advocate the practice of polygamy; anarchists, or persons who believe in or advocate the overthrow by force or violence of the government of the United States or of all forms of law, or who disbelieve in or are opposed to organized government, or who advocate the assassination of public officials, or who advocate or teach the unlawful destruction of property; persons who are members of or affiliated with any organization entertaining and teaching disbelief in or opposition to organized government, or who advocate or teach the duty, necessity, or propriety of the unlawful assaulting or killing of any officer or officers, either of specific individuals or of officers generally, of the government of the United States or of any other organized government, because of his or their official character, or who advocate or teach the unlawful destruction of property; prostitutes, or persons coming into the United States for the purpose of prostitution or any other immoral purpose; persons who directly or indirectly procure or attempt to procure or import prostitutes or persons for the purpose of prostitution or any other immoral purpose; persons who are supported by or receive in whole or in part the proceeds of prostitution; contract laborers, who have been induced or assisted to migrate to this country by offers or promises of employment, whether such offers or promises are true or false, or in consequence of agreements, oral, written or printed, express or implied, to perform labor in this country of any kind, skilled or unskilled; persons who have come in consequence of advertisements for laborers printed, published or distributed in a foreign country; persons likely to become a public charge; persons who have been deported

under any of the provisions of this act, and who may again seek admission within one year from the date of such deportation, unless prior to their re-embarkation at a foreign port or their attempt to be admitted from foreign contiguous territory the secretary of labor shall have consented to their reapplying for admission; persons whose ticket or passage is paid for with the money of another, or who are assisted by others to come, unless it is satisfactorily shown that such persons do not belong to one of the foregoing excluded classes; persons whose ticket or passage is paid for by any corporation, association, society, municipality or foreign government, either directly or indirectly; stowaways, except that any such stowaway, if otherwise admissible, may be admitted at the discretion of the secretary of labor; all children under 16 years of age unaccompanied by or not coming to one or both of their parents, except that any such children may, in the discretion of the secretary of labor, be admitted if, in his opinion, they are not likely to become a public charge and are otherwise eligible; unless otherwise provided for by existing treaties, persons who are natives of islands not possessed by the United States adjacent to the continent of Asia, situate south of the 20th parallel latitude north, west of the 160th meridian of longitude east of Greenwich, and north of the 10th parallel latitude south, or who are natives of any country, province, or dependency situate on the continent of Asia west of the 110th meridian of longitude east from Greenwich and the 24th and 38th parallels of latitude north, and no alien now in any way excluded from, or prevented from entering, the United States shall be admitted to the United States.

The provision next foregoing, however, shall not apply to persons of the following status or occupation: Government officers, ministers or religious teachers, missionaries, lawyers, physicians, chemists, civil engineers, teachers, students, authors, artists, merchants, and travelers for curiosity or pleasure, nor to their legal wives or their children under 16 years of age who shall accompany them or who may subsequently apply for admission to the United States, but such persons or their legal wives or foreign born children who fail to maintain in the United States a status or occupation placing them within the excepted classes shall be deemed to be in the United States contrary to law and shall be subject to deportation.

Literacy Test.

After three months from the passage of this act, in addition to the aliens who are by law now excluded from admission into the United States, the following persons shall also be excluded from admission thereto, to wit:

All aliens over 16 years of age, physically capable of reading, who cannot read the English language, or some other language or dialect, including Hebrew or Yiddish: Provided, that any admissible alien, or any alien heretofore or hereafter legally admitted, or any citizen of the United States, may bring in or send for his father or grandfather over 55 years of age, his wife, his mother, his grandmother or his unmarried or widowed daughter, if otherwise admissible, whether such relative can read or not; and such relative shall be permitted to enter. That for the purpose of ascertaining whether aliens can read the immigrant inspectors shall be furnished with slips of uniform size, prepared under the direction of the secretary of labor, each containing not less than thirty nor more than forty words in ordinary use, printed in plainly legible type in some one of the various languages or dialects of immigrants. Each alien may designate the particular language or dialect in which he desires the examination to be made, and shall be required to read the words printed on the slip in such language or dialect. That the following classes of persons shall be exempt from the operation of the literacy test, to wit: All aliens who

shall prove to the satisfaction of the proper immigration officer or to the secretary of labor that they are seeking admission to the United States to avoid religious persecution in the country of their last permanent residence, whether such persecution be evidenced by overt acts or by laws or governmental regulations that discriminate against the alien or the race to which he belongs because of his religious faith; all aliens who have been lawfully admitted to the United States and who have resided therein continuously for five years and who return to the United States within six months from the date of their departure therefrom; all aliens in transit through the United States; all aliens who have been lawfully admitted to the United States and who later shall go in transit from one part of the United States to another through foreign contiguous territory: Provided, that nothing in this act shall exclude, if otherwise admissible, persons convicted, or who admit the commission, or who teach or advocate the commission, of an offense purely political: Provided further, that the provisions of this act relating to the payments for tickets or passage by any corporation, association, society, municipality or foreign government shall not apply to the tickets or passage of aliens in immediate and continuous transit through the United States to foreign contiguous territory: Provided further, that skilled labor, if otherwise admissible, may be imported if labor of like kind unemployed cannot be found in this country, and the question of the necessity of importing such skilled labor in any particular instance may be determined by the secretary of labor upon the application of any person interested, such application to be made before such importation, and such determination by the secretary of labor to be reached after a full hearing and an investigation into the facts of the case: Provided further, that the provisions of this law applicable to contract labor shall not be held to exclude professional actors, artists, lecturers, singers, nurses, ministers of any religious denomination, professors for colleges or seminaries, persons belonging to any recognized learned profession, or persons employed as domestic servants: Provided further, that whenever the president shall be satisfied that pas-

ports issued by any foreign government to its citizens or subjects to go to any country other than the United States, or to any of its insular possessions or the Canal Zone, are being used for the purpose of enabling the holder to come to the continental territory of the United States to the detriment of labor conditions therein, the president shall refuse to permit such persons to enter the United States or its possessions: Provided further, that aliens returning after a temporary absence to an unrelinquished United States domicile of seven consecutive years may be admitted at the discretion of the secretary of labor and under such conditions as he may prescribe: Provided further, that nothing in the contract-labor or reading-test provisions of this act shall be construed to prevent any alien exhibitor or holder of any concession for any fair or exposition authorized by congress from bringing into the United States, under contract, such otherwise inadmissible alien mechanics, artisans, agents or other employees, natives of his country, as may be necessary for installing or conducting his exhibit or business, under such rules as the commissioner-general of immigration with the approval of the secretary of labor may prescribe, both as to the admission and return of such persons: Provided further, that the commissioner-general of immigration with the approval of the secretary of labor shall issue rules and prescribe conditions, including exaction of such bonds as may be necessary, to control and regulate the admission and return of otherwise inadmissible aliens applying for temporary admission: Provided further, that nothing in this act shall be construed to apply to accredited officials of foreign governments, nor to their suites, families or guests.

The importation of any alien into the United States for any immoral purpose is punishable by imprisonment for not more than ten years and by a fine of not more than \$5,000. Violations of the contract-labor section of the act are punishable by fines of \$1,000 or by imprisonment for not less than six months nor more than two years. The act provides for the fining or imprisonment of persons engaged in the transportation of aliens into the United States who encourage or help persons excluded under the provisions of the law to enter the country.

FLAG OF THE UNITED STATES.

Executive order of May 29, 1916.

It is hereby ordered that national flags and union jacks for all departments of the government, with the exception noted under (a), shall conform to the following proportions:

- Hoist (width) of flag, 1.
- Fly (length) of flag, 1.9.
- Hoist (width) of union, 7-13.
- Fly (length) of union, .76.
- Width of each stripe, 1-13.

(a). Exception: The colors carried by troops and camp colors shall be the sizes prescribed for the military service (army and navy).

Limitation of the number of sizes: With the exception of colors under note (a) the sizes of flags manufactured or purchased for the government departments will be limited to those with the following hoists:

- (1), 20 feet; (2), 19 feet (standard); (3), 14.35 feet; (4), 12.19 feet; (5), 10 feet; (6), 8.94 feet; (7), 5.14 feet; (8), 5 feet; (9), 3.52 feet; (10), 2.90 feet; (11), 2.37 feet; (12), 1.31 feet.

Union jacks: The size of the jack shall be the size of the union of the national flag with which it is flown.

The national flag of the United States now consists of thirteen alternate red and white stripes, representing the original thirteen states, and a blue field on which are forty-eight white stars arranged in six rows of eight stars each, representing the forty-eight states now constituting the union. The last two stars were added in 1912 when New Mexico and Arizona were officially admitted as states.

Laws are in force in some of the states forbidding the desecration or mutilation of the flag or its use in any way for advertising purposes. A federal law forbids the use of the national flag on trade-marks.

The national flag was officially adopted by congress June 14, 1777. Accordingly June 14 is now generally observed as Flag day.

THE CAPITOL IN WASHINGTON.

The corner stone of the original capitol building was laid by President Washington Sept. 18, 1793. The north wing was finished in 1810 and the south wing in 1811. A wooden passageway connecting them. The original designs of the structure were made by Dr. William Thornton. The two wings were burned by the British in 1814, but were immediately restored. In 1827 the original building was completed at a cost of \$2,433,844.13. Exten-

sions of the wings were begun in 1851 and completed in 1859. The dome, which is 287 feet 5 inches in height, was completed in 1865. The capitol stands in latitude 38 degrees 53 minutes 20.4 seconds north and longitude 77 degrees 00 minutes 35.7 seconds west from Greenwich. The area covered by the building is 153,112 square feet. Value of building and grounds: Building, \$15,000,000; grounds, \$10,400,000; total, \$25,400,000.

AMERICAN CITIZEN'S CREED.

In 1918 the city of Baltimore offered a prize of \$1,000 for the best "American creed." Of the several thousand offered the committee on award selected that submitted by William Tyler Page of Friendship Heights, Md., as the winner. It reads:

"I believe in the United States of America as a government of the people, by the people, for the people; whose just powers are derived from the consent of the governed; a democracy

in a republic; a sovereign nation of many sovereign states; a perfect union, one and inseparable; established upon those principles of freedom, equality, justice and humanity for which American patriots sacrificed their lives and fortunes.

"I therefore believe it is my duty to my country to love it; to support its constitution; to obey its laws; to respect its flag; and to defend it against all enemies."

In five states in 1892 the electoral vote was divided: California gave 8 electoral votes for Cleveland and 1 for Harrison and Ohio gave 1 for Cleveland and 23 for Harrison; in Michigan, by act of the legislature, each congressional district voted separately for an elector; in Oregon 1 of the 4 candidates for electors on the people's party ticket was also on the democratic ticket; in North Dakota 1 of the 2 people's party electors cast his vote for Cleveland, thus causing the electoral vote of the state to be equally divided

among Cleveland, Harrison and Weaver. In 1896 California gave 8 electoral votes to McKinley and 1 to Bryan; Kentucky gave 13 to McKinley and 1 to Bryan. In Maryland in 1904 7 of the presidential electors chosen were democrats and 1 republican. In 1908 Maryland elected 6 democratic and 2 republican electors. In 1912 California elected 11 progressive and 2 democratic electors. In 1916 West Virginia elected 1 democratic and 7 republican electors.

HOMESTEAD LAWS OF THE UNITED STATES.

For full information as to the method of acquiring homesteads on unappropriated public lands of the United States apply at the nearest federal land office or write to the general land office in the department of the interior, Washington, D. C. In general, it may be said that any person who is the head of a family or is 21 years old and a citizen of the United States, or has declared his intention to be such, and who is not the proprietor of more than 160 acres of land, is entitled to enter 160 acres of public land as a homestead. He is obliged to pay certain fees and commissions ranging from \$7 to \$12 according to the amount of land entered and its location, to live upon the land for a certain length of time and to cultivate a certain amount of it. Recent laws provide for enlarged homesteads of 320 acres in Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico,

North Dakota, South Dakota, Oregon, Utah, Washington and Wyoming, on nonmineral, non-irrigable and nontimbered land; also for stock raising homesteads of 640 acres on land fit only for grazing or forage growing purposes.

UNITED STATES ARSENALS.

The largest of the United States arsenals are located at Rock Island, Ill., and Springfield, Mass. Others are at Pittsburgh, Pa.; Augusta, Ga.; Benicia, Cal.; Columbia, Tenn.; Fort Monroe, Va.; Philadelphia, Pa.; Indianapolis, Ind.; Governor's Island, N. Y.; Jefferson barracks, Mo.; Sandy Hook, N. Y.; San Antonio, Tex.; Dover, N. J.; Watertown, Mass., and Watervliet, N. Y. Some of the above are merely powder depots, the principal manufacturing plants being at Rock Island, Springfield and Watervliet. The navy yards are also arsenals.

CENTENARIANS IN THE UNITED STATES.

According to the census of 1910 there were then in the United States 3,555 persons 100 years of age or over. Of these, 1,380 were men and 2,175 were women. Classified according to the color they were: White men, 328; white women, 438; total, 764; negro men, 1,004; negro women, 1,871; total, 2,875; Indian men, 50; Indian women, 66; total, 116. Classified as to place of birth, 439 were native white and 293 foreign born white. The number of centenarians reported by the census of 1900 was 3,504. "It may be noted," says a census report in commenting on these figures, "that the proportion of centenarians according to the census returns was less in 1910 than in 1900. In fact, the proportion has steadily decreased from census to census for over half a century. The number of centenarians reported in 1910 was equal to 4 for each 100,000 of the total

population, while the corresponding ratio in 1850 was 11. It is improbable that any such decrease in longevity has actually occurred. By no means have all those who report themselves as 100 years old or more, in fact, reached that age, and the apparent reduction in the proportion of centenarians is probably due to greater accuracy in the returns."

Deaths of centenarians reported from Nov. 1, 1917, to Nov. 1, 1918:

NEW BRITISH FRANCHISE LAW.

Under a new franchise law finally passed by the British parliament in the first week of February, 1918, and becoming effective immediately, more than 6,000,000 women were given the full ballot and more than 2,000,000 men were added to the eligible list. Epitomized, the new law extends the right to vote to the following classes:

1. Men of 21 who have resided six months in a constituency.
2. Men of 21 who occupy "business premises" of an annual value of £10 (approximately \$50).
3. Men of 19 who, but for the war, would have qualified in other respects, and are serving, or who have served, in his majesty's forces.
4. Men of 19 abroad or afloat serving in the Red Cross or St. John ambulance or other body with a similar object, and who, but for the war, would have qualified in other respects.
5. Men of 21 serving in the mercantile marine, and who are on the absent voters' list.
6. Men of 21 who do not come within these categories, such as caretakers.
7. Men of 21 who are graduates (not honorary) of a university.
8. Women of 30 who are entitled to be local government electors.
9. Women of 30 who are the wives of men entitled to be local government electors.

10. Women of 30 who are graduates of a university.

11. Women of 30 who are abroad or afloat serving in the Red Cross or any other body with a similar object, and who, but for the war, would have been qualified.

12. Women of 30 who are nursing or otherwise serving in his majesty's forces at home, abroad or afloat, and who, but for the war, would have been qualified.

The law also regulates and makes uniform all local elections, providing substantially the same class of eligibles. The act provides that any general election must be held on the same day throughout the kingdom. The old constituencies are wiped out and a redistricting scheme is provided, each district to be based on a population of approximately 70,000. The membership of parliament is increased from 670 to 702.

The new law disqualifies "conscientious objectors" not only for the duration of the war but for a period of five years after the war.

EARTHQUAKE IN PORTO RICO.

Porto Rico was visited by a severe earthquake on Friday, Oct. 11, 1918. There was considerable loss of life, the total number of killed being placed at about 200. Most of the

victims lived in or near Mayaguez on the western coast of the island. The property damage was estimated at \$5,000,000.

BASEBALL SEASON OF 1918.

Owing to the fact that the military authorities of the United States held ball playing to be a nonessential occupation the baseball season of 1918 came to a close on Sept. 2 instead of about a month later as in other years. The drafting of players into the army and navy or their voluntary enlistment for war work of various kinds weakened a number of the teams. This in addition to poor attendance caused by the entry of so many men into military service led some of the associations to end their seasons even earlier than did the National and American leagues, which played their last regular games on Sept. 2. It was understood that ball playing by major league teams would not be resumed until after the end of the war in Europe.

SALES OF BASEBALL CLUBS.

The Boston National league baseball club was sold by James E. Gaffney and Robert Davis Jan. 8, 1915, to Percy D. Haughton and Arthur C. Wise for \$500,000.

The Chicago National league baseball club (Cubs) was sold by Charles P. Taft of Cincinnati Jan. 5, 1916, to Charles H. Weeghman and partners of Chicago for \$500,000 for 90 per cent of the stock.

The St. Louis American league baseball club (Browns) was sold by Robert Lee Hedges, Jan. 4, 1916, to Phil Ball, James W. Garneau and Otto Stifel for \$525,000.

BASEBALL THROWING RECORD.

The world's record for the long distance throwing of a baseball was broken at Cincinnati, O., Oct. 10, 1910, when Sheldon Lejeune of the Evansville (Ind.) club, Central league, threw the sphere 426 feet 6 1/4 inches. The old record, made in Brooklyn, N. Y., Oct. 15, 1872, by John Hatfield, was 400 feet 7 1/4 inches.

CONSECUTIVE HIT RECORD.

Jack Ness, first baseman of the Oakland (Cal.) team, established a new record in 1915 of hitting safely in forty-nine consecutive games. His first failure was on July 22, when Art Fromme, pitcher of the Vernon team, faced him. The former record was held by Ty Cobb, who hit safely in forty consecutive games.

RECORD FOR CONSECUTIVE VICTORIES

The mark of twenty consecutive victories set by the Providence club of the National league in 1884 was beaten by the New York national league team in 1916, when it scored twenty-six straight victories.

YACHTING.

THE AMERICA'S CUP.

Record of Races.

1851—Aug. 22. In this, the year of the great exhibition in London, the Royal Yacht Club of England offered a cup to the winner of a yacht race around the Isle of Wight. The course was 60 miles in length. The race was won by the schooner yacht America, designed by George Steers for John C. Stevens of the New York Yacht club. The America was 94 feet over all. 88 feet on the water line, 22½ feet beam and 11½ feet draft. There was no time allowance and the competing yachts ranged in size from a three-masted 392-ton schooner, the Brilliant, to the 47-ton cutter the Aurora, which came in second in the race. The time of the America was 10 hours and 34 minutes; that of the Aurora was 24 minutes slower. The cup after that became known as the America's cup and has now been successfully defended for sixty-eight years.

1870—Aug. 8. New York Yacht club course: Magic, 3:58:21; Cambria, 4:37:38.

Owing mainly to a disagreement as to the proper size of the competing yachts no races were arranged after 1903 until 1913, when an agreement was reached between the New York Yacht club and the Royal Ulster club to hold a race in 1914. Sir Thomas Lipton sent over the Shamrock IV. as challenger for the cup, but the great war in Europe put a stop to all further proceedings.

RECORD BROKEN BY McLEAN.

Robert McLean lowered the world's record for $\frac{1}{2}$ mile to 1:15 on the Lake Placid club's quarter mile track at Lake Placid, N. Y., Feb. 16, 1918. The former record of 1:15 was made by John S. Johnson in 1896. McLean also skated 100 yards in :09 7-10, one-tenth of a second below Johnson's professional record, made in 1893, and one-tenth of a second slower than Morris Wood's amateur record of 1903.

NEW RECORDS BY MATHISEN.

Oscar Mathisen without a pacemaker and from a standing start made three world's records for indoor rinks at Superior, Wis., Feb. 17, 1918. He skated one-half mile in 1:12 $\frac{1}{2}$, a mile in 2:32 $\frac{1}{2}$, and three miles in 8:18 $\frac{1}{2}$. The skating was made on a true course measured by a city surveying crew.

FRANKLIN SKATING DERBY.

The first annual skating Derby of the Franklin Skating and Athletic club took place in Humboldt park, Chicago, Jan. 13, 1918. The feature event was the two-mile handicap, which was won by Sigurd ("Brick") Larsen of the Norwegian Turners. Starting from scratch he came in first in 6:21. The class A one-mile race was won by Roy McWhirter of the Illinois Athletic club in 3:26 $\frac{1}{2}$. The one-mile class B race was won by Olsen of the Norwegian Turners in 3:44 $\frac{1}{2}$. The Norwegian Turners won the meet with 21 points, to 20 for the Northwest Skating club and 11 for the Franklin Skating club.

LIGHTNING SKATING DERBY.

The first annual skating Derby of the Lightning Athletic club was held in Humboldt park, Chicago, Jan. 20, 1918, and was won by the Norwegian Turners with 27 points to 20 points for the Franklin Skating and Athletic club. The other organizations represented made from 1 to 6 points each. Harry Nelson of the Norwegian Turners was the star of the meet, winning the feature event, a two-mile handicap, in 6:26 $\frac{1}{2}$. He had an allowance of 250 yards.

NORWEGIAN TURNERS' TOURNEY.

The Norwegian Turners won their own annual skating tourney at Humboldt park Feb. 23 with a total of 23 points. The Lightning Athletic club was second with 8 points and the Northwest Sportsmen's club third with 6. Sigurd Larsen of the Turners was the star of the meet, taking the two-mile handicap race and the one-mile race for class A skaters. In the two-mile race, the feature event of the day, Larsen started from scratch and came in winner in 6:11 $\frac{1}{2}$. He won the class A mile race in 3:12 $\frac{1}{2}$.

SLEIPNER SKATING DERBY.

The twenty-second annual skating Derby of the Sleipner Athletic club at Humboldt park, Chicago, Jan. 1, 1918, was won by the Franklin Skating and Athletic club with a total of 21 points. The Norwegian Turners were second with 13 points and the Northwest Sportsmen's club third with 10 points. The one-mile relay race, which was the feature of the day, was won by the Northwest club in 3:10 $\frac{1}{2}$, giving it permanent possession of the Daniel Herlihy trophy.

SILVER SKATES DERBY.

Sigurd ("Brick") Larsen of the Norwegian Turners won the second annual Silver Skates Derby at Humboldt park, Feb. 10, 1918. He made the distance of two miles in 8:57 $\frac{1}{2}$, though the ice was soft and in poor condition. Charley Fisher was second in 9 flat.

NORTHWEST S. C. DERBY.

The Northwest Sportsmen's club won the twenty-seventh annual ice skating Derby given under its own auspices at Humboldt park, Feb. 17, 1918. The Washington Park Skating club of Milwaukee was second with 13

points and the Norwegian Turners third with 9 points. Art Staff was the star of the meet, winning the one-mile class A race and the three-quarter-mile race. The ice was in poor condition.

TRAP SHOOTING.**GRAND AMERICAN HANDICAP.**

The nineteenth annual Grand American handicap shoot at inanimate targets took place on the grounds of the South Shore Country club, Chicago, Aug. 3-9, 1918. The grand handicap was won by John D. Henry of Elkhart, Ind., after a shootout with H. J. Pendergast of Phoenix, N. Y. Each made 97 in the general competition. In the shootout Henry made 18 and Pendergast 17. THREE CUSHION LEAGUE

The Interstate Three Cushion league season ended May 18, 1918, with Pierre Maupome the winner with a score of 42 games won to 14 games lost. John Layton was second and Otto Reisel third. Four players had best games of 37 innings, these being the three men named and Bob Cannefax.

AMBULANCE FUND TOURNAMENT.

August Kieckhefer of Chicago won the American Billiard Players' Ambulance Fund tournament held in Chicago and ending Feb. 21, 1918, with a score of ten games won to three lost. It was one of the most remarkable tournaments in the history of the three cushion game for good playing and closeness of finish. Had Bob Cannefax of St. Louis defeated Kieckhefer in the last game of the series there would have been a triple tie.

Both the Chicago Athletic association and the Illinois Athletic club claimed the national swimming championship because of a dispute arising out of the manner in which the water polo event was decided. The contest was to have been decided in the I. A. C. tank April 4, but the Great Lakes team was unable to take part. The C. A. A. refused to permit new pairings and claimed a forfeit under a previous agreement. The championship committee of the N. A. A. U. upheld this claim, but President Charles A. Dean ordered games played May 14 when the I. A. C. team defeated the Great Lakes team 5 to 2. Under the committee ruling the C. A. A. won the championship with 39 points, Great Lakes being second with 28 points and the I. A. C. third with 25 points. Under President Dean's ruling the I. A. C. was first with 40 points, Great Lakes second with 37 points, the Olympic A. C. third with 17 points and the C. A. A. fourth with 15 points. Sept. 22 the championship committee of the N. A. A. U. officially awarded the Chicago Athletic association first and second places in the polo event, giving the organization the national indoor swimming championship.

TWENTY-FOUR HOUR RECORD.

Joe Dawson in a Chalmers car made a new world's record for twenty-four hours by running 1,900½ miles on the Sheepshead Bay speedway Aug. 2, 1917. The best previous record was 1,819 miles by Ralph Mulford on the same track May 1-2, 1916.

ONE-HOUR RECORD.

Driving a Packard on the Sheepshead Bay speedway at New York Nov. 12, 1917, Ralph De Palma made 112.4 miles in one hour. The best previous record was 107 miles by Jean Chassagne on the Brooklands track, England, in 1910.

TRANSCONTINENTAL RECORDS.

The coast to coast records were established in 1916. In the order of their occurrence the performances were as follows:

Robert Hammond in an Empire car drove from San Francisco to New York, a distance by the route taken of 3,284 miles, in 6 days 10 hours 59 minutes May 16-23. This lowered the record set the previous week by a Cadillac eight cylinder car, which made the trip from Los Angeles to New York in 7 days 11 hours 52 minutes.

Driving a Marmon 34, S. B. Stevens arrived in San Francisco at 5 p. m., July 29, just 5 days 18 hours 30 minutes out from New York city.

W. F. Sturm, driving a Hudson Super-Six, made the distance from San Francisco to New York in exactly 5 days 3 hours 51 minutes Sept. 13-18 and then made the return trip in 5 days 17 hours 32 minutes, making the time for the round trip 10 days 21 hours 3 minutes. The distance traveled was 6,592 miles.

CHICAGO-NEW YORK RECORD.

B. F. Durham and Al Walden drove from Chicago to New York in 31 hours flat June 6-7, 1916, the total mileage by the route taken being 1,047.

SPEEDWAY RACING IN 1918.

On account of the great war speedway motor racing in 1918 was limited and on the whole not of a sensational character. Following were the principal events:

Uniontown, Pa., May 16—Barney Oldfield defeated Louis Chevrolet in five lap race (slightly more than five miles) in 3:18.51. The Liberty sweepstakes, five heats of twenty-four laps each, was won by Ralph Mulford in 15:58.52.

Sheepshead Bay, N. Y., June 1—Harkness handicap, 100 miles; won by Ralph de Palma with a Packard, in 0:53:21. Louis Chevrolet in a Frontenac won the 10-mile futurity race in 5:57 1/2.

Chicago, June 22—Derby handicap, 100 miles, won by Louis Chevrolet (Frontenac), in 55:29.6.

Cincinnati, July 4—Liberty handicap, 100 miles, won by Ralph de Palma (Packard), in 58:11.4.

Sheepshead Bay, N. Y., Aug. 17—International sweepstakes won by Ralph de Palma. Time in 2-mile race, 1:05.6; in 10-mile race, 5:23.8; in 30-mile race, 16:31.2; in 50 mile race, 27:29.2.

Uniontown, Pa., July 18—112 mile Derby won by Louis Chevrolet (Frontenac), in 1:11:22.4.

Uniontown, Pa., Sept. 2—100 lap race won by Ralph Mulford (Frontenac), in 1:10:11.1.

CAPITAL PUNISHMENT IN THE UNITED STATES.

Capital punishment prevails in all of the states of the union except Arizona, Kansas, Maine, Minnesota, Missouri, North Dakota, Oregon, Rhode Island, Washington and Wisconsin. In Michigan the only crime punishable by death is treason. The death penalty was abolished in the state of Washington in 1913. It was abolished in Iowa in

1872 and restored in 1878. It was also abolished in Colorado in 1897, but was restored in 1901. Hanging is the ordinary mode of execution, but in Arkansas, Indiana, Massachusetts, New York, Nebraska, Ohio, Pennsylvania, Vermont and Virginia electrocution is the legal method. In Nevada hanging or shooting is optional with the condemned.

POTASH PRODUCTION IN THE UNITED STATES.

At the direction of the president, the chemicals division of the war industries board in December, 1918, turned over to the department of the interior the problem of increasing the potash production of the United States. This action was taken in order that an established branch of the government may permanently set itself to the task of emancipating the American farmer from the grip of Germany's monopoly on the world's supply of fertilizer material.

Before the signing of the armistice the war industries board had already attacked the problem. Chairman Baruch himself had appeared before a congressional committee in behalf of an amendment to the revenue bill which would give encouragement to private industries which would undertake the risk of establishing potash production in this country. The chemicals division on the other hand, in co-operation with other departments of the government, had turned its attention to the specific task of extracting potash from waste products. A committee of experts, representing the steel and iron industry of the country and certain scientific departments of the government, was in process of formation, under the auspices of the chemicals division, at the time hostilities ceased. Its purpose was to determine as quickly as possible the feasibility, from a commercial standpoint, of extracting potash from the fumes of blast furnaces.

Prior to the outbreak of the war, Germany, by reason of her monopoly of the potash supply, had gradually extended her arm around the food crops of the world. It was to Germany that the farmers of this and other countries had to look for the principal ingredients of their fertilizers. Nowhere else were to be found the vast potash deposits, contained in rock salt, which insured to the German potash exporters a natural supply sufficient to meet the demands of the world for several thousands of years to come.

When the outbreak of the European war suddenly cut off this supply the situation of the American farmer was for a time desperate. Under the stimulus of necessity, efforts were launched by private industries to meet the situation, and in consequence there has been a considerable development in the amount of potash produced in this country. By no means, however, has this development approached the requirements of the country. Before the war the American imports of pure potash from Germany for the year ending July, 1914, amounted approximately to 250,000 tons. In 1917 there were produced in the United States 32,000 tons, and in 1918 it was estimated that the output would amount to about 60,000 tons.

The war industries board undertook to approach the problem in a larger way, and it is proposed by arrangement between the chemicals division and the department of the interior for the program to be carried forward by the latter department.

The suggestion of extracting potash from blast furnace fumes is based on the fact that potash in varying quantities is found not only in the iron ores but in the coke and lime used in reducing the ores. In Alabama the ores are particularly rich in potash. At present this potash is allowed to escape during the processes of the blast furnaces. Divided into microscopic particles of dust it is volatilized and carried off with the waste fumes.

Several methods of saving this potash have been suggested by scientists. Of these the most feasible appears to be the electric precipitation process devised by Dr. Fred D. Cottrell of the bureau of mines. This involves cooling the gases as they emerge from the blast furnaces and passing them through a series of sheet-steel tubes eight to twelve

inches in diameter. Through the center of these tubes is run a wire, or chain, carrying a high-voltage charge of static electricity. This electric charge tends to electrify the fine particles of potash dust, causing them to consolidate or "colonize" and drop down the sides of the tubes. A fair-sized installation for this process requires as many as 400 of these tubes through which to pass the gases. It is this process which the Bethlehem Steel company has experimented with on a small scale.

Another method tried out involves the spraying of the gas fumes with water and passing them through moist bags, which retain the potash. This method has been tried out in extracting potash from the fumes given off in the manufacture of cement. Its first practical application took place when a cement plant located near Redlands, Cal., undertook, in response to neighborhood protests, to cut down the volume of fumes emitted from its chimneys. Other cement plants have tried it out, and in the east the Security Cement and Lime company at Hagerstown, Md., has been foremost in the recovery of potash from cement dust. Cement mixture contains potash in proportions varying from 1 per cent to 1½ per cent. When calcining cement clinkers the addition of salt to the coal that is burned in the kiln renders the potash soluble in water.

At a conference of experts held in the office of C. H. MacDowell, director of the chemicals division of the war industries board, the opinion prevailed that it would be entirely feasible to develop commercially a method of extracting the potash from blast furnace fumes, particularly in regions where the blast furnaces are located near ores in which potash occurs in quantities sufficient to insure substantial recoveries. The problem presents many technical difficulties, since care must be taken in developing a by-product process not to interfere with the primary output.

The potash deposits in Germany resulted from the crystallization of sea water. In all of the 202 mines in that country, the potash is found in water-soluble form and for certain purposes can be used just as it comes from the mines without further refining. At Searles Lake, Cal., potash in this water-soluble form has been found in small quantities, and two factories have been established there to extract it. In Nebraska it has been possible to recover potash in fair quantities from certain alkali lakes located in that state. In Utah Mr. MacDowell himself established a plant at which pure potash is recovered from alunite.

Elsewhere experiments have been made in recovering potash from certain by-products such as beet-root molasses and wool scourings. Other sources of supply being studied are the potash shales of Alabama and Georgia, the green sands of New Jersey and the leucite deposits of Wyoming. There is, in fact, a considerable development now under way in the production of potash from leucite; and production likewise has been undertaken in Utah from certain brines contained in salt deposits west of Salt Lake City.

Unquestionably it is going to cost much more to produce potash in Germany and Alsace. War taxes, high food costs and other fundamentals will bring this about so that it will be a long time before European potash is brought to this country at the low cost prevailing before 1914.

SHORTAGE IN WORLD'S SUPPLY OF FATS.

In support of its policy to keep farmers of the United States fully informed of world food conditions and probable needs for certain commodities the United States food administration in December, 1918, completed a summary of

unusual importance to producers. The world balance sheet of food products showed a shortage of 3,000,000,000 pounds of fats and 3,000,000 tons of high protein feeds. Among fats were included pork products, dairy products, and vegetable oils.

Commodities of which there were sufficient supplies, if used with economy, were wheat, rye, beans, peas, rice, and feeds other than those high in protein. Sufficient beef was in sight to load all refrigerating ships to capacity.

There was enough sugar for our normal consumption if other nations retained their present short rations. If they increased their rations, there would be a shortage. Coffee was the only common food commodity of which there was a world surplus. With the possible exception of high protein feeds, the United States had sufficient food and feed for its own people, but to fulfill its pledge of 20,000,000

tons to Europe by July 1, 1919, there must be continued conservation and avoidance of waste.

The world shortage of fats was explained by Mr. Hoover as 'due primarily to the fact that Europe has been steadily underfeeding its dairy herd, has made steady inroads into its herd of hogs during the war, and to the facts that there has been a great degeneration in the production of vegetable oils in certain regions owing to the inability to secure shipping.'

According to food administration calculations, even with all our supplies and best efforts, the world will be far deficient in its normal amounts of fats for two or three years at least. The future of the American producer who is equipped for general farming seems to lie in liberal crops of meat products and home-grown feeds with which to grow live stock economically.

PRESIDENT WILSON'S APPEAL

President Wilson issued the following appeal to the voters of the United States Oct. 25, 1918:

"My Fellow Countrymen: The congressional elections are at hand. They occur in the most critical period our country has ever faced or is likely to face in our time. If you have approved of my leadership and wish me to continue to be your unembarrassed spokesman in affairs at home and abroad, I earnestly beg that you will express yourselves unmistakably to that effect by returning a democratic majority to both the senate and house of representatives.

"I am your servant and will accept your judgment without cavil, but my power to administer the great trust assigned me by the constitution would be seriously impaired should your judgment be adverse, and I must frankly tell you so, because so many critical issues depend upon your verdict. No scruple of taste must in grim times like these be allowed to stand in the way of speaking the plain truth.

"I have no thought of suggesting that any political party is paramount in matters of patriotism. I feel too deeply the sacrifices which have been made in this war by all our citizens irrespective of party affiliations to harbor such an idea. I mean only that the difficulties and delicacies of our present task are of a sort that makes it imperatively necessary that the nation should give its undivided support to the government under a unified leadership and that a republican congress would divide the leadership.

"The leaders of the minority in the present congress have unquestionably been pro-war, but they have been anti-administration. At almost every turn since we entered the war they have sought to take the choice of policy and the conduct of the war out of my hands and put it under the control of instrumentalities of their own choosing.

"This is no time either for divided council or for divided leadership. Unity of command is as necessary now in civil action as it is upon the field of battle. If the control of

FOR A DEMOCRATIC CONGRESS.

the house and senate should be taken away from the party now in power an opposing majority could assume control of legislation and oblige all action to be taken amidst contest and obstruction.

"The return of a republican majority to either house of the congress would moreover be interpreted on the other side of the water as a repudiation of my leadership. Spokesmen of the republican party are urging you to elect a republican congress in order to back up and support the president, but even if they should in this impose upon some credulous voters on this side of the water they would impose on no one on the other side. It is well understood there as well as here that the republican leaders desire not so much to support the president as to control him.

"The peoples of the allied countries with whom we are associated against Germany are quite familiar with the significance of elections. They would find it very difficult to believe that the voters of the United States had chosen to support their president by electing to the congress a majority controlled by those who are not in fact in sympathy with the attitude and action of the administration.

"I need not tell you, my fellow countrymen, that I am asking your support not for my own sake or for the sake of a political party, but for the sake of the nation itself in order that its inward unity of purpose may be evident to all the world. In ordinary times I would not feel at liberty to make such an appeal to you. In ordinary times divided councils can be endured without permanent hurt to the country. But these are not ordinary times.

"In these critical days it is your wish to sustain me with undivided minds I beg that you will say so in a way which it will not be possible to misunderstand either here at home or among our associates on the other side of the sea. I submit my difficulties and my hopes to you.

"WOODROW WILSON."

FOUND EMPLOYMENT FOR MILLIONS.

From its reorganization in January until the end of October, 1918, the United States employment service directed to employment, almost entirely in war industry, approximately 2,500,000 workers. It also increased its local employment offices from ninety to 900 in the same period. These figures represent an increase of about 1,000 per cent in both labor-finding activities and in the establishment of local employment offices.

The steady rate at which the service has grown in extent, and accomplishment is indicated by the fact that in January 62,642 persons were sent to jobs, while in October 547,826 were directed to employment. Furthermore, during the week ending Nov. 2,

the last week but one of war conditions, 162,754 workers were directed—a rate of 650,000 a month.

Returns made by employers and workers show that approximately 2,000,000 of the 2,500,000 workers directed were placed. It is impossible to know how many of the remainder were placed, owing to the failure of some employers and workers to notify the service of the acceptance of workers or jobs.

These totals are proof that the employment service has made good. For at the outset of the reorganization it was estimated that the war industries of the country would require between 2,000,000 and 3,000,000 workers up to the end of 1918.

HAWAIIAN SUGAR INDUSTRY AMERICANIZED.

The following report was issued from the alien property custodian's office in Washington, D. C., in November, 1918:

The powerful German hold on the sugar industry of the Hawaiian islands has been crushed. The control of Hawaii's most important industry has been restored to its people. This is the effect of the announcement of A. Mitchell Palmer, alien property custodian, that he had completed the Americanization of the H. Hackfeld Co., the great German owned corporation which for years has played so important a part in the sugar situation of the Hawaiian islands. In 1917 plantations controlled by this German company produced 140,000 tons of cane sugar.

Mr. Palmer Americanized this German concern by organizing a new company, known as the American Factors (Ltd.), and selling the entire assets and business of the German Hackfeld Co. to the American company, whose stockholders are all loyal American citizens, most of them residents of the Hawaiian islands. As a result 640 American residents of Hawaii have become stockholders in the new corporation, which has a capitalization of \$7,500,000, because the assets of the H. Hackfeld Co. were valued at that amount.

The Americanization of the H. Hackfeld Co. is one of the most important and most interesting of the steps taken by the alien property custodian to crush for all time the German control of America's most important industries. This concern was one of the important links in this control, and was the center of pro-German propaganda in the Pacific.

The H. Hackfeld Co. was capitalized at \$4,000,000. It had undivided profits and reserves amounting to \$3,924,933. In 1917 the net earnings of the corporation were \$1,661,624. Some of the companies which it controlled were: Oahu Sugar Co. (Ltd.), Pioneer Mill Co. (Ltd.), Lihue Plantation Co. (Ltd.), Kakaha Sugar Co. (Ltd.), Maakee Sugar Co., Koloa Sugar Co., Grove Farm Plantation, Waimea Sugar Mill Co., The Kipahulu Sugar Co., and Pacific Guano and Fertilizer Co. (Ltd.).

The American Factors (Ltd.) has a capital of 50,000 shares at a par value of \$150, or \$7,500,000. In comparison with the old capital stock of \$4,000,000 this would make the new shares as of a value of about 187½; in other words, the stockholders of the H. Hackfeld Co. are securing for themselves 7½ per cent more than was stated by the company when under German management to be their true worth or value.

The shares in the American Factors (Ltd.) were offered to the public, and no one individual was allowed to buy more than 500 shares. Corporations or groups of persons, including families of not less than five, were permitted to subscribe to a maximum amount of 2,500 shares; the amounts of these subscriptions were subject to a reduction, the smallest subscribers receiving preference in every case.

The subscribers received stock trust certificates which when surrendered on the expiration of three years after the date of the termination of war between the United States and Germany entitle the holder to receive the certificate of stock mentioned in the stock trust certificate and until then to receive the payments equal to the dividends, if any have been collected by the trustees. All of the shares of stock will be transferred to seven trustees under trust agreement to continue during the war with Germany and thereafter for three additional years. All subscribers were obliged to satisfy the alien property custodian as to their loyalty.

The trustees selected to manage the American Factors (Ltd.) are George Sherman, R. A. Cooke, F. C. Atherton, C. R. Hemenway, Richard H. Trent, A. W. T. Bottomley, and G. T. Wilcox, all of Honolulu.

The H. Hackfeld Co. was controlled by J. F. Hackfeld, a subject and resident of Germany, through J. F. Hackfeld (Ltd.), which was organized for the purpose of naturalizing himself as far as possible without having to take the oath of allegiance to the United States. He went to the Hawaiian Islands many years ago and built up a business which, with the assistance given him under the kartel system, amounted to many millions of dollars when the United States entered the European war.

According to the by-laws of the H. Hackfeld Co. there were only three officers, and in case of the death or disability of any officer, the officer of the next rank automatically filled the position. The by-laws also provided that any one officer had the authority in case of the absence of the rest of the officers to perform any act deemed necessary, the same as if all were present. The three officers of the company were J. F. Hackfeld, George Rodiak and J. F. C. Hagens.

In January of this year (1918) J. F. Hackfeld was in Germany, and George Rodiak, the next ranking officer of the corporation, was in San Francisco, having been convicted of violating the neutrality laws of the United States. Hagens remained in Honolulu and on Jan. 10 he called a meeting of H. Hackfeld (Ltd.) and sold six American citizens 11,000 shares in the Hackfeld Co. These 11,000 shares, together with the holdings of Hagens and German naturalized Americans, and one American family, made the control of H. Hackfeld Co. Mr. Palmer persuaded the Americans who purchased this stock to rescind the sale.

The H. Hackfeld Co., through its subsidiary companies, has been practically the deciding factor in the sugar industry in the Hawaiian islands. They have ordinarily produced from 20 to 30 per cent of the sugar of the islands. The company is one of many ramifications. They own or control the Pacific Guano and Fertilizer Co. (Ltd.), which furnishes phosphates to the Hawaiian sugar growers; they have in the past brought this phosphate from South America in their own boats to the Hawaiian islands.

H. Hackfeld Co. also conducted a general merchandise business, wholesale as well as retail, and owned the B. F. Ehlers Co., of Honolulu, which is the largest department store west of San Francisco. The company has branches in New York and San Francisco. This is now known as the Liberty store.

George Rodiak, one of their former officers, pleaded guilty in the courts of the United States in San Francisco to having violated the neutrality laws of the United States, in that he fitted out certain ships in order that these ships might assist the German raiders in the Pacific ocean. At the outbreak of the European war in 1914 ships flying the German flag which entered the port of Honolulu for harbor were taken care of by H. Hackfeld Co. The Pommern was one of these vessels; she came from Australia with a cargo of British merchandise. It is said that H. Hackfeld Co. assisted the German raiders on the Pacific ocean in replenishing their supplies, especially with coal.

All enemy-owned property in the Hawaiian islands, Philippines, Porto Rico, Panama, the Virgin islands, and the other insular possessions has been administered by the alien property custodian through the division of insular possessions, of which Walter D. Denegre is chief.

PROCLAMATION OF WAR AGAINST AUSTRIA-HUNGARY.

President Woodrow Wilson on Dec. 11, 1917, issued the following:

By the president of the United States of America—a proclamation:

Whereas, the congress of the United States, in the exercise of the constitutional authority vested in them, have resolved, by joint resolution of the senate and house of representatives bearing date of Dec. 7, 1917, as follows: "Whereas, the imperial and royal Austro-

Hungarian government has committed repeated acts of war against the government and the people of the United States of America; therefore be it

"Resolved by the senate and house of representatives of the United States of America in congress assembled, That a state of war is hereby declared to exist between the United States of America and the imperial and royal Austro-Hungarian government; and that the president be, and he is hereby, authorized and directed to employ the entire naval and military forces of the United States and the resources of the government to carry on war against the imperial and royal Austro-Hungarian government; and to bring the conflict to a successful termination all the resources of the country are hereby pledged by the congress of the United States."

Whereas, by sections 4067, 4068, 4069 and 4070 of the revised statutes, provision is made relative to natives, citizens, denizens or subjects of a hostile nation or government, being males of the age of 14 years and upward, who shall be in the United States and not actually naturalized;

Now, therefore, I, Woodrow Wilson, president of the United States of America, do hereby proclaim to all whom it may concern that a state of war exists between the United States and the imperial and royal Austro-Hungarian government, and I do specially direct all officers, civil or military, of the United States that they exercise vigilance and zeal in the discharge of the duties incident to such a state of war; and I do, moreover, earnestly appeal to all American citizens that they, in loyal devotion to their country, dedicated from its foundation to the principles of liberty and justice, uphold the laws of the land and give undivided and willing support to those measures which may be adopted by the constitutional authorities in prosecuting the war to a successful issue and in obtaining a secure and just peace;

And, acting under and by virtue of the authority vested in me by the constitution of the United States and the aforesaid sections of the revised statutes, I do hereby further proclaim and direct that the conduct to be observed on the part of the United States toward all natives, citizens, denizens or subjects of Austria-Hungary, being males of the age of 14 years and upward who shall be within the United States and not actually naturalized, shall be as follows:

All natives, citizens, denizens or subjects of Austria-Hungary, being males of 14 years and upward, who shall be within the United States and not actually naturalized, are enjoined to preserve the peace toward the United States and to refrain from crime against the public safety, and from violating the laws of the United States and of the states and territories thereof, and to refrain from actual hostility or giving information, aid or comfort to the enemies of the United States, and to comply strictly with the regulations which are hereby or which may be from time to time promulgated by the president; and so long as they shall conduct themselves in accordance with law they shall be undisturbed in the peaceful pursuit of their lives and occupations, and be accorded the consideration due to all peaceful and law-abiding persons, except so far as restrictions may be necessary for their own protection and for the safety of the United States; and toward such of said persons as conduct themselves in accordance with law all citizens of the United States are enjoined to preserve the peace and to treat them with all such friendliness as may be compatible with loyalty and allegiance to the United States.

And all natives, citizens, denizens or subjects of Austria-Hungary, being males of the age of 14 years and upward, who shall be within the United States and not actually naturalized, who fail to conduct themselves as so enjoined, in addition to all other penalties pre-

scribed by law shall be liable to restraint, or to give security or to remove and depart from the United States in the manner prescribed by sections 4069 and 4070 of the revised statutes and as prescribed in regulations duly promulgated by the president;

And pursuant to the authority vested in me, I hereby declare and establish the following regulations, which I find necessary in the premises and for the public safety:

(1) No native, citizen, denizen or subject of Austria-Hungary, being a male of the age of 14 years and upward and not actually naturalized, shall depart from the United States until he shall have received such permit as the president shall prescribe, or except under order of a court, judge or justice, under sections 4069 and 4070 of the revised statutes;

(2) No such person shall land in or enter the United States, except under such restrictions and at such places as the president may prescribe;

(3) Every such person of whom there may be reasonable cause to believe that he is aiding or about to aid the enemy, or who may be at large to the danger of the public peace or safety, or who violates or attempts to violate, or of whom there is reasonable ground to believe that he is about to violate any regulation duly promulgated by the president, or any criminal law of the United States, or of the states or territories thereof, will be subject to summary arrest by the United States marshal or his deputy, or such other officers as the president shall designate, and to confinement in such penitentiary, prison, jail, military camp or other place of detention as may be directed by the president.

This proclamation and the regulations herein contained shall extend and apply to all land and water, continental or insular, in any way within the jurisdiction of the United States.

In witness whereof, I have hereunto set my hand and caused the seal of the United States to be affixed.

Done in the District of Columbia this eleventh day of December, in the year of our Lord one thousand nine hundred and seventeen and of the independence of the United States the one hundred and forty-second.

WOODROW WILSON.

By the president:

ROBERT LANSING, Secretary of State.

PANAMA VS. AUSTRIA-HUNGARY.

The republic of Panama, which declared war on Germany April 7, 1917, followed the example of the United States with regard to Austria-Hungary and formally declared war on the dual monarchy Dec. 10, 1917, the national assembly passing the following resolution:

"The national assembly of Panama: In view of the message of the president in which he advises the national assembly of the declaration of war made by the congress of the United States of America on the Austro-Hungarian empire and considering that the republic of Panama has expressed before in its laws and resolutions its firm willingness to lend to the United States of America all the powers and co-operation it may be capable of in the present war, making common cause with the democratic nations which are fighting to impede the predominance of the world by the Teuton powers, be it

"Resolved, That the republic of Panama be declared in a state of war from to-day, Dec. 10, 1917, with the Austro-Hungarian empire.

"That the president be invested with the necessary powers to co-operate with the United States of America in the prosecution of the war in accordance with the principles of international law."

GUATEMALA AT WAR WITH GERMANY.

Guatemala, which broke off diplomatic relations with Germany April 28, 1917, entered the ranks of the allies when on April 21, 1918,

it adopted a decree assuming the same attitude of belligerency toward the German empire as the United States. Robert Lansing, the secretary of state, was notified of the action in the following note from the Guatemalan minister in Washington:

"Mr. Secretary of State: I have to-day [April 21] received from the president of Guatemala a cablegram saying:

"Minister of Guatemala, Washington:

"By decree dated to-day of the national legislative assembly, Guatemala assumes the same attitude of belligerency toward the German empire as the United States.

"M. ESTRADA, C."

"In having the honor of transmitting to your excellency the president's cablegram, and pending receipt of a copy of the decree of the national legislative assembly, it is, as always, a pleasure to me to make known to your excellency the decision of the government of Guatemala in accordance with the desires of her people to stand beside the United States in defense of the rights of America and of humanity so ruthlessly and persistently menaced by the German autocracy in their efforts to substitute throughout the world a military despotism for liberty and civilization.

"Guatemala, like the United States, will maintain her belligerency until a stable peace founded on respect for right and justice can be established as a guaranty to the nations. I seize this opportunity to reiterate to your excellency the assurance of my highest consideration.

JOAQUIN MENDEZ."

NICARAGUA DECLARES WAR ON GERMANY.

With only four dissenting votes the congress of Nicaragua declared war May 7, 1918, on Germany and her allies. The action was taken at the suggestion of President Chamorro. The congress also adopted a declaration of solidarity with the United States and other American republics at war with Germany and Austria-Hungary and authorized the president to take steps for the utilization in full measure of the nation's forces in the war.

HAITI DECLARES WAR ON GERMANY.

The council of state of Haiti, acting in accordance with the legislative powers given it under the new constitution, on the 15th of July, 1918, unanimously voted a declaration of war on Germany as demanded by the president of the republic.

HONDURAS DECLARES WAR ON GERMANY.

Honduras, which broke diplomatic relations with Germany May 18, 1918, followed that action July 19 with a formal declaration of war.

BATTLE NAMES ON AMERICAN BANNERS.

When Marshal Foch received the distinguished service cross presented to him in the name of President Wilson by Gen. Pershing at Senlis, France, Nov. 12, 1918, the commander in chief of the allies said:

"I shall never forget that tragic day in March when you placed at my disposition the entire resources of your army. To-day we have gained the greatest battle in history and saved the most sacred cause—the liberty of the world.

"For the last two months the American army has fought in a most difficult region a fierce and ceaseless battle. For all time the words 'La Meuse' can be borne with merited pride upon the standards of the American army."

CASUALTIES IN THE WAR.

No comprehensive or reliable compilation of the total casualties in the war has yet been made owing to the absence of official figures from some of the combatants. The following figures were the best available up to Dec. 5, 1918:

AMERICAN.

Gen. Pershing reported the casualties in the American expeditionary forces up to Nov. 26, 1918, to be:

Killed in action, 28,363.

Died of wounds, 12,101.

Died of disease, 16,034.

Died of other causes, 1,980.

Total dead, 58,428.

Missing in action, 14,290.

Prisoners, 2,163.

Severely wounded, 54,761.

Undetermined, 43,168.

Slightly wounded, 92,036.

Total wounded, 189,955.

Total casualties, 264,846.

Later reports added 4,310 to the number killed in action or died of wounds; 1,823 to the number of dead of disease and 10,330 to the number of casualties, thus making the total reach 281,309.

Naval.

On Nov. 26 Surgeon-General Braisted announced that the deaths in the United States navy from "war causes" amounted to 1,233.

BRITISH.

British casualties during the war, including all the theaters of activities, totaled 3,049,991. It was announced in the house of commons by James Ian MacPherson, parliamentary secretary for the war office. Of this number the officers killed, wounded or missing aggregated 142,634 and the men 2,907,357.

The total of British losses in killed on all fronts during the war was 658,665, the secretary said. Of these 37,836 were officers and 620,829 were men.

The total British wounded in the war was more than 2,000,000, the parliamentary secretary's figures showing the aggregate to be 2,032,122. The losses in missing, including prisoners, totaled 359,145. Of the wounded 92,644 were officers and 1,939,478 were men.

Of the missing including prisoners 12,094 were officers and 347,051 were men. The figures given include troops from India and the dominions.

The total casualties in France and Belgium were 2,719,652. Of this total 32,769 officers were killed and died of wounds or other causes and 526,843 men. The wounded totaled 1,835,345, comprising 83,142 officers and 1,750,203 men. The missing, including prisoners, totaled 326,695, comprising 10,848 officers and 315,849 men.

In Italy the British losses totaled 6,738. Of these eighty-six officers and 941 men were killed, 334 officers and 4,612 men were wounded. Of the 765 missing thirty-eight were officers and 727 men.

The Dardanelles expedition cost the British 119,729 casualties. Of this number 1,755 officers were killed or died and 31,737 men. The wounded were 3,010 officers and 75,508 men. The missing including prisoners, were 258 officers and 7,431 men.

On the Saloniki front the losses were 27,318. Of these the killed were 285 officers and 7,330 men, the wounded 818 officers and 16,058 men, the missing 114 officers and 2,713 men.

The total British losses in the Mesopotamian campaigns were 97,579, according to Mr. MacPherson's figures. Of these the fatalities were 31,109, comprising 1,340 officers and 29,769 men.

The wounded totaled 51,115, comprising 2,429 officers and 48,686 men. The missing and prisoners totaled 15,355, comprising 566 officers and 14,789 men.

In Egypt the total losses were 57,853. Those killed or who died of wounds were 15,892, comprising 1,098 officers and 14,794 men. The wounded totaled 38,073, comprising 2,311 officers and 35,762 men. The missing and prisoners totaled 3,888, comprising 183 officers and 3,705 men.

It was officially announced Nov. 27 that during the war the forces of Great Britain actually lost nearly 1,000,000 men killed or dead through various causes. Recently it was stated the British losses totaled 658,704, but this number did not take into consideration men reported missing, who actually lost their lives, but of whom there is no trace, nor did it account for men who died at the front from sickness.

Naval.

The British naval casualties from the outbreak of the war to Nov. 11 numbered 39,766, the admiralty announced Nov. 26. These were divided as follows:

Killed or died of wounds, officers..... 2,466
Men 30,895
Wounded, missing or prisoners, officers 1,042
Men 5,363

In addition 14,661 officers and men of British merchant vessels and fishing boats lost their lives by enemy action while pursuing their ordinary vocations, and 3,295 were taken prisoner.

Canadian.

Canada's war casualties up to eleven days before the armistice totaled 211,358. It was announced Nov. 12, 1918. These are classified as follows: Killed in action, 34,877; died of wounds or disease, 15,457; wounded, 152,779; presumed dead, missing in action and known prisoners of war, 8,245.

Australian.

Some conception of what Australia did in the war and of the losses sustained by the commonwealth can be gained from figures which were officially issued Oct. 31, 1918. Out of a population of 5,000,000 Australia sent abroad 336,000 men. The total casualties numbered 290,191, including 54,890 dead. Recruiting in Australia before the armistice was signed was at the rate of 4,240 a month.

GERMAN.

The German losses were placed at 6,330,000 by the socialist newspaper Vorwaerts of Berlin, on Nov. 30. The newspaper's estimate, which was unofficial, said that up to Oct. 31 1,580,000 German soldiers had been killed and the fate of 260,000 was not known. Four million soldiers were wounded and 490,000 were prisoners. This made a total casualty list of 6,330,000.

Karl Bleibtreu, a German military statistician, in a statement published in Das Neue Europa of April 22, 1918, gave the German losses from Aug. 2, 1914, to Jan. 21, 1918, as 4,456,961 men, including only those killed in action or taken prisoners. The figures were official from Aug. 2, 1914, to July 31, 1917, and then estimated to Jan. 31, 1918.

AUSTRO-HUNGARIAN.

It was reported Nov. 29, 1918, that Austria-Hungary had lost 4,000,000 killed and wounded in the war. Of these 800,000 men, including 17,000 officers, were killed in action.

ITALIAN.

The losses in the Italian armies since Italy entered the war amounted to 1,350,000 in killed and permanently disabled, according to a statement by Francesco Nitti, minister of the treasury, in Rome, Sept. 18, 1918.

FRANCE.

No official figures on the French losses had been published up to Dec. 5, 1918. They were estimated in London in November at 1,300,000 killed and 2,000,000 wounded or missing. Considering the number of men in the French armies and the desperate fighting in which they were engaged from the beginning of the war the chances are that the losses were greater than those indicated by the figures given.

TOTAL KILLED OR MORTALLY WOUNDED.

Using the figures as given in the preceding reports as a basis and adding the best available figures as to Russia, Belgium, Serbia, Turkey and Roumania the number of men who were killed in action or died of wounds in the world's war was:

United States	50,000
Great Britain	1,000,000
Germany	1,580,000
Austria-Hungary	800,000
France	1,500,000
Italy	1,000,000
Australia	55,000
Canada	35,000
Russia	1,500,000
Belgium	75,000
Serbia	80,000
Turkey	150,000
Roumania	100,000
Bulgaria	50,000

Total 7,975,000

The total military casualties in the war probably aggregated at least 35,000,000.

FIRST AMERICAN CASUALTIES.

The war department is authority for the statement that Sept. 4 is the anniversary of the first casualties in the American expeditionary force. The four men killed and the nine wounded were members of the medical department of the army, noncombatants engaged in merciful work.

On Sept. 4, 1917, a German airplane attacked the hospital group at Dannes Camiers, where the members of United States army bases No. 5 (Harvard unit, Boston) and No. 12 (Northwestern university, Chicago) were operating British general hospitals Nos. 11 and 18, respectively. Five bombs fell in or close to the ward barracks, and their explosion resulted in the death or injury of the first members of the American expeditionary force killed in the performance of their duty by the enemy.

ROYAL HOUSES DEPOSED BY GREAT WAR.

The world war put an end, apparently forever, to several of the oldest and most powerful dynasties in history and many kings and princes lost their crowns and titles. It has been estimated that at least 278 German monarchs and princes lost their place in the

COST OF THE WAR IN MONEY.

The total estimated cost of the world war in money runs all the way from \$150,000,000,000 to \$200,000,000,000; the latter being the estimate of the federal reserve board in Washington, which made a careful study of the whole matter. In its bulletin issued after the armistice terms were signed the board said:

"According to our calculations, the direct cost of the war, since the outset, can be estimated at an amount somewhere between \$50,000,000,000 and 900,000,000,000 francs [1 franc equals about 20 cents]—not taking into account the amortization of the debt or the total of indemnities.

"We have established the total cost of mobilization and the carrying on of the war at about 50,000,000,000 francs for the first five months; the year 1915 cost at least 130,000,000,000, 1916 probably 190,000,000,000, and 1917 nearly 300,000,000,000 francs. This progression is even more pronounced during the current year, so that we have for the first four years of the war an average monthly cost of 18,250,000,000 francs, with a total of perhaps 875,000,000,000. Calculated on the basis of 5½ per cent interest and ½ per cent monthly amortization (which is certainly a minimum) we reach an annual cost of 52,500,000,000 francs, as against 22,500,000,000 at the end of 1916.

"The immensity of these figures is more forcibly realized when one recalls that before the war the total debt of the seven principal belligerents did not exceed 125,000,000,000 francs; that the annual cost of supporting the debt, including amortization, was only 5,500,000,000 francs, and that the entire wealth, both public and private, of Great Britain, France, Germany, Austria-Hungary and Italy was not more than 1,275,000,000,000 francs. Finally, let us mention as other points of comparison, that, according to recent calculations by the French statistician, M. A. Neymarck, the aggregate of negotiable securities circulating in the world at the close of 1912 was about 850,000,000,000 francs; on the same date, the total amount of gold and silver extracted from the earth since the beginning of the world hardly exceeded 150,000,000,000 francs, while government paper money of all the countries in the world totaled about 41,000,000,000 francs.

"In short, the war has necessitated the creation on a vast scale of new debts and resources, both temporary and permanent. This state of affairs has completely transformed the economic and financial structure of every country. A return in the near future to former conditions of production, consumption and credit cannot be expected."

ANOTHER ESTIMATE.

Other financiers at the close of the war estimated the expenditures of the leading belligerents as follows:

Germany	\$32,400,000,000
Great Britain	31,500,000,000
Russia	23,400,000,000
France	20,000,000,000
United States	20,000,000,000
Austria	12,500,000,000
Italy	6,200,000,000
Turkey	100,000,000

DEBTS OF PRINCIPAL BELLIGERENTS.

The debts of the principal belligerents at the most recent dates for which figures were available (Sept. 27, 1918.) were:

UNITED STATES LIBERTY LOANS.

Up to Dec. 1, 1918, the United States had issued four liberty loans—two in 1917 and two in 1918. The bond issues were authorized by acts of congress approved April 24 and Sept. 24, 1917, and April 4 and July 9, 1918. The terms of the loans were as follows: First loan, 3½ per cent interest, exempt from all except inheritance taxes, and convertible into any subsequent issue at a higher rate. Second loan, 4 per cent interest, exempt from all except federal surtaxes, excess profits, war profits, taxes and inheritance taxes. Third loan, 4½ per cent interest, no conversion, exempt from taxes to same extent as second loan. Fourth loan, same as third loan.

More than 4,000,000 persons subscribed for the first loan, 9,500,000 for the second, 18,300,000 for the third and more than 21,000,000 for the fourth.

LOANS TO ALLIED NATIONS.

From the spring of 1917 the role of banker for the entente was assumed by the United States. On April 24, 1917, the American government was authorized to advance to the allies the sum of \$3,000,000,000; these figures were raised to \$7,000,000,000 after Sept. 24, 1917. In other words, the allies (who paid in the beginning 3 per cent on the American loans, a rate which has gradually been raised to 3½, 4, 4½ and even 5 per cent, this increase being explained by the increase in the rate applied to the bonds of the American treasury) derived great benefit from the excellent credit which the United States treasury had in its country.

At the end of July, 1918, the proportion of American loans advanced to the different countries, in relation to the total credits issued, was as follows: 53 per cent to Great Britain, 27.85 per cent to France, 10.8 per cent to Italy and 5.43 per cent to Russia; this last named country used nothing after March, 1918.

On the side of the central empires, Germany was the great purveyor of funds for her allies. The exact total of the loans issued by the German treasury and by the respective German banks is unknown. She had advanced to Austria at the end of June, 1917, 2,010,000,000 marks. In addition important sums had been advanced to Hungary, Bulgaria and Turkey.

The following table shows the credits extended by the United States to its cobelligerents up to the middle of November, 1918:

Great Britain.....	\$3,945,000,000
France.....	2,365,000,000
Italy.....	1,210,000,000
Russia.....	325,000,000
Belgium.....	192,520,000
Cuba.....	15,800,000
Greece.....	15,800,000
Serbia.....	9,000,000
Czecho-Slovakia.....	7,000,000
Liberia.....	5,000,000
Total.....	\$8,090,120,000

Toward the end of the month the credit extended had reached a total of \$8,178,976,666.

WAR FINANCE METHODS.

On Nov. 22, 1918, the federal reserve board made the following statement:

"The financing of the war is, primarily, an economic problem. It has to do with managing and developing the forces of the country and keeping intact domestic and foreign credit, as well as the spirit of initiative.

"In order to meet the war expenses recourse was had everywhere to well known means employed in former wars. Civil expenditures have been cut down, all those that were not urgent being postponed sine die; economy has been preached more or less successfully; part of the resources of the regular budget has been set apart for war expenses; there have been requisitions; there has been great recourse to banks of issue; there has been borrowing on a large scale, both at home and abroad, in the form of consolidated and floating loans, extension of credit, etc. At an early date the resources were enlarged by the creation of new taxes, permanent and temporary, designed to meet new interest charges on the war debt.

Resort to Taxation.

"In certain countries, England and the United States among others, a more or less important fraction of the war expenses has been met by resorting to taxation. Nevertheless, it is safe to say that the greater part of the cost—according to our calculations, more than four-fifths—has been covered by the operations of the treasury and by loans of more or less distant maturities.

"In certain countries, moreover, special funds ('Tresors de guerre,' etc.) and the surplus from loans have been used to cover a small fraction of the cost of mobilization.

Borrowing as a Means.

"But everywhere the method of borrowing is used as a means of making appeal to the market for capital. Germany began in September, 1914; Austria and Hungary, then Great Britain, Italy and Russia followed, with more or less success. Until the autumn of 1915 France resorted to short term loans (bills and obligations of national defense). Since then consolidated loans have followed at more or less regular intervals. In Germany Austria-Hungary, Italy and also in the United States these consolidation operations have occurred at a more or less fixed date, usually every six months. Thus Germany, Austria and Hungary have each issued eight loans up to the present time; Italy has issued five and the United States four. England and France have been less regular in this respect. Up to the present time each of these two countries has issued only three large consolidated loans, the last of which dates back in Great Britain to January, 1917, and to December, 1917, in France. Meanwhile, a large short term debt has accumulated in these countries, a debt which at the end of June, 1918, amounted to \$3,873,000,000, or 97,500,000,000 francs, for England, and up to the end of last January to almost 46,000,000,000 francs for France. A fairly large fraction of this debt, however, has been contracted abroad.

Loans Placed at Home.

"As a general thing, loans of distant maturities have been placed exclusively at home, while neutral markets, especially the United States, have confined themselves to absorbing short term treasury securities. Aside from the Anglo-French loan, which was placed in New York in the autumn of 1915 and which has a duration of only five years, no loan

on a fairly long term basis could be issued abroad since the beginning of hostilities. Each financial market has therefore had to rely upon its own resources. In spite of the attraction which the low level of the exchanges has offered, the people of the neutral countries have subscribed very little to the war loans of the belligerents, the neutral financial markets having had to contribute largely to their own needs.

Increase in Four Years.

"From August, 1914, to the end of July, 1918, the debts of the principal belligerents, including the British colonies, had increased by 675,000,000,000 francs, 225,000,000,000 of which, approximately, are charged to the central powers and 450,000,000,000 to the allies. It is generally conceded that the expenses of the war are appreciably greater for the entente than for the central powers, a fact which is explained, in part, by the geographical situation of the former and by the possibility and the necessity which confronts them of obtaining supplies from abroad.

"These figures include only a fraction of the treasury bills issued abroad, and do not comprise all the floating debt contracted at home, the consolidation of which will have to be considered sooner or later. For the six great powers included in our calculations the gross debt per capita has increased from 300 francs before the war to almost 2,000 francs at the end of July, 1918.

"The growth of the consolidated and floating war debt has been especially great in Great Britain, Germany and France; the same is true of the United States since its entry into the war at the beginning of April, 1917. As has already been said, the sums, often very important, which have been advanced to the allied governments must be deducted from these totals."

WAR DEBTS OF PRINCIPAL

In April, 1918, the federal reserve board of the United States issued a statement comparing the war expenditures, war debts, note circulation and gold and silver holdings of the twelve principal belligerent nations. It showed that after three and a half years of war the public debts of the chief allied and central powers had risen from \$25,752,000,000 to \$137,404,000,000.

FLOATING OF LOANS.

With the spread of the war over wider and wider areas and the continuous rise of prices, the cost of the war is constantly increasing, calling for larger and larger borrowings by the governments. In floating the huge public loans the governments have had the assistance of the banks, co-operation between the governments and the central banks of issue being particularly close. Loans of a permanent character are, as a rule, preceded by issues in large volume of treasury bills or certificates, a large proportion of which is discounted by the central banks. The amounts of treasury bills and other short-term obligations discounted by the European governments with their central banks have been constantly ris-

ing, partly accounting for the inflation of currency and prices, which, in turn, cause increased borrowings.

In Great Britain temporary borrowings of the government from the bank of England, as a rule, do not cause any increase in note circulation, the government receiving deposit credit for the amounts borrowed. Whatever

addition to note circulation took place there is due to issues of currency notes by the government to the banks largely against the deposit of government and other securities, as distinct from the practice on the European continent, where in most cases notes are primarily issued by the central banks to the governments.

ZIONIST MOVEMENT INDORSERD BY PRESIDENT.

The following letter written by President Wilson to Rabbi Stephen S. Wise, former president of the provisional Zionist committee, was made public Sept. 5, 1918:

"I have watched with deep and sincere interest the reconstructive work which the Weizmann commission has done in Palestine at the instance of the British government, and I welcome an opportunity to express the satisfaction I have felt in the progress of the Zionist movement in the United States and in the allied countries since the declaration by Mr. Balfour on behalf of the British government, of Great Britain's approval of the establishment in Palestine of a national home for the Jewish people, and his promise that the British government would use its best endeavors to facilitate the achievement of that object, with the understanding that nothing would be done to prejudice the civil and religious rights of non-Jewish people in Palestine or the rights and political status enjoyed by Jews in other countries.

"I think that all Americans will be deeply moved by the report that even in this time of stress the Weizmann commission has been able to lay the foundation of the Hebrew University at Jerusalem, with the promise that that bears of spiritual rebirth."

PRINCE LICHNOWSKY'S MEMORANDUM.

GERMANY TO BLAME FOR WAR.

That Germany and not Britain was responsible for the great European war is the opinion expressed by Prince Karl M. Lichnowsky, German ambassador in London from 1912 to August, 1914, in a private memorandum which became public in March, 1918. The disclosures made in this document caused a sensation throughout the civilized world, as they were unquestionably based on fact. They did not change public opinion outside of Germany as to where the guilt for precipitating the mighty struggle lay, but they confirmed it in a most convincing manner. Naturally the pan-Germans were furious, and they accused the former diplomat of high treason against the empire. Prince Lichnowsky disclaimed any intention of having the document made public. He said he wrote it for his family archives and that these "purely private notes found their way into wider circles by an unprecedented breach of confidence."

It appears that a copy of the memorandum reached the German foreign office and another fell into the hands of a member of the socialist minority party in Germany. Still another copy reached the office of the Stockholm Politiken, organ of the extreme left of the Swedish socialist party, which began publishing it on March 15. It was also published in the Vorwaerts in Berlin, in The New Europe of London and subsequently in other newspapers and magazines throughout the world. The memorandum was written at the prince's country seat, Kuchelna, in the summer of 1916 and was finished early in the fall. It is in the form of "notes," and all those published and translated into English are reproduced herewith.

Gets London Embassy.

"Baron Marschall died in September, 1912, having held his post in London for a few months only. His appointment, which was due mainly to his age and the plotting of a younger man to get to London, was one of the many mistakes made by our foreign office. In spite of his imposing personality and great reputation, he was too old and tired to be able to adapt himself to a purely foreign and Anglo-Saxon milieu. He was more of a bureaucrat and a lawyer than a diplomat or statesman. He set to work to convince Englishmen of the harmless character of our fleet, and naturally succeeded in strengthening an entirely opposite impression.

"To my great surprise I was offered the post in October. After many years' work I had withdrawn to the country, as no suitable post had been found for me, and I spent my time on my farm and in my garden, on horseback and in the fields, but I read industriously and published occasional political articles. Thus eight years passed, and thirteen since I had left Vienna as ambassador. That was actually my last political employment. I do not know to whom my appointment in London was due. At all events, not to his majesty, as I did not belong to his immediate set, although he was always gracious to me. I know by experience that his candidates were frequently successfully opposed. As a matter of fact, Herr von Kiderlen-Wächter wanted to send Baron von Stumm to London. He met me at once with undisguised ill-will and tried to frighten me by rudeness. Herr von Bethmann-Hollweg was amiable to me, and had visited me shortly before at Grätz. I am, therefore, inclined to think that they settled on me as no other candidate was available. Had Baron von Marschall not died, it is unlikely that I should have been dug out any more than in previous years. The moment was obviously favorable for an attempt to come to a better understanding with England.

The Morocco Question.

"Our obscure policy in Morocco had repeatedly caused distrust of our peaceful intention, or, at least, had raised doubts as to whether we knew what we wanted or whether our intention was to keep Europe in a state of suspense and, on occasion, to humiliate the French. An Austrian colleague, who was a long time in Paris, said to me: 'The French had begun to forget la revanche. You have regularly reminded them of it by tramping on their toes.' After we had declined Delcasse's offer to come to an agreement regarding Morocco, and then solemnly declared that we had no political interest there—an attitude which agreed with Bismarckian political conditions—we suddenly discovered in Abdul Aziz a Kruger No. 2. To him also, as to the Boers, we promised the protection of the mighty German empire, and with the same result. Both manifestations concluded, as they were bound to conclude with a retraction, as we were not prepared to start a world war. The pitiable conference of Algeiras could alter nothing, and still less cause Delcasse's fall. Our attitude furthered the Russo-Japanese and Russo-British rapprochement. In face of 'the German peril' all other considerations faded into the background. The possibility of another Franco-German war had been patent, and, as had not been the case in 1870, such a war could not leave out Russia or England.

Triple Alliance Valueless.

"The valuelessness of the triple alliance had already been demonstrated at Algeiras, and, immediately afterward, the equal worthlessness of the agreements made there when the sultanate fell to pieces, which was, of course, unavoidable. Meanwhile, the belief was spreading among the Russian people that our foreign policy was weak and was breaking down under 'encirclement,' and that cowardly surrender followed on haughty gestures. It is to the credit of Von Kiderlen-Wächter, though otherwise overrated as a statesman, that he cleared up the Moroccan situation and adapted himself to circumstances which could not be altered. Whether the world had to be upset by the Agadir coup is a question I do not touch. This event was hailed with joy in Germany, but in England caused all the more uneasiness in that the British government waited in vain for three weeks for a statement of our intentions. Mr. Lloyd George's Mansion House speech, intended to warn us, was a consequence. Before Delcasse's fall and before the Algeiras conference we could have obtained harbors and bases on the west coast, but that was no longer possible.

"When I came to London in November, 1912, people had become easier about the question of Morocco, especially since an agreement had been reached with France and Berlin. Lord Haldane's mission had failed. It is true, as we demanded promises of neutrality instead of contenting ourselves with a treaty which would insure us against a British attack or any attack with British support. Sir Edward Grey had not, meanwhile, given up the idea of coming to an understanding with us, and made such an attempt first on economic and colonial grounds. Through the agency of that qualified and expert counselor of embassy, Von Kuehlmann, an exchange of opinions had taken place with regard to the renewal of the Portuguese colonial treaty and the Bagdad railway, which thus carried out the unexpected aim of dividing into spheres of interest both the above-mentioned colonies and Asia Minor. The British statesman, old points in dispute both with France and Russia having been settled, wished to come to a similar agreement with us. His intention was not to isolate us but to make us in so

far as possible partners in a working concern. Just as he had succeeded in bridging Franco-British and Russo-British difficulties, so he wished as far as possible to remove German-British difficulties, and by a network of treaties—which would finally include an agreement on the miserable fleet question—to secure the peace of the world, as our earlier policy had lent itself to a co-operation with the entente, which contained a mutual assurance against the danger of war.

"This was Sir Edward Grey's program in his own words: 'Without infringing on the existing friendly relations with France and Russia—which in themselves contained no aggressive elements and no binding obligations for England—to seek to achieve a more friendly rapprochement with Germany, and to bring the two groups nearer together.'

"In England, as with us, there were two opinions, that of the optimists, who believed in an understanding, and that of the pessimists, who considered war inevitable sooner or later. Among the former were Mr. Asquith, Sir Edward Grey, Lord Haldane and most of the ministers in the radical cabinet, as well as leading liberal organs, such as the Westminster Gazette, the Manchester Guardian and the Daily Chronicle. To the pessimists belong especially conservative politicians like Mr. Balfour, who repeatedly made his meaning clear to me: leading soldiers such as Lord Roberts, who insisted on the necessity of conscription and on 'the writing on the wall'; and further, the Northcliffe press, and that leading English journalist, Mr. Garvin of the Observer. During my term of office they abstained from all attacks and took up personally and politically, a friendly attitude. Our naval policy and our attitude in the years 1905, 1908 and 1911 had, nevertheless, caused them to think that it might one day come to war. Just as with us, the former are now dubbed shortsighted and simpliminded, while the latter are regarded as the true prophets.

Balkan Problems.

"The first Balkan war led to the collapse of Turkey and with it the defeat of our policy, which had been identified with Turkey for many years. Since the salvation of Turkey in Europe was no longer feasible, only two possibilities for settling the question remained. Either we declared we had no longer any interest in the definition of boundaries in the Balkan peninsula, and left the settlement of the question to the Balkan peoples themselves, or we supported our allies and carried out a triple alliance policy in the east, thereby giving up the rôle of mediator.

"I urged the former course from the beginning, but the German foreign office very much preferred the latter. The chief question was Albania. Our allies desired the establishment of an independent state of Albania, as Austria would not allow Serbia to reach the Adriatic, and Italy did not wish the Greeks to reach Valona or even the territory north of Corfu. On the other hand, Russia, as is known, favored Serbian, and France Greek, desires. My advice was now to consider the question as outside the alliance, and to support neither Austrian nor Italian wishes. Without our support the establishment of Albania, whose incapability of existence might have been foreseen, was an impossibility. Serbia would have pushed forward to the coast; then the present world war would have been avoided. France and Italy would have remained definitely divided as to Greece, and the Italians, had they not wished to fight France alone, would have been obliged to consent to the expansion of Greece to the district north of Durazzo. The greater part of civilized Albania is Greek. The southern towns are entirely Greek, and, at the time of the conference of ambassadors, deputations from the

larger towns came to London to carry through the annexation to Greece.

"In Greece to-day whole groups are Albanian, and the so-called Greek national dress is of Albanian origin. The amalgamation of the preponderating Orthodox and Islamic Albanians with the Greek state was, therefore, the best solution and the most natural, if one leaves out of account Scutari and the northern part of Serbia and Montenegro. His majesty was also in favor of this solution on dynastic grounds. When I encouraged the monarch by letter to this effect, I received violent reproaches from the chancellor for supporting Austria's opponents, and he forbade all such interference in the future, and even direct correspondence. We had eventually, however, to abandon the tradition of carrying out the triple alliance policy in the east and to acknowledge our mistake, which consisted in identifying ourselves with the Turks in the south and the Austro-Magyar in the north; for the continuance of that policy, which we began at the congress in Berlin and subsequently carried on zealously, was bound in time, should the necessary skill in conducting it fail, to lead to a collision with Russia and a world war.

"Instead of uniting with Russia on the basis of the independence of the sultan, whom the Russians also did not wish to drive out of Constantinople, and confining ourselves to economic interests in the east, whilst at the same time refraining from all military and political interference and being satisfied with a division of Asia Minor into spheres of interest, the goal of our political ambition was to dominate in the Bosphorus. In Russia, therefore, the opinion arose that the way to Constantinople and to the Mediterranean lay through Berlin. Instead of encouraging a powerful development in the Balkan states, which were once free and are very different from the Russians, of which fact we have already had experience, we placed ourselves on the side of the Turkish and Magyar oppressors. The dire mistake of our triple alliance and our eastern policies, which drove Russia—our natural friend and best neighbor—into the arms of France and England and kept her from her policy of Asiatic expansion, was the more evident, as a Franco-Russian attack, the only hypothesis justifying a triple alliance policy, had to be eliminated from our calculations.

"As to the value of the alliance with Italy, one word only. Italy needs our money and our tourists after the war, with or without our alliance. That our alliance would go by the board in the event of war was to be foreseen. The alliance consequently was worthless.

Austria Depends on Germany.

"Austria, however, needed our protection both in war and peace, and had no other point d'appui. This dependence on us is based on political, national and economic grounds, and is all the greater in proportion to the intimacy of our relations with Russia. This was proved in the Bosnian crisis. Since Count Beust no Vienna minister had been so self-conscious with us as Count Aehrenthal was during the last years of his life. Under the influence of a properly conducted German policy which would keep us in touch with Russia, Austria-Hungary is our vassal and is tied to us even without an alliance and without reciprocal services; under the influence of a misguided policy, however, we are tied to Austria-Hungary. An alliance would therefore be purposeless.

"I know Austria far too well not to know that a return to the policy of Count Felix Schwarzenberg or to that of Count Moritz Esterházy was unthinkable. Little as the Slavs living there love us, they wish just as little for a return to the German kaiserdom, even with a Hapsburg-Lorraine at its head.

They are striving for an internal Austrian federation on a national basis, a condition which is even less likely of realization within the German empire than under the double eagle. Austro-Germans look on Berlin as the center of German power and kultur, and they know that Austria can never be a leading power. They desire as close a connection as possible with the empire, but not to the extent of an anti-German policy.

"Since the '70s the conditions have changed fundamentally in Austria, and also perhaps in Bavaria. Just as here a return to pan-German particularism and the old Bavarian policy is not to be feared, so there a revival of the policy of Prince Kaunitz and Prince Schwarzenberg is not to be contemplated. But by a constitutional union with Austria, which even without Galicia and Dalmatia is inhabited at least to the extent of one-half by non-Germans, our interests would suffer; whilst, on the other hand, by the subordination of our policy to the point of view of Vienna and Budapest, we should have to 'épouser les querelles de l'Autriche.'

"We therefore had no need to heed the desires of our allies. They were not only unnecessary but dangerous, inasmuch as they would lead to a collision with Russia if we looked at eastern questions through Austrian eyes. The transformation of our alliance with its single original purpose into a complete alliance, involving the complexity of common interests, was calculated to call forth the very state of things which the constitutional negotiations were designed to prevent—namely, war. Such a policy of alliances would, moreover, entail the loss of the sympathies of the young, strong and growing communities in the Balkan peninsula, which were ready to turn to us and open their markets to us. The contrast between dynastic and democratic ideas had to be given clear expression, and, as usual, we stood on the wrong side. King Carol told one of our representatives that he had made an alliance with us on condition that we retained control of affairs, but that if that control passed to Austria it would entirely change the basis of affairs, and under those conditions he could no longer participate. Matters stood in the same position in Serbia, where against our own economic interests we were supporting an Austrian policy of strangulation.

"We had always backed horses which, it was evident, would lose, such as Kruger, Abdul Aziz, Abdul Hamid, Wilhelm of Wied, and finally—and this was the most miserable mistake of all—Count Berchtold.

"Shortly after my arrival in London, in 1912, Sir Edward Grey proposed an informal exchange of views in order to prevent a European war developing out of the Balkan war, since, at the outbreak of that war, we had unfortunately declined the proposal of the French government to join in a declaration of disinterestedness and impartiality on the part of the powers. The British statesman maintained from the beginning that England had no interest in Albania, and would, therefore, not go to war on the subject. In his role of 'honest broker' he would confine his efforts to mediation and an attempt to smooth away difficulties between the two groups. He, therefore, by no means placed himself on the side of the entente powers, and during the negotiations, which lasted about eight months, he lent his good will and powerful influence toward the establishment of an understanding. Instead of adopting the English point of view we accepted that dictated to us by Vienna. Count Mensdorff led the triple alliance in London and I was his second.

Grey's Conciliatory Policy.

"My duty was to support his proposals. The clever and experienced Count Szogyenyi was at the helm in Berlin. His refrain was

'*casus federis*,' and when once I dared to doubt the justice of this phrase I was seriously warned against Austrophobia. Referring to my father, it was even said that I had inherited it. On every point, including Albania, the Serbian harbors in the Adriatic, Scutari, and in the definition of the Albanian frontiers, we were on the side of Austria and Italy, while Sir Edward Grey hardly ever took the French or Russian point of view. On the contrary, he nearly always took our part in order to give no pretext for war—which was afterward brought about by a dead archduke. It was with his help that King Nicholas was induced to leave Scutari. Otherwise there would have been war over this matter, as we should never have dared to ask 'our allies' to make concessions.

"Sir Edward Grey conducted the negotiations with care, calm and tact. When a question threatened to become involved he proposed a formula which met the case and always secured consent. He acquired the full confidence of all the representatives.

"Once again we had successfully withstood one of the many threats against the strength characterizing our policy. Russia had been obliged to give way to us all along the line, as she never got an opportunity to advance Serbian wishes. Albania was set up as an Austrian vassal state and Serbia was driven away from the sea. The conference was thus a fresh humiliation for Russia.

"As in 1878 and 1908, we had opposed the Russian program without German interests being brought into play. Bismarck had to minimize the mistake of the congress by a secret treaty, and his attitude in the Battenberg question—the downward incline being taken by us in the Bosnian question—was followed up in London, and was not given up, with the result that it led to the abyss.

"The dissatisfaction then prevalent in Russia was given vent to during the London conference by an attack in the Russian press on my Russian colleague and on Russian diplomacy.

"His German origin and Catholic faith, his reputation as a friend of Germany, and the accident that he was related both to Count Mensdorff and to myself were all made use of by dissatisfied parties. Although not a particularly important personality, Count Benckendorff possessed many qualities of a good diplomat—tact, worldly knowledge, experience, an agreeable personality and a natural eye for men and things. He sought always to avoid provocative attitudes and was supported by the attitude of England and France.

"I once said: 'The feeling in Russia is very anti-German.' He replied: 'There are also many strong influential pro-German circles there. But the people generally are anti-Austrian.'

"It only remains to be added that our exaggerated Austrophilism is not exactly likely to break up the entente and turn Russia's attention to her Asiatic interests.

Balkan Conference.

"At the same time (1913) the Balkan conference met in London, and I had the opportunity of meeting the leading men of the Balkan states. The most important personage among them was M. Venizelos. He was anything but anti-German, and particularly prized the Order of the Red Eagle, which he even wore at the French embassy. With his winning amiability and savoir faire he could always win sympathy.

"Next to him a great role was played by Daneff, the then Bulgarian prime minister and Count Berchtold's confidant. He gave the impression of being a capable and energetic man, and even the influence of his friends at Vienna and Budapest, at which he sometimes laughed, was attributable to the fact that he had let himself be drawn into the second Bal-

kan war and had declined Russian intervention.

"M. Take Jonescu was often in London, too, and visited me regularly. I had known him since the time when I was secretary at Bukharest. He was also one of Herr von Kiderlen-Wächter's friends. His aim in London was to secure concessions for Roumania by negotiations with M. Daneff. In this he was supported by the most capable Roumanian minister, M. Misu. That these negotiations were stranded by the Bulgarian opposition is known. Count Berchtold—and naturally we with him—was entirely on the side of Bulgaria; otherwise we should have succeeded by pressure on M. Daneff in obtaining the desired satisfaction for the Roumanians and have bound Roumania to us, as she was by Austria's attitude in the second Balkan war, while afterward she was estranged from the central powers.

"Bulgaria's defeat in the second Balkan war and Serbia's victory, as well as the Roumanian advance, naturally constituted a reproach to Austria. The idea of equalizing this by military intervention in Serbia seems to have gained ground rapidly in Vienna. This is proved by the Italian disclosure, and it may be presumed that the Marquis di San Giuliano, who described the plan as a 'pericolosissima avventura' [an extremely risky adventure], saved us from a European war as far back as the summer of 1912. Intimate as Russo-Italian relations were, the aspiration of Vienna must have been known in St. Petersburg. In any event, M. Take Jonescu told me that M. Sazonoff had said in Constanza that an attack on Serbia on the part of Austria meant war with Russia.

"In the spring of 1914 one of my secretaries, on returning from leave in Vienna, said that Herr von Tschirschky [German ambassador in Vienna] had declared that war must soon come. But as I was always kept in the dark regarding important things, I considered his pessimism unfounded.

"Ever since the peace of Bukharest it seems to have been the opinion in Vienna that the revision of this treaty should be undertaken independently, and only a favorable opportunity was awaited. The statesmen in Vienna and Bukharest could naturally count upon our support. This they knew, for already they had been reproached several times for their slackness. Berlin even insisted on the 'rehabilitation' of Austria.

Relations with Russia.

"When I returned to London in December, 1913, after a long holiday, the Liman von Sanders question had led to our relations with Russia becoming acute. Sir Edward Grey called my attention with some uneasiness to the consequent unrest in St. Petersburg, saying: 'I have never seen them so excited.' Berlin instructed me to beg the minister to urge calm in St. Petersburg and help to solve the difficulty. Sir Edward was quite willing, and his intervention contributed not inconsiderably to smoothing matters over. My good relations with Sir Edward and his great influence in St. Petersburg served in a like manner on several occasions when it was a question of carrying through something of which our representative there was completely incapable.

"During the critical days of July, 1914, Sir Edward said to me: 'If ever you want something done in St. Petersburg you come to me regularly, but if ever I appeal for your influence in Vienna you refuse your support.' The good and dependable relations I was fortunate in making not only in society and among influential people, such as Sir Edward Grey and Mr. Asquith, but also with others at public dinners, had brought about a noticeable improvement in our relations with England. Sir Edward devoted himself honestly to further this rapprochement, and his in-

tentions were especially noticeable in two questions—the colonial treaty and the treaty regarding the Bagdad railway.

"In the year 1898 a secret treaty had been signed by Count Hatzfeldt [then German ambassador in London] and Mr. Balfour which divided the Portuguese colonies in Africa into economic-political spheres of interest between us and England. As the Portuguese government possessed neither the power nor the means to open up or adequately to administer its extensive possessions, the Portuguese government had already at an earlier date thought of selling these possessions and thereby putting their finances in order. Between us and England an agreement had been reached which defined the interests of the two parties and which was of all the greater value because Portugal, as is well known, is completely dependent upon England. This treaty was no doubt to secure outwardly the integrity and independence of the Portuguese empire, and it only expressed the intention of giving financial and economic assistance to the Portuguese. Consequently it did not, according to the text, conflict with the old Anglo-Portuguese alliance, dating from the fifteenth century, which was last renewed under Charles II. and which guaranteed the territories of the two parties. Nevertheless, at the instance of the Marquis Soveral, who presumably was not ignorant of the Anglo-German agreement, a new treaty—the so-called Windsor treaty—which confirmed the old agreements, was concluded in 1899 between England and Portugal.

African Treaties.

"The object of the negotiations between us and England, which had begun before my arrival, was to alter and amend our treaty of 1898, which contained many impossible features—for example, with regard to the geographical delimitation. Thanks to the conciliatory attitude of the British government, I succeeded in giving to the new treaty a form which entirely accorded with our wishes and interests. All Angola, as far as the 20th degree of longitude, was allotted to us, so that we reached the Congo territory from the south. Moreover, the valuable islands of San Thome and Principe, which lie north of the equator, and therefore really belonged to the French sphere of interest, were allotted to us—a fact which caused my French colleague to make lively although vain, representations. Further, we obtained the northern part of Mozambique; the frontier was formed by the Likungo. The British government showed the utmost readiness to meet our interests and wishes. Sir Edward Grey intended to prove his good will to us, but he also desired to promote our colonial development, because England hoped to divert Germany's development of strength from the North sea and western Europe to the world sea and Africa. 'We don't want to grudge Germany her colonial development,' a member of the cabinet said to me.

"Originally, at the British suggestion, the Congo state was to be included in the treaty, which would have given us a right to pre-emption and a possibility of economic penetration in the Congo state. But we refused this offer, out of alleged respect for Belgian sensibilities. Perhaps the idea was to economize our successes! With regard also to the practical realization of the real but unexpressed object of the treaty—the actual partition at a later date of the Portuguese colonial possessions—the new formulation showed considerable advantages and progress as compared with the old. Thus the treaty contemplated circumstances which would enable us to enter the territories ascribed to us for the protection of our interests. These conditional clauses were so wide that it was really left to us to decide when really 'vital' interests were concerned, so that, in view of the complete dependence of Portugal upon England,

we merely wanted to go on cultivating our relations with England in order, later on, with English assent, to realize our mutual intentions.

"The sincerity of the English government in its effort to respect our rights was proved by the fact that Sir Edward Grey, before ever the treaty was completed or signed, called our attention to English men of business who were seeking opportunities to invest capital in the territories allotted to us by the new treaty, and who desired British support. In doing so he remarked that the undertakings in question belonged to our sphere of interest.

"The treaty was practically complete at the time of the king's visit to Berlin in May, 1913. A conversation then took place in Berlin under the presidency of the Imperial chancellor [Herr von Bethmann-Hollweg] in which I took part and at which special wishes were laid down. On my return to London I succeeded, with the help of my counselor of embassy, Von Kuehlmann, who was working upon the details of the treaty with Mr. Parker, in putting through our last proposals also. It was possible for the whole treaty to be initiated by Sir Edward Grey and myself in August, 1913, before I went on leave. Now, however, new difficulties were to arise, which prevented the signature, and it was only a year later, shortly before the outbreak of war, that I was able to obtain authorization for the final settlement. Signature, however, never took place.

Opposition in Berlin.

"Sir Edward Grey was willing to sign only if the treaty was published, together with the two treaties of 1898 and 1899; England has no other secret treaties, and it is contrary to her existing principles that she should conceal binding agreements. He said, however, that he was ready to take account of our wishes concerning the time and manner of publication, provided that publication took place within one year, at latest, after the signature. In the [Berlin] foreign office, however, where my London successes aroused increasing dissatisfaction, and where an influential personage [the reference is apparently to Herr von Stumm], who played the part of Herr von Holstein, was claiming the London embassy for himself. It was stated that the publication would impair our interests in the colonies, because the Portuguese would show their gratitude by giving us no more concessions. The accuracy of this excuse is illuminated by the fact that the old treaty was most probably just as much long known to the Portuguese as our new agreements must have been, in view of the intimacy of relations between Portugal and England; it was illuminated also by the fact that, in view of the influence which England possesses at Lisbon, the Portuguese government is completely powerless in face of an Anglo-German understanding.

"Consequently it was necessary to find another excuse for wrecking the treaty. It was said that the publication of the Windsor treaty, which was concluded in the time of Prince Hohenlohe, and which was merely a renewal of the treaty of Charles II., which had never lapsed, might imperil the position of Herr von Bethmann-Hollweg, as being a proof of British hypocrisy and perfidy! On this I pointed out that the preamble to our treaties said exactly the same thing as the Windsor treaty and other similar treaties—namely, that we desired to protect the sovereign rights of Portugal and the integrity of its possessions! In spite of repeated conversations with Sir Edward Grey, in which the minister made ever fresh proposals concerning publication, the [Berlin] foreign office remained obstinate, and finally agreed with Sir Edward Goschen [British ambassador in Berlin] that everything should remain as it was before. So the treaty, which gave us extraor-

dinary advantages, the result of more than one year's work, had collapsed because it would have been a public success for me. When in the spring of 1914 I happened, at a dinner in the embassy, at which Mr. Harcourt [then colonial secretary] was present, to mention the matter, the colonial secretary said that he was embarrassed and did not know how to behave. He said that the present state of affairs was intolerable, because he [Mr. Harcourt] wanted to respect our rights, but, on the other hand, was in doubt as to whether he should follow the old treaty or the new. He said that it was therefore extremely desirable to clear matters up and to bring to a conclusion an affair which had been hanging on for so long.

"When I reported to this effect I received a rude and excited order, telling me to refrain from any further interference in the matter.

"I now regret that I did not go to Berlin in order to offer his majesty my resignation, and that I still did not lose my belief in the possibility of an agreement between me and the leading [German] personages. That was a disastrous mistake, which was to be tragically avenged some months later.

"Slight though it was, the extent to which I then still possessed the good will of the imperial chancellor—because he feared that I was aiming at his office—I must do him the justice to say that at the end of June, 1914, in our last conversation before the outbreak of war, he gave his consent to the signature and publication. Nevertheless, it required further repeated suggestions on my part, which were supported by Dr. Solf [German colonial secretary], in order at last to obtain official consent at the end of July. Then the Serbian crisis was already threatening the peace of Europe, and so the completion of the treaty had to be postponed. The treaty is now one of the victims of the war.

Bagdad Railway Treaty.

"At the same time, while the African agreement was under discussion, I was negotiating, with the effective co-operation of Herr von Kuehlmann, the so-called Bagdad Railway treaty. This aimed, in fact, at the division of Asia Minor into spheres of interest, although this expression was carefully avoided in consideration of the sultan's rights. Sir Edward Grey declared repeatedly that there was no agreement between England and France aiming at a division of Asia Minor.

"In the presence of the Turkish representative, Hakkı Pasha, all economic questions in connection with the German treaty were settled mainly in accordance with the wishes of the Ottoman bank. The greatest concession Sir Edward Grey made me personally was the continuation of the line to Basra. We had insisted on this terminus in order to establish connection with Alexandretta. Hitherto Bagdad had been the terminus of the line. The shipping on the Shatt-el-Arab was to be in the hands of an international commission. We also obtained a share in the harbor works at Basra, and even acquired shipping rights on the Tigris, hitherto the monopoly of the firm of Lynch.

"By this treaty the whole of Mesopotamia up to Basra became our zone of interest, whereby the whole British rights, the question of shipping on the Tigris and the Wilcox establishments were left untouched, as well as all the district of Bagdad and the Anatolian railways.

"The British economic territories included the coasts of the Persian Gulf and the Smyrna-Aidin railway, the French Syria and the Russian Armenia. Had both treaties been concluded and published, an agreement would have been reached with England which would have finally ended all doubt of the possibility of an Anglo-German co-operation.

Question of the Fleet.

"Most difficult of all, there remained the question of the fleet. It was never quite rightly judged. The creation of a mighty fleet on the other shore of the North sea and the simultaneous development of the continent's most important military power into its most important naval power had at least to be recognized by England as uncomfortable. This presumably cannot be doubted. To maintain the necessary lead and not to become dependent, to preserve the supremacy of the sea, which Britain must have in order not to go down, she had to undertake preparations and expenses which weighed heavily on the taxpayer. A threat against the British world position was made in that our policy allowed the possibility of warlike development to appear. This possibility was obviously near during the Moroccan crisis and the Bosnian question.

"People had become reconciled to our fleet in its definite strength. Obviously it was not welcome to the British and constituted one of the motives, but neither the only nor the most important motive, for England's joining hands with Russia and France. On account of our fleet alone, however, England would have drawn the sword as little as on account of our trade, which it is pretended called forth her jealousy and ultimately brought about war.

"From the beginning I adopted the standpoint that in spite of the fleet it would be possible to come to a friendly understanding and rapprochement if we did not propose new votes of credit, and, above all, if we carried out an indisputable peace policy. I also avoided all mention of the fleet, and between me and Sir Edward Grey the word was never uttered. Sir Edward Grey declared on one occasion at a cabinet meeting: 'The present German ambassador has never mentioned the fleet to me.'

"During my term of office the then first lord, Mr. Churchill, raised the question of a so-called naval holiday, and proposed, for financial reasons as much as on account of the pacifist inclinations of his party, a one year's pause in armaments. Officially the suggestion was not supported by Sir Edward Grey. He never spoke of it to me, but Mr. Churchill spoke to me on repeated occasions.

"I am convinced that his initiative was honest, cunning in general not being part of the Englishman's constitution. It would have been a great success for Mr. Churchill to secure economies for the country and to lighten the burden of armament, which was weighing heavily on the people.

"I maintain that it would have been difficult to support his intention. How about the workmen employed for this purpose? How about the technical personnel? Our naval program was settled, and it would be difficult to alter it. Nor, on the other hand, did we intend exceeding it. But he pointed out that the means spent on portentous armaments could equally be used for other purposes. I maintain that such expenditure would have benefited home industries.

"I also succeeded, in conversation with Sir William Tyrrell, Sir Edward Grey's private secretary, in keeping away that subject without raising suspicion, although it came up in parliament, and preventing the government's proposal from being made. But it was Mr. Churchill's and the government's favorite idea that by supporting his initiative in the matter of large ships we should give proof of our good will and considerably strengthen and increase the tendency on the part of the government to get in closer contact with us. But, as I have said, it was possible in spite of our fleet and without naval holidays to come to an understanding.

"In that spirit I had carried out my mission from the beginning, and had even suc-

ceeded in realizing my program when the war broke out and destroyed everything.

"Trade jealousy, so much talked about among us, rests on faulty judgment of circumstances. It is a fact that Germany's progress as a trading country after the war of 1870 and during the following decades threatened the interests of British trade circles, constituting a form of monopoly with its industry and export houses. But the growing interchange of merchandise with Germany, which was first on the list of all European exporting countries, a fact I always referred to in my public speeches, had allowed the desire to mature to preserve good relations with England's best client and business friend, and had gradually suppressed all other thoughts and motives. The Englishman, as a matter of fact, adapts himself to circumstances and does not tilt against windmills. In commercial circles I found the greatest good will and desire to further our common economic interests.

"In other circles I had a most amiable reception, and enjoyed the cordial good will of the court, society and the government.

King George Well Disposed.

"The king, very amiable and well meaning and possessed of sound understanding and common sense, was invariably well disposed toward me and desired honestly to facilitate my mission. In spite of the small amount of power which the British constitution gives the crown, the king can, by virtue of his position, greatly influence the tone both of society and the government. The crown is the apex of society from which the tone emanates. Society, which is overwhelmingly unionist, is largely occupied by ladies connected with politics. It is represented in the lords and the commons, consequently also in the cabinet.

"The Englishman either belongs to society or ought to belong to it. His aim is, and always will be, to be a distinguished man and a gentleman, and even men of modest origin, such as Mr. Asquith, prefer to be in society, with its elegant women.

"British gentlemen of both parties enjoy the same education, go to the same colleges and university, and engage in the same sports—golf, cricket, lawn tennis and polo. All have played cricket and football in their youth, all have the same habits and all spend the week-end in the country. No social cleavage divides the parties, only political cleavage. To some extent of late years the politicians in the two camps have avoided one another in society. Not even on the ground of a neutral mission could the two camps be amalgamated, for since the home rule and veto bills the unionists have despised the radicals. A few months after my arrival the king and queen dined with me and Lord Londonderry left the house after dinner in order not to be together with Sir Edward Grey. But there is no opposition from difference in caste and education as in France. There are not two worlds, but the same world, and their opinion of a foreigner is common and not without influence on his political standing, whether a Lansdowne or an Asquith is at the helm.

"The difference of caste no longer exists in England since the time of the Stuarts and since the Whig oligarchy (in contradistinction to the tory county families) allowed the bourgeoisie in the towns to rise in society. There is greater difference in political opinions on constitutional or church questions than on financial or political questions. Aristocrats who have joined the popular party, radicals such as Grey, Churchill, Harcourt and Crewe, are most hated by the unionist aristocracy. None of these gentlemen have I ever met in great aristocratic houses, only in the houses of party friends.

"We were received in London with open

arms and both parties outdid one another in amiability.

"It would be a mistake to undervalue social connections in view of the close connection in England between society and politics, even though the majority of the upper ten thousand are in opposition to the government. Between an Asquith and a Devonshire there is no such deep cleft as between a Briand and a Duc de Doudeauville, for example. In times of political tension they do not foregather. They belong to two separate social groups, but are part of the same society, if on different levels, the center of which is the court. They have friends and habits in common; they are often related or connected. A phenomenon like Lloyd George, a man of the people, a small solicitor and a self-made man, is an exception. Even John Burns, a socialist labor leader and a self-taught man, seeks society relations. On the ground of a general striving to be considered gentlemen of social weight and position such men must not be undervalued.

"In no place, consequently, is an envoy's social circle of greater consequence than in England. A hospitable house with friendly guests is worth more than the profoundest scientific knowledge, and a learned man of insignificant appearance and too small means would, in spite of all his learning, acquire no influence. The Briton hates a bore and a pedant. He loves a good fellow.

Grey and Asquith.

"Sir Edward Grey's influence in all questions of foreign policy was almost unlimited. True, he used to say on important occasions, 'I must lay that before the cabinet,' but it is equally true that the latter invariably took his view. Although he did not know foreign countries and, with the exception of one short visit to Paris, had never left England, he was closely informed on all important questions, owing to many years' parliamentary experience and natural grasp. He understood French without speaking it. Elected at an early age to parliament, he began immediately to occupy himself with foreign affairs. Parliamentary undersecretary of state at the foreign office under Lord Rosebery, he became in 1906 secretary of state under Sir Henry Campbell-Bannerman, and filled the post for ten years.

"Sprung from an old north of England family of landowners, from whom the statesman Earl Grey is also descended, he joined the left wing of his party and sympathized with the socialists and pacifists. He can be called a socialist in the ideal sense, for he applied his theories even in private life, which is characterized by great simplicity and unpretentiousness, although he is possessed of considerable means. All display is foreign to him. He had a small residence in London and never gave dinners, except officially, at the foreign office on the king's birthday. If, exceptionally, he asked a few guests to his house, it was to a simple dinner or luncheon in a small circle with parlor maids for service. The week-ends he spent regularly in the country, like his colleagues, but not at large country house parties. He lives mostly in his cottage in the New Forest, taking long walks, and is passionately fond of nature and ornithology. Or he journeyed to his property in the north and tamed squirrels. In his youth he was a noted cricket and tennis player. His chief sport is now salmon and trout fishing in the Scotch lakes with Lord Glenconner, Mr. Asquith's brother-in-law. Once, when spending his week-ends with Lord Glenconner, he came thirty miles on a bicycle and returned in the same way. His simple, upright manner insured him the esteem even of his opponents, who were more easily to be found in home than in foreign political circles.

"Lies and intrigue were foreign to his nature. His wife, whom he loved and from

whom he was never separated, died as the result of an accident to the carriage driven by him. As is known, one brother was killed by a lion.

"Wordsworth was his favorite poet, and he could quote him by the hour. His British calm did not lack a sense of humor. When breakfasting with us and the children, and he heard their German conversation, he would say, 'I cannot help admiring the way they talk German,' and laughed at his joke. This is the man who was called 'the Liar Grey' and the 'originator of the world war.'

"Asquith is a man of quite different mold. A jovial, sociable fellow, a friend of the ladies, especially young and beautiful ones, he loves cheery surroundings and a good cook, and is supported by a cheery young wife. He was formerly a well-known lawyer, with a large income and many years' parliamentary experience. Later he was known as a minister under Gladstone, a pacifist like his friend Grey, and friendly to an understanding with Germany. He treated all questions with an experienced business man's calm and certainty, and enjoyed good health and excellent nerves, steelled by assiduous golf.

"His daughters went to a German boarding school and speak fluent German. We quickly became good friends with him and his family, and were guests at his little house on the Thames.

"He only rarely occupied himself with foreign affairs. When important questions cropped up, with him lay the ultimate decision. During the critical days of July Asquith often came to warn us, and he was ultimately in despair over the tragic turn of events. On Aug. 2, when I saw Asquith in order to make a final attempt, he was completely broken, and although quite calm, tears ran down his face.

The Serbian Crisis.

"At the end of June, 1914, I proceeded to Kiel by order of the kaiser. A few weeks before I had been given the honorary degree of doctor at Oxford, a distinction conferred upon no German ambassador since Herr von Bunsen. On board the Meteor [the kaiser's yacht] we heard of the death of the archduke, the heir to the Austrian throne. His majesty expressed regret that his efforts to win the archduke over to his ideas had thus been rendered vain. Whether the plan of pursuing an active policy against Serbia had already been determined upon at Konopischt I cannot know.

"As I was uninformed about views and events at Vienna, I attached no far-reaching importance to this event. Not until later was I able to establish the fact that among the Austrian aristocrats a feeling of relief outweighed other sentiments. One of his majesty's other guests on board the Meteor was an Austrian, Count Felix Thun. Although the weather was splendid, he lay all the time in his cabin, suffering from seasickness. When the news arrived he was well; he had been cured either by the shock or by joy.

"When I arrived in Berlin I saw the imperial chancellor and said to him that I regarded our foreign situation as very satisfactory, since our relations with England were better than they had been for a very long time past. I also remarked that a pacifist ministry was in power in France.

"Herr von Bethmann-Hollweg seemed not to share my optimism, and he complained about Russian armaments. I tried to calm him and insisted especially that Russia had no interest in attacking us, and that such an attack would, moreover, never obtain the support of England and France, as both countries wanted peace.

"They went to Dr. Zimmermann [the under-secretary] who was representing Herr von Jagow [foreign secretary], and from him I learned that Russia was about to raise 900,-

000 fresh troops. His words showed an unmistakable animosity against Russia, who, he said, was everywhere in our way. Difficulties about commercial policy were also involved. Of course I was not told that Gen. von Moltke [chief of the general staff] was pressing for war. I learned, however, that Herr von Tschirschky [German ambassador in Vienna] had received a rebuke because he reported that he had advised moderation in Vienna toward Serbia.

"I went to Silesia and on my way back to London I spent only a few hours in Berlin, where I heard that Austria intended to proceed against Serbia in order to put an end to an intolerable state of affairs.

"Unfortunately I underestimated at the moment the importance of the news. I thought that nothing would come of it, after all, and that, if Russia threatened, the trouble could easily be composed. Now I regret that I did not stay in Berlin and say at once that I would have no share in any such policy.

"Subsequently I learned that at the decisive conversation at Potsdam on July 5 the inquiry addressed to us by Vienna found absolute assent among all the personages in authority; indeed, they added that there would be no harm if a war with Russia were to result. So, at any rate, it is stated in the Austrian protocol which Count Mensdorf, Austrian ambassador, received in London. Soon afterward Herr von Jagow was in Vienna to discuss everything with Count Berchtold, Austrian foreign minister.

"Sir Arthur Nicolson and Sir William Tyrrell had the greatest influence in the foreign office. The former was not our friend, but his attitude toward me was consistently correct and obliging. Our personal relations were of the best. Neither did he wish for war, but when we moved against France he undoubtedly worked for immediate intervention. He was the confidant of my French colleague and was in constant touch with him, and was destined to succeed Lord Bertie in Paris. As is known, Sir Arthur was formerly ambassador in St. Petersburg and had concluded the treaty of 1907, which enabled Russia to turn again to the west and the near east.

"Sir Edward Grey's private secretary, Sir William Tyrrell, had far greater influence than the permanent undersecretary of state. This unusually intelligent man had been at a school in Germany and had then entered the diplomatic service, but he was abroad only a short time. At first he belonged to the modern anti-German school of young English diplomats, but later he became a determined supporter of an understanding. To this aim and object he even influenced Sir Edward Grey, with whom he was very intimate. After the outbreak of war he left the department and went to the home office, probably in consequence of criticism of him for his Germanophile leanings.

Plots Against Lichnowsky.

"The rage of certain gentlemen over my success in London and the position I had achieved was indescribable. Schemes were set on foot to impede my carrying out my duties. I was left in complete ignorance of most important things, and I had to confine myself to sending in unimportant and dull reports. Secret reports from agents about things of which I could know nothing without spies and necessary funds were never available for me, and it was only in the last days of July, 1914, that I heard accidentally from the naval attaché of the secret Anglo-French agreement for joint action of the two fleets in case of war.

"After my arrival I became convinced that in no circumstances need we fear a British attack or British support of a foreign attack, but that under all conditions England would protect France. I advanced this opinion in repeated reports with detailed reasoning and insistence, but without gaining credence, al-

though Lord Haldane's refusal of the formula of neutrality and England's attitude during the Morocco crisis were clear indications. In addition the above-mentioned secret agreements were known to the department.

"I repeatedly urged that England as a commercial state would suffer greatly in any war between the European great powers, and would therefore prevent such a war by all available means, but, on the other hand, in the interest of the European balance of power and to prevent Germany's overlordship would never tolerate the weakening or destruction of France. Lord Haldane told me this shortly after my arrival. All influential people spoke in the same way.

"I then received instructions that I was to induce the English press to take up a friendly attitude if Austria gave the 'death blow' to the great Serbian movement, and as far as possible I was by my influence to prevent public opinion from opposing Austria. Recollections of the attitude of England during the annexation crisis, when public opinion showed sympathy for the Serbian rights in Bosnia, recollections also of the benevolent promotion of national movements in the time of Lord Byron and Garibaldi—these and other things spoke so strongly against the probability of support being given to the projected punitive expedition against the murderers that I considered it necessary to give an urgent warning. But I also gave a warning against the whole project, which I described as adventurous and dangerous, and I advised that moderation should be recommended to the Austrians, because I did not believe in the localization of the conflict.

"Herr von Jagow answered me that Russia was not ready; there would doubtless be a certain amount of bluster, but the more firmly we stood by Austria the more would Russia draw back. He said that Austria was already accusing us of want of spirit, and that we should not squeeze her. On the other hand, feeling in Russia was becoming ever more anti-German, and so we must simply risk it.

"This attitude, as I learned later, was based upon reports from Count Pourtales [German ambassador in Petrograd] to the effect that Russia would not move in any circumstances; these reports caused us to stimulate Count Berchtold to the greatest possible energy. Consequently I hoped for salvation from an English mediation, because I knew Sir Edward Grey's influence in Petrograd could be turned to use in favor of peace. So I used my friendly relations with Sir Edward Grey, and in confidence begged him to advise moderation in Russia if Austria, as it seemed, demanded satisfaction from the Serbs.

"At first the attitude of the English press was calm and friendly to the Austrians, because the murder was condemned. But gradually more and more voices were heard to insist that, however necessary the punishment of the crime, an exploitation of the crime for political purposes could not be justified. Austria was strongly urged to show moderation.

Ultimatum Condemned.

"When the ultimatum appeared all the newspapers, with the exception of the Standard, which was always in low water and apparently was paid by the Austrians, were at one in their condemnation. The whole world, except in Berlin and Vienna, understood that it meant war, and indeed world war. The British fleet, which chanced to be assembled for a review, was not demobilized.

"At first I pressed for as conciliatory an answer as possible on the part of Serbia, since the attitude of the Russian government left no further doubt of the seriousness of the situation.

"The Serbian reply was in accordance with British efforts; M. Pashitch had actually accepted everything except two points, about which he declared his readiness to negotiate,

If Russia and England had wanted war, in order to fall upon us, a hint to Belgrade would have been sufficient, and the unheard-of [Austrian] note would have remained unanswered.

Sir Edward Grey went through the Serbian reply with me and pointed to the conciliatory attitude of the government at Belgrade. We then discussed his mediation proposal, which was to arrange an interpretation of the two points acceptable to both parties. M. Cambon [French ambassador in London], the Marquis Imperiali [Italian ambassador in London] and I should have met under Sir Edward Grey's presidency, and it would have been easy to find an acceptable form for the disputed points, which in the main concerned the participation of Austrian officials in the investigation at Belgrade. Given good will, everything could have been settled in one or two sittings, and the mere acceptance of the British proposal would have relieved the tension and would have further improved our relations to England. I urgently recommended the proposal, saying that otherwise world war was imminent, in which we had everything to lose and nothing to gain. In vain! I was told that it was against the dignity of Austria and that we did not want to interfere in the Serbian business, but left it to our ally. I was told to work for 'localization of the conflict.'

"Of course it would only have needed a hint from Berlin to make Count Berchtold satisfy himself with a diplomatic success and put up with the Serbian reply. But this hint was not given. On the contrary, we pressed for war. What a fine success it would have been!"

"After our refusal Sir Edward asked us to come forward with a proposal of our own. We insisted upon war. I could get no other answer [from Berlin] than that it was an enormous 'concession' on the part of Austria to contemplate no annexation of territory."

"Whereupon Sir Edward justly pointed out that even without annexations of territory a country can be humiliated and subjected, and that Russia would regard this as a humiliation which she would not stand."

"The impression became ever stronger that we desired war in all circumstances. Otherwise our attitude in a question which, after all, did not directly concern us was unintelligible. The urgent appeals and definite declarations of M. Sazonoff [Russian foreign minister], later on the positively humble telegrams of the czar, the repeated proposals of Sir Edward, the warnings of San Giuliano [Italian foreign minister] and of Bollandi [Italian ambassador in Berlin], my urgent advice—it was all of no use, for Berlin went on insisting that Serbia must be massacred."

"The more I pressed, the less willing they were to alter their course, if only because I was not to have the success of saving peace in the company of Sir Edward Grey."

"So Grey on July 29 resolved upon his well-known warning. I replied that I had always reported that we should have to reckon upon English hostility if it came to war with France. The minister said to me repeatedly: 'If war breaks out it will be the greatest catastrophe the world has ever seen.'"

"After that events moved rapidly. When Count Berchtold, who hitherto had played the strong man on instructions from Berlin, at last decided to change his course, we answered the Russian mobilization—after Russia had for a whole week negotiated and waited in vain—with our ultimatum and declaration of war."

"Sir Edward Grey still looked for new ways of escape. In the morning of Aug. 1 Sir W. Tyrrell came to me to say that his chief still hoped to find a way out. Should we remain neutral if France did the same? I understood him to mean that we should then be ready to spare France, but his meaning was that we should remain absolutely neutral—neutral there-

fore even toward Russia. That was the well-known misunderstanding. Sir Edward had given me an appointment for the afternoon, but as he was then at a meeting of the cabinet he called me up on the telephone after Sir W. Tyrrell had hurried straight to him. But in the afternoon he spoke no longer of anything but Belgian neutrality and of the possibility that we and France should face one another armed, without attacking one another."

"Thus there was no proposal whatever, but a question without any obligation, because our conversation, as I have already explained, was to take place soon afterward. In Berlin, however—without waiting for the conversation—this news was used as the foundation for a far-reaching act. Then came Poincaré's letter, Bonar Law's letter and the telegram from the king of the Belgians. The hesitating members of the cabinet were converted, with the exception of three members, who resigned."

"Up to the last moment I had hoped for a waiting attitude on the part of England. My French colleague also felt himself by no means secure, as I learned from a private source. As late as Aug. 1 the king replied evasively to the French president. But in the telegram from Berlin which announced the threatening danger of war England was already mentioned as an opponent. In Berlin, therefore, one already reckoned upon war with England."

Diplomat Honored.

"Before my departure Sir Edward Grey received me on Aug. 5 at his house. I had gone there at his desire. He was deeply moved. He said to me that he would always be ready to mediate, and 'We don't want to crush Germany.' Unfortunately this confidential conversation was published. Thereby Herr von Bethmann-Hollweg destroyed the last possibility of reaching peace via England."

"Our departure was thoroughly dignified and calm. Before we left, the king had sent his enquiry, Sir E. Ponsonby, to me to express his regret at my departure and that he could not see me personally. Princess Louise wrote to me that the whole family lamented our going. Mrs. Asquith and other friends came to the embassy to say good-by."

"A special train took us to Harwich, where a guard of honor was drawn up for me. I was treated like a departing sovereign. Thus ended my London mission. It was wrecked not by the perfidy of the British but by the perfidy of our policy."

"At the railway station in London Count Mensdorff [Austrian ambassador] appeared with his staff. He was cheerful, and gave me to understand that perhaps he would remain in London. But to the English he said that it was not Austria, but we, who had wanted the war."

Looking Backward.

"When now, after two years, I realize everything in retrospect, I say to myself that I realized too late that there was no place for me in a system which for years has lived only on tradition and routine, and which tolerates only representatives who report what one wants to read. Absence of prejudice and an independent judgment are combated, want of ability and of character are extolled and esteemed, but successes arouse hostility and uneasiness."

"I had abandoned opposition to our mad triple alliance policy, because I saw that it was useless and that my warnings were represented as Austrophobia and an idée fixe. In a policy which is not mere gymnastics or playing with documents, but the conduct of the business of the firm, there is no such thing as likes and dislikes; there is nothing but the interest of the community: but a policy which is based merely upon Austrians, Magyars and Turks must end in hostility to Russia and ultimately lead to a catastrophe."

"In spite of former aberrations, everything

was still possible in July, 1914. Agreement with England had been reached. We should have had to send to Petersburg a representative who, at any rate, reached the average standard of political ability, and we should have had to give Russia the certainty that we desired neither to dominate the straits nor to throttle the Serbs. M. Sazonoff was saying to us: "Lâchez l'Autriche et nous lâcherons les Français," and M. Cambon [French ambassador in Berlin] said to Herr von Jagow: "Vous n'avez pas besoin de servir l'Autriche partout."

"We needed neither alliances nor wars, but merely treaties which would protect us and others, and which would guarantee us an economic development for which there had been no precedent in history. And if Russia had been relieved of trouble in the west she would have been able to turn again to the east, and then the Anglo-Russian antagonism would have arisen automatically without our interference—and the Russo-Japanese antagonism no less than the Anglo-Russian."

"We could also have approached the question of limitation of armaments, and should have had no further need to bother about the confusions of Austria. Austria-Hungary would then become the vassal of the German empire—without an alliance, and, above all, without sentimental services on our part, leading ultimately to war for the liberation of Poland and the destruction of Serbia, although German interests demanded exactly the contrary."

"I had to support in London a policy which I knew to be fallacious. I was punished for it, for it was a sin against the Holy Ghost."

"On my arrival in Berlin I saw at once that I was to be made the scapegoat for the catastrophe of which our government had made itself guilty in opposition to my advice and my warnings."

"The report was persistently circulated by official quarters that I had let myself be deceived by Sir Edward Grey, because if he had not wanted war Russia would not have mobilized. Count Pourtales, whose reports could be relied upon, was to be spared, if only because of his family connections. He was said to have behaved 'splendidly,' and he was enthusiastically praised, while I was all the more sharply blamed."

"What has Russia got to do with Serbia?" this statesman asked me after eight years of official activity in Petersburg. It was made out that the whole business was a perfidious British trick which I had not understood. In the foreign office I was told that in 1916 it would in any case have come to war. But then Russia would have been 'ready,' and so it was better now."

Proofs of German Guilt.

"As appears from all official publications, without the facts being controverted by our own white book, which, owing to its poverty and gaps, constitutes a grave self-accusation:

"1. We encouraged Count Berchtold to attack Serbia, although no German interest was involved, and the danger of a world war must have been known to us—whether we knew the text of the ultimatum is a question of complete indifference."

"2. In the days between July 23 and July 30, 1914, when M. Sazonoff emphatically declared that Russia could not tolerate an attack upon Serbia, we rejected the British proposals of mediation, although Serbia, under Russian and British pressure, had accepted almost the whole ultimatum, and although an agreement about the two points in question could easily have been reached, and Count Berchtold was even ready to satisfy himself with the Serbian reply."

"3. On July 30, when Count Berchtold wanted to give war, we, without Austria having been attacked, replied to Russia's mere mobilization by sending an ultimatum to Petersburg, and on July 31 we declared war on the Russians, although the czar had

pledged his word that as long as negotiations continued not a man should march—so that we deliberately destroyed the possibility of a peaceful settlement."

"In view of these indisputable facts, it is not surprising that the whole civilized world outside Germany attributes to us the sole guilt for the world war."
